Potential buyers value Canary Wharf at £600m

Two potential corporate purchasers of Canary Wharf have separately concluded that the insolvent office project in the Docklands area of east London is worth no more than £600m (\$1.1bn).

Hanson, the Anglo-US conglomerate, and P&O. the UK shipping and property group, would be likely to offer considerably less than that figure if either decided to bid for the Olympia and York development. Page 18

index up: A surge in the purchasing managers' index - a key barometer of industrial conditions - signalled an acceleration in the momentum of US economic recovery. The Dow Jones Industrial Average closed up 16.33 at a record 3.413.21. Page 3; Lex. Page 18; Government bonds, Page 24; Currencies, Page 36; World stocks, Page 40

"Quit" offer: The chairman of the Russian central bank, Georgy Matiukhin, offered his resignation, blaming disputes with the Russian parliament for his decision. Page 2

Errors alleged: Germany's aerospace industry has virtually no chance of winning majority sup-port in the Bundestag for the European Fighter Aircraft, according to a leading parliamentary defence spokesman. Page 18

Angle American Corporation, South Africa's largest company, signalled optimism about prospects for an economic upturn by lifting its dividend 6 per cent on the back of maintained earnings for the year to the end of March. Page 19

Boundary threat: Iraq said UN proposals for a new border with Kuwait would "create a permanent nucleus for tension". Page 4

Karl Lagerfeld, the German designer who is one of the brightest stars of French fashion, is to sell his business to Dunhili Holdings, British luxury goods group, for what Dunhill chairman Lord Douro said was "less than FFr160m" (\$29m). Lager feld, seen here with one of his company's aftershaves, will design ready to wear fashions for Dunhill. Page 19

Clean-up aid: East Cermany's obsolescent chemicals industry has been granted more than DM600m (\$371m) by the Treuband agency as part of a DM2bn programme to clean up the massively-polluted production sites. Page 4

EUROPES BUSINESS MEMSPAPER Investigators unravel more of Maxwell web

By Bronwen Maddox, Raymond Snoddy and Jimmy Burns in London and lan Rodger in Zurich

INVESTIGATORS uncovered a number of Liechtenstein-controlled companies with links to the Maxwell family which are beyond the reach of creditors and pensioners of the collapsed empire of the late Mr Robert Maxwell.

One of them, Sphere Inc. a fastgrowing Californian computer games company which trades as

Spectrum Holobyte, expects to have a turnover of \$20m this year. Another, Pergamon Holdings (US) Inc. was used to pay Mr Kevin Maxwell, Mr Maxwell's youngest son. Until two months ago Mr Kevin

Maxwell was a director of Sphere Inc. His sister, Ms Christine Maxwell, is still on the board. The companies are separate

subsidiaries of the secretive Max-well Foundation in Vaduz which was also the ultimate owner of Mr Robert Maxwell's complex

In addition to the Liechtenstein-controlled companies, inves-tigators have also been examining at least one private company owned directly by members of the Maxwell family.

The company, Fivetell, has been used to hold family stakes in top soccer clubs. According to the latest company records. Mr Ian Maxwell, former chief executive of Mirror Group Newspapers and another son of Mr Robert Maxwell, owns 51 per cent of the company.

Investigators believe that last

year "substantial funds" were transfered into Pergamon Holdings (US) Inc. from Maxwell companies throughout the world, including Macmillan, the US publisher and the most valuable asset of Maxwell Communication Corporation.

Investigators understand that one of the company's functions was to pay Mr Kevin Maxwell, a legitimate activity, and a common structure in many compa-

On April 3 1992 Pergamon Holdings (US) Inc. registered an interest in Mr Kevin Maxwell's Newspapers, but Sphere was house in Cheisea, London, which always owned separately. is believed to be worth over £1m. Investigators are unclear whether the company had other functions, or whether it still con-tains assets. Their examination has been inhibited because they cannot penetrate the Liechtonstein rules of confidentiality. Mr Robert Maxwell took an 80

per cent stake in Sphere, based in Alameda, California, in 1987. It operated as a sister company to Mirrorsoft, a UK computer games company owned by Mirror Group

Mr Gilman Louie, the founder of the company, confirmed yes terday that he believed the ultimate ownership was in Liechten-stein. Mr Louie said this had insulated the company from the chaos surrounding the Maxwell businesses. "We are trading as

normal," said Mr Louie. Yesterday administrators said

Serbs bomb Sarajevo in defiance of sanctions

By Judy Dempsey and Laura Silber in Belgrade

THE BOSNIAN capital of Sarajevo last night came under heavy bombardment from Serb irregular forces in defiance of United Nations sanctions and an agreement to implement a cease-

The bombardment, which started less than two hours after the ceasefire was due to come into effect, appeared to indicate that power is passing quickly to local Serbian warlords in Sarajevo and opposing Bosnian militia groups. The renewed fighting casts doubt on the ability of authorities in Belgrade, Serbia's capital, to control their irregular

forces even if they wish to In response to the sanctions, Serbia yesterday sent General Zivota Panic, commander of the Yugoslav federal army, to Sarajevo where he was due to hold talks with Bosnia's President Alija Izetbegovic. The two were to discuss implementing the ceasefire which was to start at 1600 GMT yesterday having been forged by Colonel John Wilson, a UN official in Sarajevo, and agreed by Croat, Moslem and Serb leaders in Sarajevo on Sun-

The fighting took place as Serbia prepared for energy rationing to offset the impact of the sanctions, designed to put pressure on the republic to stop the war in Bosnia-Hercegovina. President Slobodan Milosevic bow to international pressure. "The people have said that they want to be masters of their own destiny, and not to have it at the hands of foreigners," he said. The sanctions, as tough as those imposed on Iraq in 1990, are

already beginning to bite. Mr Nikola Sainovic, Serbia's minister of energy, said oil derivatives would soon be "conserved", a signal that rationing was planned.

In the run-up to the deadline set for the ceasetire yesterday, Sarajevo Radio reported that Serb militia had bombarded the city hall. One person was killed and three were injured. According to the radio, at least 30 people

■ Chaos obscures casualties of Serbian sanctions

EC accuses US over Earth Summit

George Graham in Washington

In Belgrade, President Milosevic said "the great results" of Sunday's parliamentary and local elections, which the main opposition parties boycotted, supported the government's defiant stand. "They [the results] are a reply to all those enemies outside, and internally, who have conducted a campaign against the elections. The results are of enormous sig-

have not been announced. The IIN said it would begin

By Christina Lamb in Rio and

THE EUROPEAN Community accused the US yesterday of threatening the outcome of the Earth Summit because of its refusal to sign a treaty central to the success of the environmental

gathering. The summit, due to start in Rio de Janeiro tomorrow, has already been plagued by acrimony between developed and developing nations.

Expectations about what the 10-day summit could achieve were further lowered by Mr John Major, the UK prime minister who said some people were expecting too much from it.

"I am very keen for us to make progress generally at the Rio summit," Mr Major said. "But I have been warning for some time that some of the expectations for the summit are higher than those that can be realistically

Mr Laurens Jan Brinkhorst. who is leading the EC's delega-tion, said in Rio that the US was in danger of creating a rift within the industrialised world at the

summit by refusing to sign a convention on species conservation, or biological diversity.

'We're very disappointed with the US decision. It will be very sad if it results in a cleavage not just between developed and developing countries but also between developed countries." The developing world had bent over backwards to please the US

and "they are not seeing an appropriate response", Mr Brinkhorst added In Washington President

George Bush proposed a doubling in world spending on forest conservation to \$2.7bn and offered

\$150m of US funds as a "downpayment" for his initiative. US officials acknowledged.

however, that the extra funding might well not become available before 1994, and would have to be offset by cuts in other spending. A senior US official said Mr Bush had written to leaders of the Group of Seven leading industrialised nations and the EC

about his proposal. A US official said: "This [the US initiative) is quite an effective approach to dealing with biodiversity. This is not rhetoric, this is reality.

Members of developing coun-

What is the minimum number of cuts

required to rearrange this square with the

hole in the middle?

tries said they were angry at what they saw as an attempt by the US to deflect criticism with its forests initiative.

Both the EC and the developing world had accepted a weaker convention on climate change to accommodate the US, Mr Brinkhorst said. "We in the EC believe it is very important to make ourselves credible to developing countries by showing that the developed world is not only offering words but taking steps to

Rolls-Royce forges power link with Westinghouse

By Paul Betts in London and Ian Rodger in Zurich

contract in January. The agreement announced yesterday extends this co-operation across the whole field of large power generation systems.

The partnership will also introduce Rolls-Royce into the gas turbine alliance between Westinghouse, Japan's Mitsubishi Heavy Industries and FiatAvio of Italy. Rolls-Royce, which acquired

Britain's Northern Engineering Industries (NEI) three years ago, has been seeking to expand its industrial power activities which already account for about 40 per cent of the group's annual turnover. Sir Ralph Robins, chief executive, indicated last week that Rolls-Royce's long-term strategy was to reach a 50-50 balance between aero-engines and industrial power.

Yesterday's deal underlined the

power generating systems, which operate under similar conditions of extreme heat.

industrial power divisions, while Siemens of Germany has teamed up with US company Pratt & Whitney. Under the new agreement, Rolls-Royce said it would transfer aero engine technology to Westinghouse for use in existing and future industrial combustion turbine designs.

The Westinghouse agreement raises questions over Rolls-Royce's relationship with ABB Asea Brown Boveri, the Swedish-Swiss group. Rolls-Royce already co-operates with ABB in the UK market and there has been regular speculation that the two groups would forge closer links.

Rolls-Royce said last night that the Westinghouse deal would not increasing demand for aero- affect the current relationship.

Russian central bank chairman resigns

By John Lloyd in Moscow

THE chairman of the Russian central bank vesterday offered his resignation to the presidtum of the Russian parliament, blaming disputes with parliament, especially over interest rate policy, for his decision.

Mr Georgy Matiukhin, in office for a little over a year and the butt of ferocious criticism in the press and parliament, told the presidium his decision was final. The move seems set to be approved by parliament, which contains some of his sharpest critics.

The resignation throws open

the sensitive arena of financial policy to a bitter political feud between government and president on the one side and parliament on the other over the choice of a successor and the setting of bank policy. Parliament is constitutionally responsible for the bank, but Mr Boris Yeltsin, the Russian ident, said the bank took its orders from him, while the government has sought to exert pressure on it wherever

This struggle is certain to become part of a larger conflict between president and parliament over the scope of presi-

Moscow sets out terms for

dential powers. Mr Yeltsin has promised to hold a referendum on the constitution, and on the private ownership of land both issues on which he has been blocked by the deputies. If he attempts also to take the central bank out of parliament's control, the muchawaited showdown between the presidential and legislative levels of government could not be delayed further.

Two possible replacement candidates have been much discussed in recent weeks as it became clear that Mr Matiukhin was under growing pressure. They are Mr Boris Feodorov, a senior official of the London-based European Bank for Reconstruction and Development and a former finance minister of Russia; and Mr Viktor Gerashchenko, the former chairman of the Soviet State Bank (Gosbank) who - though forced out when the Soviet Union collapsed at the end of last year - still commands

respect at home and abroad. Mr Feodorov would be the choice of the economic reformers in the cabinet, led by Mr Yegor Gaidar, the first deputy prime minister. However, Mr Gerashchenko, some 30 years his senior, may command sup-

Mr Matiukhin has been blamed for pushing interest rates up to 80 per cent; for starving enterprises of cash to pay wages and for restricting credit to the point where interenterprise debt has rocketed to the figure of Rbs 1.7trillion. Mr Gaidar promised the cash

hunger would be assuaged by July when larger banknotes up to Rbs5,000 - come in. ● Nefteexport, Russia's main oil-exporting firm, yesterday announced the resignation of its head, Mr Vladimir Arutun yan, but gave no reason, Reuter reports from Moscow.

By Christopher Parkes in Bonn

THE RECENT fall in west German import prices accelerated in April, reinforcing optimism that inflation is on the way down

Export prices rose further, but the rate of increase appears to be slowing. Cheaper fresh produce and raw coffee, down by 15 per cent and 4 per cent respectively on previous month, contributed to a 2.5 per cent overall reduction against April last year, the federal statistics

drop followed year-on-year falls of 1.5 per cent in March and 1.2 per cent in February.

The 1 per cent increase in export prices followed a 1.4 per cent increase in February and 1.2 per cent in March.

The fall in inflation to 4.5 per cent in May, compared with 4.6 per cent a month earlier, matched most forecasts.

These also predict a decline to around 3.5 per cent in mid-year, when special levies imposed last July on oil and other goods, drop out of the

Brussels on Ilva plan

MR Giulio Andreotti, caretakei prime minister of Italy, has satisfied the European Commission's competition authorities that the Italian government is committed to the restructuring plan prepared for Ilva, the state-owned steel group.

Sir Leon Brittan, the competition commissioner, must now decide whether to recommend approval of the state aid package, or whether it is likely to distort competition, in which case he can call for it to be altered or abandoned. Sir Leon is likely to submit his recommendation to the full Commission next week.

A decision on the politically sensitive Ilva case was held up until after the Italian election. Within the last few weeks Mr Andreotti has written a letter to Sir Leon underlining the government's commitment to the package. Commission officials said they were sure that the caretaker government's promises would be honoured by the next coalition.

The liva plan outlined last summer would have involved an injection of up to L1,200bn (\$992m) in new capital from its parent, the IRI state holding company. The group received L350bn when it absorbed Sofim, the state agency entrusted with economic development in southern Italy. Ilva hopes IRI will come up with a further L300bn, and has said it will also sell off assets to concentrate on its core businesses. Ilva is likely to reveal more details of its plans today when it will announce results for 1991. The group is expected to report a loss of up to L450bn.

defence and intervention areas in which it has a right to By John Lloyd intervene if it believes they are THE Russian defence minister under threat. These would include the three Baltic states. said yesterday that the inter vention of foreign troops in the western states of Ukraine 1.3m and 1.5m. Mr Viktor Mikhailov, head of

states adjoining Russia, or the build-up of troops on their bor ders, would be regarded as a direct military threat to Rus General Pavel Grachev, recently appointed to the top defence post, told a conference i n which a number of NATO officials are participating that

Russia saw no state or group of states as hostile to it. It would, however, react forcefully to any state which sought regional domination. This definition of Russia's

"sphere of interest" means it sees all of the former Soviet states on its land borders as

and Belarus, the Caucasus to the south and the central

Asian state of Kazakhstan. This is in spite of the fact that Russia has not concluded a collective security agreement with most of these states. Bela rus, Ukraine, Georgia and Azerbaijan, as well as the Bal tic states - which are not in the Commonwealth of Indepen dent States - have all refused to sign a security agreement. Ukraine increasingly sees itself as opposed to Russia. General Grachev promised

sweeping changes in the Rus sian army over the next 10 years - including a cut of

the Russian Atomic Ministry, told the same conference that "nuclear weapons ensure the stability of the world - even today". He said Russia now controlled 80 per cent of nuclear weapons production facilities of the former Soviet Union - with the remaining 20 per cent confined to ore extraction and processing

He said that 15,000 nuclear warheads, or 50 per cent of the former Soviet nuclear poten tial, would be destroyed. How ever, this process would take 10 to 15 years and would cost \$2bn (£1.1bn).

Nato chief hints at heavier intervention

By David White, elence Corresponden

PEACEKEEPING FORCES in situations such as Yugoslavia may require heavier military capabilities than those deployed up until now in United Nations operations. General John Galvin, Nato's supreme commander in Europe, said yesterday.

You may find walking around with just blue helmets and pistols," he told an audience in a speech at the Royal United Services Institute in London. Experience so far in

peacekeeping operations in Yugoslavia had shown that such operations had to be carefully thought out, leaving room for flexibility and reinforcement, he said. He would not comment,

however, on prospects for larger-scale military intervention. peacekeeping business was "booming", with 13 different operations

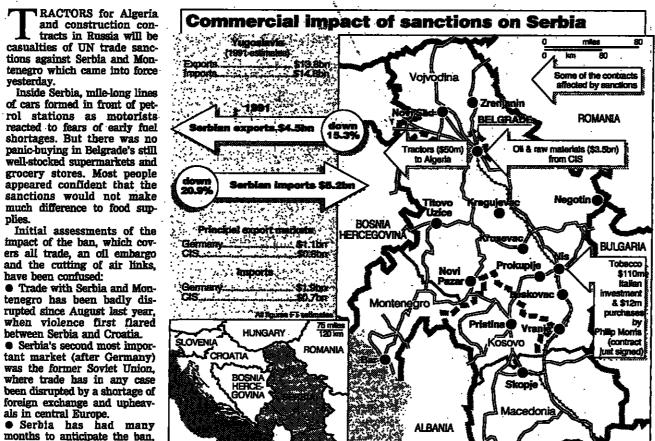

launched since 1988, more than in the previous history of the However, these forces were usually deployed where there was an established peace to keep. "I'm not sure that's

always going to be true," he Gen Galvin, who retires from his post later this month, expressed confidence that Nato would take on peacekeeping missions, which is a subject due for discussion

by foreign ministers in Oslo this week. However, it was unlikely to undertake such a role in eastern Europe without the involvement of east European

Chaos obscures casualties of Serbian sanctions

Energy-dependent industry and tobacco exports are likely to be quickly affected, writes David Dodwell

sanctions. An early casualty inside Serbia will be Yugocars and other vehicles made at the Crvena Zastava enterprise in

Various components and upholstery, traditionally supplied from Slovenia and Croatia, have already been disrupted by military conflict. Efforts to find new sources inside Serbia have met with only partial success. Important export markets.

like Greece where Yugocars enjoyed preferential tariff

\$50m (£27.7m) contract to sell tractors to Algeria, where Crvena Zastava first entered the market a decade ago, will also be frozen.

Yugoslavia's textiles and clothing industry has already been disrupted. In 1990, it accounted for almost \$1bn of Yugoslavia's exports. In Germany, an important market for Serbian textile products, the effect of sanctions would be "certainly painful" for some sectors and some individual companies, the Gesamttextil industry group said. Among its main farm

exports, tobacco will be badly hit. One of Serbia's main tobacco enterprises, Duvanska Industrija, was planning to build a \$110m facility to be supplied by Komas of Italy - a deal which must be in abey-

GREECE

try is likely to be quickly affected - including chemicals and iron and steel. Mr Mirolem Dzindo, manager of a fertiliser factory, said: "We used to get get gas from Russia. Our whole production will stop. The state will not have enough artificial fertiliser. That means that there will be no food. There Serbia depends on imports

for about 40 per cent of its energy, and is no longer able to import oil and gas through the Adriatic pipeline. Almost a quarter of Serbia's oil came last year from China, with a similar amount from Russia, while Iran supplied 16 per cent and Romania a further 13 per

China was among the most reluctant to impose sanctions on Serbia, but is thought likely to abide by the UN directive, if is so difficult. Russia's response will be pivotal. Progres, the Belgrade-based foreign trade company, recently announced a \$3.5bn agreement under which Russia would supply energy and raw materials in exchange for Serbian farm and consumer products, and construction work.

Mr Vyacheslav Dmitriev, deputy director of the trade department of the Russian Ministry of Foreign Economic Relations said last night that negotiations between Russia and Serbia on trade contracts would continue, in spite of Russia's announced intention to apply embargoes against the Yugoslav republic. He regarded an embargo as

temporary and had received no instructions to break off nego-However, he said there had

been very few recent trade contracts with Serbia because of lack of hard currency on both

The CIS countries were Serbia's second most important trading partner, behind Germany, and ahead of Italy and France. The impact of sanctions on trading partners will vary more in terms of their geographic location than in terms of the importance to them of the Serbian market in

President Havel, after a

fully independent repub-

For example, despite Ger-

many's importance to the former Yugoslavia as a trading partner, its annual imports of \$1.1bn and exports of \$1.9bn in 1990 accounted for less than one per cent of all German foreign trade. Serbia traditionally accounts for around a quarter of total Yugoslav-German

The direct effects of the war and measures taken by government and individual companies had anyway sharply reduced German trade with Yugoslavia

imposed. Italy accounted for 14 per cent of the former Yugoslavia's total foreign trade. However, almost 60 per cent of this was accounted for by the two republics of Croatia and Slovenia with which Italy has

long held close ties. Indeed, the independence of these two republics has accelerated Italian trade, mainly made up of food products and light industrial goods. By contrast, Hungary will be

more affected than most by sanctions. Hungarians are par-ticularly worried that Serbia will respond to Hungarian sanctions by blocking river traffic down the Danube, Hungary's only waterway route to the open sea.

Hungary is the mainland transit route for Serbian trade since conflict made transporting goods through Yugoslavia difficult. Truck and rail traffic continues as normal at present, pending a government decision later this week.

Greece and Turkey are similarly compromised, since Serbia sits across their main land bridge to the EC market. Goods travelling to Europe could easily be "diverted" in Serbia, local observers claim.

from the Bank of England: HM Treasury announced ye terday that, following Resolution 757 of the UN Security Council. Yugoslay (Serbian/Montenegrin) assets held in the UK are being blocked.

The Bank of England, on behalf of HM Treasury. announce that bargains entered into in the money, foreign exchange and securities markets, involving Serbian or Montenegrin counter-parties. 1992 may be completed without reference to the Bank of

England. Permission is hereby given for payments to and from the accounts of individuals resident in Serbia or Montenegro. except payments to those territories, to be made without for-

mality. Questions regarding the above should be referred to the Bank of England, telephone numbers: 071-601 4768: 071-601 4607; 071-601 3848; 071-601 3558; Fax: 071-601

Business as usual at Anglo-Yugoslavia

Anglo-Yugoslavia, a Yugoslav bank operating in London, said yesterday it was carrying on with business as usual after the Bank of England and Treasury had confirmed that it was regarded as a UK resident

ank, writes David Barchard. Mr Michael Cowdrey, deputy managing director, said the bank, with a balance sheet of about £70m, was subject to applying the same sanctions against Serbla and Montenegro as any other bank in the UK. This may pose some prob-lems as Anglo-Yugoslavia is mainly owned by Serbian and Montenegrin institutions.

Master Slovak politician shakes the federalist foundation

Vladimir Meciar: verbal pugilist

Seval square of the small town of Banska Stvianica in central Slovakia, Mr Vladimir Meciar, the most popular politician in the republic. works the crowd with the welltrained techniques he learned in his boxing career. His large silhouette positioned beneath the statue of Saint Sebastian, he answers written questions allegedly gathered from the crowd. In well-prepared verbal blows, Mr Meciar displays his wit as he blends political slogans with well-timed jokes

about his enemies. An expected winner in Friday's elections for the regional republic's parliament, the Slovak National Council, he knows when to strike. Since joining the opposition in the assembly after a spell as regional prime minister a vear ago, his popularity increased in parallel with the growth of nationalism in Slovakia, the smaller of the two republics in the Czechoslovak federation.

With an average 30 per cent support in the opinion polls for his party, the Movement for a Democratic Slovakia, and support from other smaller parties, he represents the greatest threat facing the federation since the demise of communism. He shouts to the crowd: "I told Mr Havel (the federal president) that we will no longer ask him what to do!" The people of Banska Stylanica applaud enthusiastically.

The party's programme calls on the Slovak parliament to declare the republic's sovereignty. He has also promised to push through a constitution which would take precedence over the federal one. He says

to the second of the second of

that a referendum would then be put "if the Czechs and Slovaks continue to disagree" Representatives of the Czech

The word 'independence' may be avoided, reports Ariane Genillard, but the rhetoric is unambiguous

and Slovak governments have been unable to agree a postcommunist relationship. As negotiations continued to fail and Slovakia's unemployment rate soared to three times that of neighbouring Czech lands, nationalists fuelled the growing resentment against the federal government. The Movement for a Demo-

cratic Slovakia recelves between 25 and 34 per cent in the various opinion polls, but his policies also have the backing of other parties with which he might be able to construct a parliamentary majority. Moreover, together they could put together a strong bloc in the federal parliament in partnerleft-wing parties. Right-wing politicians have warned in Prague that his victory could herald the end of a workable federal parliament. Mr Meciar's calls for

increased state subsidies for alling enterprises has won the support of the Democratic Left Party, the renamed communist party, which, while allegedly pro-federation, is calling for greater state intervention in the transition to a free market. Led by a charismatic and relatively young man, Mr Petr Weiss, it gets about 12 per cent

in the polls. His party is also supported by smaller, but equally nationalist parties, in Slovakia, such as the Slovak National Party, the only party to call openly for independence. It has an estimated 10 per cent support ship with the Czech republic's in the Slovak population.

Careful to avoid the word "independence," Mr Meciar that this would lead "to nothtalks about "increased autoning but a chaotic break-up of omy." Polls show that only a the state." small minority wants outright independence. Still, the rheto-

Talks about dividing the two republics pervade the discourse of all political parties in ric is unambiguous: "If we both the republics as votingwant to be the equal of other day approaches. Faced with countries in Europe," he told his Banska Stvianica rally, "we the possibility of an unworkshave to join it as separate ble federal parliament. Czech state. Slovakia must have its right-wing parties, which head own legal status in Europe. We the opinion polls in their republic, have signalled an must be able to take decisions by ourselves and with our own unwillingness to compromise.

"I do not rule out the possibility of two countries emerging," Mr Meciar told the crowd. "but it will be because the Czechs were unable to co-operate with us." The crowd applauds, seeming to have forgotten entirely that it was his own party that opposed all tentative agreements between the

Key US index signals growth acceleration

By Michael Prowse n Washington

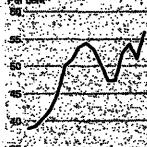

managers' index - 'a closely followed barometer of industrial conditions - yesterday signalled an acceleration in the momentum of US economic

The index rose to 56.3 per cent last month against 51.3 per cent in April. This was the strongest reading for three years and well above financial markets' expectations.

"It's the gong that announces the recovery is here to stay," said Mr David Jones, chief economist at Aubrey Lan-ston, the New York broker. Growth was likely to accelerate from an annual rate of 2.4 per cent in the first quarter to 3-3.5 per cent during the summer, he said.

Mr David Hale, chief economist at Kemper Financial Companies in Chicago, said the surge in the index pointed to strong growth in industrial

US purchasing managers' index

production as companies rebuilt inventories after the lengthy downturn. Rebuilding A SURGE in the purchasing of inventories could add 1.5 percentage points to the growth rate in the current quarter, he said.

The index is usually a reliable guide to economic trends. It dipped between March and April but is now decisively above the 50 per cent threshold indicating expansion in manufacturing. Components of the index pointed almost unani-

mously to sustained recovery. The index for new orders rose to 61 per cent, against 56.7 per cent in April Indices for export orders, production and prices rose sharply. The employment index also rose significantly, but remained below the 50 per cent threshold indicating growth of jobs.

Other economic data released yesterday were less encouraging, but related to April when the economy eemed to experience a dip.

The Commerce Department said personal income rose only 0.1 per cent in April, the second month of sluggish growth. After allowing for inflation, disposable incomes fell 0.2 per cent. In real terms, personal consumption spending rose 0.1 per cent in April, following a 0.5 per cent decline a month

0.3 per cent decline in construction spending in April following a strong gain in March. Merchandise trade figures for the first quarter showed a deficit of \$17.5bn (£9.7bn) against \$18.5bn in last year's fourth

Political fog descends on the last primary rites

Jurek Martin on the uncertainties that lie beyond inevitable wins for George Bush and Bill Clinton

THIS is not the first time that California has held a presidenhas held a presidential primary too late to make a difference. But it may be unprecedented that the largest state of the union, the seventh (Ohio), the ninth (New Jer-

sey), and three others (Alabama, Montana and New Mexico) should go through their quadrennial political rites today and attract such little attention.

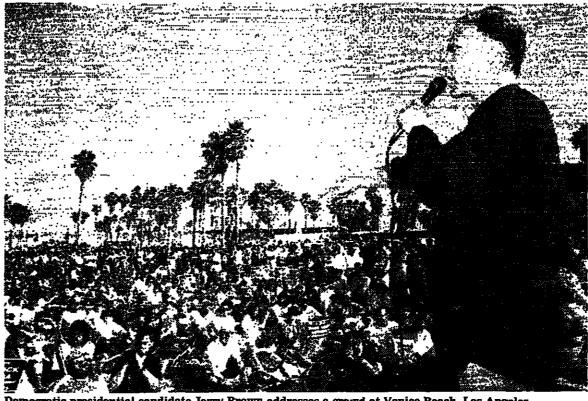

There are two obvious reasons for this state of affairs. The first is that Mr Ross Perot, the Texas businessman set to run as an independent, is on none of the ballots and his growing legion of supporters will have difficulty registering their preference by writing in his name or voting for uncommitted slates of delegates.

The second is that President George Bush and Arkansas Governor Bill Clinton are assured of the Republican and Democratic parties' nominations respectively. Mr Bush has been over the top in the delegate count for a month, and it is inconceivable that Mr Clinton will not get the roughly 150 more delegates he needs out of the 700 to be awarded today.

There is interest, of course, in the contest in California between Mr Clinton and Mr Jerry Brown, the former California governor. While his campaign briefly flourished in the spring Mr Brown was the favourite out west. but most local polls now give Mr Clinton the edge, although not by much.

The polls also report that Mr Perot would carry California easily if the presidential election were held now. Although write-in votes for him in California today will not be counted because he is not a certified candidate, his supporters could send their message by voting for Mr Brown in the Democratic race or the conservative political commentator Pat Buchanan in the Republican contest.

A loss for Mr Clinton would not be fatal, but it would not help at a time

Democratic presidential candidate Jerry Brown addresses a crowd at Venice Beach, Los Angeles

beard. Both Mr Jimmy Carter in 1976 and 1980 and Mr Walter Mondale in 1984 lost the California primary - to Mr Brown, Mr Edward Kennedy and Mr Gary Hart in turn - but went on to win the nomination. Mr Clinton must hope that the first of these precedents, in which Mr Carter went on to the presidency, and not the last two, holds good.

Mr Bush's big concern is that his popularity in California, a Republican stronghold in recent presidential elections, has slipped so alarmingly. The state's lagging economy is obviously a factor, an issue he sought to address in his weekend campaign swing.

Fewer pitfalls appear to await the two party frontrunners in Ohio and New Jersey, where neither Mr Bush

nor Mr Clinton has appeared much the same goes for Mr Brown and Mr Buchanan. This is an unusual circumstance for both states, especially

Outside the presidential arena most interest centres on the two California races for the US Senate - one for the remaining two years of the term vacated by Republican Pete Wilson when he became the state's governor and the other for the full six-year term to succeed Democratic Alan Cranston, who is retiring.

There is a good chance that two women will win the Democratic primaries. Mrs Dianne Feinstein, the former mayor of San Francisco who ran Mr Wilson close in the 1990 governor's contest, is the favourite today - as

she is to defeat in November Mr John Seymour, the Republican who was appointed to replace Mr Wilson.

Ms Barbara Boxer, the feminist congresswoman, faces a tougher contest against Lieutenant Governor Leo McCarthy, the establishment moderate insider, and Congressman Mel Levine, the Los Angeles liberal whose campaign has taken on a sharp lawand-order theme after the city's riots. Success for Mrs Feinstein and Ms Boxer would be seen as confirming the growth of women's political

The congressional candidacy of Ms Jane Harman in the Los Angeles suburbs is being watched for the same reason. Should she win the Democratic primary, she might find herself

Reagan, the former president's daughter and favourite for the Republican nomination in the district.

Republican Senate fights in California once again pit southern archconservatives against northern moderates. Mr Seymour will probably beat Mr William Dannemayer, one of the most reactionary members of Congress, but the contest between Congressman Tom Campbell and Mr Bruce Herschensohn, an outspoken Los Angeles TV commentator, is

In both races abortion has become a dominant issue. Victories for Mr Sey mour and Mr Campbell, both, like Governor Wilson, in favour of choice in reproductive matters, might suggest that Mr Bush's determination to keep the Republicans on an anti-abortion tack is out of tune with majority opinion in his party.

Typically, California also had a fistful of referenda on issues which may have wider ramifications. Perhaps the most controversial is the "Buy Amer ica" initiative on the Los Angeles ballot, which would amend the city charter to give procurement preference to

Its opponents believe this would deter the foreign investment sought by Mr Peter Ueberroth, who is in charge of reconstruction for riot-ray says the amendment will pass.

Elsewhere in the country most interest focuses on the performance of incumbent members of congress, increasingly seen as an endangered species. Typical is the Ohio case of Ms Rose Mary Oakar, whose bid for a ninth term is clouded by the fact that she overdrew her account on the House of Representatives bank more than 200 times.

But nothing in the internal political woodwork of the six states voting today can disguise the fact that, for the moment, the minds of the voters are looking ahead to November and into a political fog more impenetrable than anything which regularly descends on San Francisco.

Colombia gives asylum to Peru's

By Sally Bowen in Lima and agencies

THE Colombian government said yesterday that it had granted political asylum to the Alan García, who had taken refuge in its ambassador's residence in Lima.

Mr García, president from 1985 to 1990, has been a fugitive since Peruvian President Alberto Fujimori dissolved Congress and suspended the judiciary on April 5.

Mr Garcia's party, the American Popular Revolutionary Alliance (Apra), said it had instructed him to leave the country because his life was in danger. He entered the Colombian embassy on Sunday evening. Last week Mr García made a surprise appearance in one of Lima's shanty towns and was being seen as the main focus of opposition to Mr Fujimori. Colombian radio said Mr García was to be flown to Colombia last night in a private plane.

• Amnesty International, the

human rights group, said yesterday that human rights violations had continued in Peru since President Fujimori took power nearly two years ago, writes Stephen Fidler, Latin America Editor. It expre concern about "widespread 'disappearances' and extra-ju-dicial executions by the secu-

Canada's unity talks resuming

CANADIAN federal and provincial officials will spend the next week seeking to break an impasse in protracted national unity talks aimed at forestalling the separatist movement in Quebec, writes Bernard Simon in Toronto Talks broke off at the week-

end with deep rifts among the nine English-speaking provinces. Failure to break the deadlock soon may leave Mr Brian Mulroney, prime minis-ter, with little choice but to call a national referendum.

Ottawa is keen to present a package of reforms before October when Quebec is scheduled to hold a referendum.

Mexico retires over \$7bn debt

THE Mexican government has cancelled \$7.17bn (£4bn) of its foreign debt thanks to successful operations in the secondary debt market in the 2% years since it reached a debt agreement with its creditors in 1990, said Mr Pedro Aspe, finance minister, writes Damian Fraser in Mexico City.

Debt has fallen from \$80bn on March 31 this year to about \$73bn, saving some \$400m a year in interest payments.

Dinkins makes a strong sales pitch ex-president for the Big Apple

By Ken Warn

IT MUST be a tough job making a sales pitch for the many have expanded and put city that attracts the worst more money in - FIT is an press coverage in the world, iniquity teetering on the brink of social disintegration.

But Mr David Dinkins, New York City's soft-spoken and mild-mannered mayor, musters all the enthusiasm he can. "I like to try to sell New York 24 hours a day, seven days a week. I'm constantly selling New York. We want to tell European businesses: If your thoughts are for expansion in the US you could not do better than New York City. It's the

gateway to America. Mr Dinkins was in London yesterday as part of a joint effort by the New York City Partnership and the Chamber of Commerce to promote the city as a US base for foreign companies.

The delegation, which moves on to Paris, Frankfurt and Hamburg later this week, was due to see a range of UK businesses, particularly design, retail, financial services, communication and entertainment companies. The visit includes meetings with the London Chamber of Commerce and the Design Council.

"We don't expect to go home with a bundle of contracts." Mr Dinkins told the Financial Times yesterday. "But we believe this an excellent opporfunity to convey what a good place New York is to do busi-

Setting aside his sales patter, Mr Dinkins is frank about the reasons for his push to heighten international interest. "During New York's financial problems in the late 1980s we realised we had to find ways to expand our tax base. We believe that small businesses

those with 100 or fewer employees - and international involvement provided the way ahead. So this philosophy is not new."

At the same time Mr Dinkins denies that New York is suffering a loss of US corporations to

sites. "It's true that some have left, but it's also true that

pretty well." New York is particularly keen to hang on to Morgan Stanley, the Wall Street investment house which has been pondering a move to Connecticut. Mr Barry Sullivan, deputy

excellent example. A lot of

going, but we think we net out

mayor for finance and economic development, was in talks with Morgan until just

before he left for Europe. We have put an attractive package on the table which we are just finalising," Mr Sullivan says. "I feel pretty good about what the result will be - but it is not decided as we

New York's communications, its status as an international city, tax incentive programmes and declining office rents form the basis of the mayor's appeal to European business.

Far East

Mr Sullivan is also eager to dispel New York's image as a city mired in financial crisis. "For three successive years New York has produced budgets on time that are balanced or even in surplus. We work very hard on our fiscal health," he says. Both men believe New York's 10-year \$47bn (£26.1bn) capital expenditure programme will go a long way to addressing some concerns over the city's ageing infrastructure

that might deter investors. None the less, Mr Dinkins recognises that selling New York is an uphill struggle in the face of almost ceaseless negative coverage, particularly of its ethnic tensions.

Rockwell fined \$18.5m in nuclear waste disposal case

A US judge yesterday fined Rockwell International \$18.5m (£10.2m) for violating environmental laws at a nuclear weapons plant it once operated, Reuter reports from Denver.

It is the largest fine in the US for hazardous waste violations and the second largest under environmental laws. after the \$125m fine and restitution resulting from the Exxon Valdez oil spill in 1989. Rockwell had pleaded guilty

to violations at its Rocky Flats

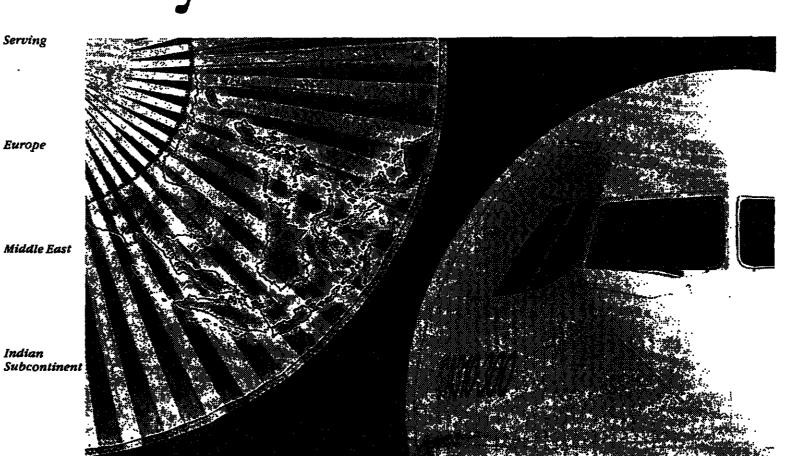

plant, near Denver. Judge

Sherman Finesilver noted that the fine was the maximum allowed. Three environmental groups told the court last week that closed records of a fouryear investigation, which led to the charges, would reveal public officials also violated environmental laws. The company admitted illegal treatment and storage of hazardous wastes and the illegal disposal of contaminated water. Prosecutors said the Energy

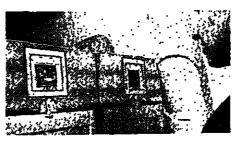

Department, which owns the

plant, shared the blame.

Fly Emirates.

THE FAR EAST HAS NEVER SEEMED NEARER.

Since we first spread our wings in 1985, besides acquiring some 30 coveted travel awards, we have also built a very comprehensive network throughout the Far East.

So now, if you travel to Hong Kong, Singapore. Bangkok, Manila and even Jakarta, you can do so

in the manner to which you have become accustomed.

Because our first priority will always be to provide the best service of any airline on any route we operate, and it shows.

In First Class or Business, our award winning, six course meal will be accompanied by an equally impressive list of fine wines.

In Economy you'll enjoy a five course meal on china with a choice of main course (vegetarian and special diets are available, on request, at

time of booking) and a full range of complimentary drinks.

During your flight, we think you'll enjoy the individual multi-channel video systems provided for every passenger on board. Which, come to think of it, is another 'first' for Emirates.

So, whichever part of the East you're heading for, with Emirates it will seem just that little bit nearer.

For Reservations, contact your travel agent or Emirates on 071 930 3711 or Manchester on 061 437 9007.

Refining the shape of air travel.

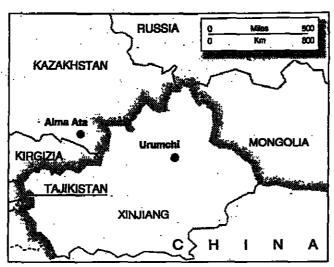

Beijing's greatest fear is a rising tide of economic and ethnic turmoil in the emerging states, writes Lilian Craig Harris

FTER a 50-year break, the "Great Game" has recommenced in Central Asia. The players have changed but, as in in the 19th and early 20th centuries, ethnic separatism and regional security are the issues. Now, as then, Islam provides the focus for political aspirations, and China, a weak player during the era of British and Russian colonial domination, has emerged as potentially the most formidable Central Asian

The People's Republic of China is an empire, as any visitor to Xinjiang can readily observe. China's vast north-west province abuts both Mongolia and three of the five new Central Asian republics, while Chinese citizens of Uighur, Kazakh, Uzbek and Tadjik "nationality" live uneasily under Han Chinese control. Most members of the 12 main ethnic groups living in Xinjiang are Moslems who look to Turkey and the Middle East

as their spiritual home, not to China, whose control over them has always been tenuous. But Xinjiang is enormously valuable to China as a buffer against what it fears is a rising

tide of Middle Eastern and Central Asian turmoil. Moreover, the agricultural and mineral resources of the region are critical to China's economic development. Six million Han Chinese immigrants, most of whom arrived after 1949, and vast petroleum resources ensure that no Chinese government could consider relinquishing Xinjiang. Chinese officials, political analysts and religious authorities are reluctant to speak about ethnic unrest in Xinjiang or the influence of Central Asia on China's minorities. But nationalist sentiment has been reinforced by independence in Central Asia. as well as by China's "open door" economic policy which, since 1978, has brought increased contacts with the Middle East.

em garb.

in Xinjiang and the frequent anti-Han "incidents" provide a

constant reminder that China

faces a growing and long-range

problem. Several persons died when a bomb expioded on a

bus in February. Further anti-

China is deeply anxious about Turkish ambitions among Turkic ethnic groups in Central Asia and about Iranian and Pakistani stimulation for Islamic fundamentalist sentiments. For the Chinese government, "spiritual pollution"

Xinjiang in early March. The mood is sullen, fuelled not only by Han Chinese political ascendancy but by Han assertions of cultural superiority. For now, Beiling is basing its hopes for stability on economic incentives. Living standards

are rising in urban Xinjiang and home use of a larger percentage of the profit from the regions's resources is at least being discussed. China has recognised all five of the new Central Asian republics and is building economic ties with them. But Beijing fears that the Central Asian states may not be economically viable and that present secular governments will not remain long in

However, Beijing officials discount fears of Chinese military intervention in the event of serious unrest in Central Asia. How would China react in the face of a flood of economic refugees or crossborder

Han demonstrations were incidents? Beifing officials say reported in several parts of that refugees would not be allowed in, and that China "will never interfere in Central Asia, even if asked by Central Asian governments". Nearly 20,000km of frontier

with Middle Eastern and Central Asian states and overlapping ethnic and tribal ties suggest that it will be difficult for China to avoid deeper involvement. But at the same time there is little doubt China would prefer a passive political and military role, one which does not undermine its self identification as a champion of the developing world.

There are signs, nonetheless, that China's West Asia policy is in transition. Despite its suspicions or perhaps because of them, Beijing is reaffirming economic and military links with Iran and Pakistan in what could emerge as a quasi-alliance with the Middle East's northern tier. In January, moreover, China formalised relations with Israel, a state

with long if frequently clandes tine ties to Pakistan and Iran The present plethora of Israeli delegations to China and contacts with the Central Asia republics underscore Israeli interest in inserting itself into the equation.

Should Central Asia collapse under the pressure of economic problems and religious aspirations, the impact on China, the Middle East and even on Europe through Turkey would The strongest power in Cen

tral Asia has always filled the vacuum. China, which is already more active economically in the region, may find itself drawn into a broader political, perhaps even military, role.

This is not something west ern governments or those of surrounding states would view with equanimity. The author, recently in Xin-

jiang, has just completed a book on China's relations with the Middle East.

Business in **Thailand** urges new elections

By Victor Mailet in Bangkok

THAILAND'S private sector called yesterday for the dissolution of parliament and new elections in an attempt to break a political deadlock following the killing last month of at least 48 pro-democracy demonstrators.

The Federation of Thai Industries, the Board of Trade of Thailand and the Thai Bankers' Association made their appeal after a meeting yester-day to discuss the political cri-sis. The three groups acknowledged that the country's image had been tarnished by the clashes between soldiers and demonstrators but expressed confidence in the future of the Thai economy.

Elections were held in March this year, a year after Gen Suchinda Kraprayoon, the then armed forces chief, overthrew the previous elected government on the grounds that it

was excessively corrupt.
Five pro-military parties formed a government and eventually chose Gen Suchinda as prime minister, outraging liberals who took to the streets to demand a reformed constitution and an end to military influence in politics.

Gen Suchinda was forced to resign, leaving the five discredited coalition parties casting around for a replacement. In their statement yesterday, the three private sector organisations said they wanted an interim government followed by new elections because the present situation did not favour the formation of "a permanent government that is of good quality, stable and acceptable to the public at large".

Last night Mr Arthit Urairat, the president of the Thai parliament, said he was postponing the search for a new prime minister until after the constitutional amendments demanded by the opposition had passed their final reading in parliament on June 10.

arising from the violence is the fate of an amnesty decreed by Gen Suchinda shortly before he quit. Opposition groups have challenged the amnesty and referred it to the Constitutional Tribunal because it covers military officers who ordered the killing as well as demonstrators.

Korean banks impose curbs on Hyundai

THREE BANKS yesterday announced credit controls on the Hyundai consignerate for funnelling what they called illegal loans to its founder, presidential candidate Chung Ju-yung, AP reports from

Hyundai's main lenders imposed the restrictions on 13 Hyundai subsidiaries because of their failure to call in loans provided to Chung and his family. The banks said the loans were illegal because they

were not for business purposes.

Among the 13 subsidiaries are the group's flagship, Hyundai Motor, along with Hyundai Heavy Industries and Hyundai Engineering and Construction.

Korea Exchange Bank, the main creditor of the three, said that the subsidiaries defied the banks' order to call in \$23.5m (£13m) in loans to Chung and his family by the end of last month. It said they would be denied the same amount in new loans or the renewal of old loans. Bank approval for investments in new projects or real estate purchases would also be suspended

> taxes. The government has contended that Chung and his family misused bank loans and traded stocks illegally to funnel funds into his party. Chung, however, claims he has severed ties with Hyundai and all his political funds come from his personal assets, estimated at more than \$3bn.

Last month, Chung was nominated as his party's candidate for presidential elections at the end of this year.

Germany breaks link of pollutants and growth

By Christopher Parkes

DRAMATIC reductions in pollutant emissions in many demonstrate clearly that "consist-

ent policies can break the link between economic growth and environmental damage", Mr Klaus Töpfer, environment minister said yesterday.

As delegations converged on Rio de Janeiro for the start tomorrow of the Earth Summit, West Germany revealed that between 1970 and 1989, when its gross domestic product rose 56 per cent, emissions of sulphur dioxide, dust and carbon monoxide had fallen 73 per cent, 75 per cent and 43 per

Despite the inclusion of the former East Germany in the latest reckonings, output of carbon dioxide had continued to fall: from 1.064m tonnes in 1987 to 997m tonnes in 1990 and 980m tonnes in 1991, the minis-

Speaking at the launch of the first environmental audit of united Germany, Mr Töpfer east to the prompt closure of outdated factories

However, he said, there was still room for improvement. Increasing road traffic had led to a 12.5 per cent increase in emissions of oxides of nitrogen (NOx). Difficulties were emerging as more east Germans bought cars and as improved roads in the east prompted industry to switch from rail and river transport to lorries.

Backed by Mr Heinrich von Lersner, president of the federal environment office, he proposed stricter monitoring of lorry speeds on German roads. Heavy fuel consumption in trucks was tending to cancel out advantages won by install-ing "scrubbers" on power stations and catalysers on cars.

Family cars were also still using too much petrol - an average of more than 10 litres per 100km - and Mr Topfer called on manufacturers to reduce this to around 6 litres by 2005. He refused to comment on proposals that vehicle fuel consumption and pollution could be greatly reduced by imposing a motorway speed

limit of 130kmph. However, while the sulphur dioxide content of the air in

attributed improvements in the the heavily-industrialised Ruhr region in the west had fallen from 250 micrograms per cubic metre to less than 50 in the past 20 years, in Leipzig, in the east, it was still as bad as in the Ruhr 30 years ago, he said. East Germany's obsolescent chemicals industry, one of the largest employers in the region, has been granted more than DM600m (£204m) by the Treuhand agency as part of a DM2bn programme this year to clean up the massively-polluted production sites, writes Leslie Colitt in Berlin. The Treuhand hopes the invest-ments of DM338m in the Buna company and DM293m in the Leuna company will improve

chances of attracting wary western investors. Mr Franz Wauschkuhn, an agency spokesman, said the money would be used to clean up environmental damage caused by the previous use of brown coal as a feedstock, as well as for water purification and repairs to machinery.

A French-German consortium of Elf Acquitaine and Thyssen Handelsunion is to build a refinery at the Leuna site near Leipzig, but no investors have been found for its chemicals production.

Japan to lend \$300m to Brazil

By Christina Lamb in Ric de Janeiro

THE JAPANESE Exim Bank yesterday signed a protocol for \$300m (£167m) in loans to Brazil - its first lending to Brazil in more than seven years.

The first loan for \$50m will be for the control of industrial pollution in a co-financing agreement with the World

NEWS IN BRIEF

Bank. A further \$250m will be destined to financing private sector companies with the object of promoting exports from a co-financing project with the Inter-American Devel-

opment Bank. Mr Denot Medelros, head of the international division of the Brazilian economy ministry, said: "This is a firm signal that Brazil has really re-en-

tered the international financial community." He said it was particularly symbolic that the protocol was came on the

value of more than \$1bn.

eve of the Earth Summit. Mr Medeiros said that the Brazilian government was

negotiating a further 10 projects with the Exim Bank for signing over the next 18 months with an additional

Aid pledges grow for southern Africa

HUNDREDS of millions of dollars have been pledged to alleviate southern Africa's drought, relief officials said yesterday, Reuter

reports from Geneva.

The menace of widespread suffering and death which hange over southern Africa is no abstract issue, no idle concept," the United Nations under-secretary for humanitarian affairs, Mr Jan Eliasson, told the opening session of a two-day aid conference. The UN and southern African nations, excluding South Africa organised the conference to gather responses to a joint appeal they made last week for \$835m (£464m) for one of the region's

Pledges announced yesterday were difficult to sort out since some of the figures included already scheduled aid, but it appeared more than half the appeal had been met. The US announced it was giving \$382m in drought relief on top of normal development assistance of about \$275m. The European Community announced it was giving \$276m in food aid, about half of which was in addition to normal aid

Manila to speed poll count

The Philippines authorities yesterday agreed to speed up the lengthy vote counting in the presidential election, Reuter reports from Manila. Since beginning the official vote count last Thursday, the legislature has tabulated results from only 12 of the country's 73 provinces and from only one of 21 cities. An estimated 25m people voted in the election.

"We're getting to be very impatient," said Mr Raul Goco. lawyer for former defence secretary and self-declared winner, Mr Fidel Ramos. Anti-corruption crusader, Mrs Miriam Santiago leads in the official count with 445,767 votes followed by a business tycoon, Mr Eduardo Cojuangco, with 401,932. Mr Ramos is in third place with 330,251 votes.

Moi blames west for low growth

Kenyan President Daniel arap Moi yesterday blamed western governments, who have suspended aid, and donors pressing for economic and political change, for his country's dismal economic performance, Reuter reports from Nairobi. Donors suspended aid to Kenya for six months in November, saying it would be reviewed after they were satisfied that economic and political

were taking place. The government's annual economic survey last week said growth of real Gross Domestic Product adjusted for inflation slowed to 2.2 per cent from 4.3 per cent in 1990 and from 5 per

Iraq condemns UN border proposals

By Roger Matthews, Middle East Editor

IRAQ WARNED yesterday that UN proposals for a new border with Kuwait would "create a permanent nucleus for tension" in the region.

Mr Ahmed Hussein al-Samarael, the Iraqi foreign minister, said yesterday in a letter to Mr Boutros Boutros Ghali, the UN secretary-general, that "the decisions taken by the Iraq-Kuwait border demarcation commission are illegitimate and constitute a dangerous precedent in the history of the international organisation".

The findings by the commission, which have yet to be ratified by the Security

Council, recommend returning to Kuwait

during the past 20 years built a naval base. Three jetties used by the Iraqi navy would revert to Kuwait but the deep-water commercial port will remain in Iraqi hands. In addition, the UN commission has re-

commended that a strip of territory in the Rumailah oilfield containing several producing wells should be given back to Kuwait. Iraq accused Kuwait of illegally taking oil from the field shortly before its invasion in August 1990. At both Umm Qasr and Rumailah the

UN commission found that Iraq had since 1963 encroached on what was Kuwaiti territory. Had Kuwait chosen to press its case more strongly for a further portion of the

the land at Umm Qasr on which Iraq has Umm Qasr port it is likely that the commission would have found in its favour. Iraq's limited access to the sea has been a cause of repeated conflict with its neighbours. In September 1980 it abrogated the 1975 Algiers agreement with Iran on the ioint use of the Shatt al-Arab waterway just before launching its eight-year war

with Tehran. Irao's warning to the UN vesterday indicates how the commission's findings on the border with Kuwait will be used by President Saddam Hussein as a nationalist rallying point and as a further example of his contention that his country's troubles are primarily the responsibility of the

De Klerk visit to Russia puts end to decades of antipathy

By John Llayd in Mascow

MR FW de Klerk yesterday used the first state visit of a South African president to Russia since the war to declare that " we have turned our back on apartheid and will not

return to it". He denied that the stalemate in talks on reform of the South African constitution was because "the whites are demanding a constitutional veto". He said that the search for a new constitutional basis for the republic was "to create through negotiation not a win-lose situation, but a win-win situation".

The South African president's visit officially ended decades of polemics between the Soviet Union and South Africa, during which Moscow supported the South African Communist party with large cash injections and - accord-

ing to documents published over the weekend by the daily Izvestia - prompted it to attempt an armed uprising in

the 1930s. Mr de Klerk said that he had come to Russia "because communism is dead - I would not have come before that and would not have been welcome before that".
In spite of this perception,

his visit has been criticised by pro-Communist deputies in the Russian parliament - while the African National Congress has also criticised his trip, and said it would oppose a visit by Mr Boris Yeltsin, the Russian president, and any other foreign leader while the apartheid system still oper-

South Africa restored diplomatic relations with Russia in February. Mr de Klerk announced a "modest" credit line of R100m (£19.4m) to assist

trade between the two coun-Russia and South Africa, as the world's two main gold and

diamond producers, have a strong mutual interest in their price levels. The president denied, however, any intention of pursuing a cartel in either, referring journalists to Mr Harry Oppenheimer, the former chairman of Anglo American Corporation, the large South African mining

communique stressing the need to ensure democratic elections in Namibia and to reach a ceasefire in Mozambique. Mr de Klerk said that he envisaged South Africa becoming the "hub" of an economic union of 11 to 12 Southern African states, including Namibia and Mozambique, with "excit-

credit card purchases totalled an estimated Y65,600bn, (£280bn) three times higher than 10 years ago. Credit card companies have yet to reach agreement with the government on methods of implementing stricter checks on credit information.

The two presidents signed a in May for the 13th month in succession, compounding fears that the end of the recession is not yet in sight for the hardpressed Japanese motor industry, Stefan Wagstyl writes. Sales dropped 12.3 per cent from a year before, the biggest decline since 1984.

The decline was particularly severe for small passenger ing prospects" for economic cars, for which sales fell 19.5 per cent

Multinationals' cross-border trade surges

By David Dodwell, World Trade Editor

FOREIGN direct investment and cross-border trade within multinationals have surged in the past decade, transforming the shape of international trade and leading to "global integration of manufacturing", a World Bank report says.

International trade inside the world's largest 350 multinational companies accounts for almost 40 per cent of world merchandise trade, which in 1990 amounted to \$3,485bn (£1,936bn), the bank says in its 1992 report on Global Eco-nomic Prospects and the Developing Countries. More than a third of US trade in 1990, which amounted to \$887.2bn, was between US companies and their overseas affiliates. A quarter of the purchases of Japanese companies is from affiliates based in east Asia, while one-third of the affiliates purchases is from parent com-

panies in Japan. The report reveals that in the early 1980s, almost half Singapore's exports was by USowned companies; over half Malaysia's exports to the US

was from affiliates of US companies. Taiwan's five top electronics exporters are USowned "However, the pace of global integration in manufac-

protectionism." Underpinning this integration has been an unprecedented rise in foreign direct investment. After "unremarkable" growth up to 1982, foreign investment grew five-fold to average over \$125bn a year between 1985 and 1989. The EC accounted for 47 per cent of this. The EC, US and Japan together accounted for 80 per cent. Among non-OECD investors, Singapore, Hong Kong, Taiwan and China "played an increasingly important role" in the late 1980s.

turing production appears to

be slowing partly as a result of

Comparatively few countries have benefited from these investment flows, the bank shows. High-income countries benefited most, winning almost 80 per cent of the total. Of the \$24bn going to developing countries in 1989, five states took 80 per cent: China (24 per cent), Brazil (18 per cent), Mexico (17 per cent), Egypt and Malaysia (10 per cent each).

French share in railway order for **Bratislava**

BRATISLAVA, capital of the Slovak republic, has awarded a FFr3bn (£300m) contract to a consortium of two French companies and local partners to build a driverless commuter railway for the city, William Dawkins reports from Paris.

Matra, the French transport and defence electronics group, will supply its Véhicule Automatic Léger (Val) system, first installed in Lille in 1983. Val has since been sold to Paris. for a link opened last year between Orly airport and the nearest regional rail station. A Val line is in use in Jacksonville, Florida, with others being built in Toulouse, Chicago and Taipei. Work on the Bratislava line

starts at the end of this year and will be handled by a Franco-Slovak group led by Campenon Bernard, the French engineering company. Some 300 Slovak contractors will perform some 40 per cent of the work, including building and power supply.

The 7.5km line, the first French infrastructure project in eastern Europe, will run under the Danube to link the two halves of the city, carry-

Cartels prove a hard nut for Japan to crack

Anti-monopoly body meets its match in construction sector, Robert Thomson reports

HEN the investiga-Trade Commission (FTC) raided Japan's leading construction companies last year, there was a collective disbelief that the commission would dare to dismantle the cosy relationships in the country's most politically-influential industry.

But, a week ago, when the commission decided not to prosecute 66 construction companies for the self-confessed rigging of blds and fixing of contracts, there were knowing nods that the anti-monopoly body had finally met its match. It seemed the ruling Liberal Democratic Party (LDP) had drawn a political line which the investigators cannot cross. Apart from bruising the

FTC's reputation, the case aroused interest in Washington, which has negotiated a pact providing better access for foreign contractors in Japan's construction market. The US is especially interested in dango, or cartels, which it believes are rife in the construction industry and common in corporate Japan. In this dango, the 66 contractors routinely rigged blds for government projects worth Y81bn (£346.15m) in Saitama Prefecture, part of Greater Tokyo. They agreed among themselves which company

would win a particular contract, then ensured all bidders were above the cost estimate

submitted by that company. While government officials argue such cases are a rarity, the construction companies have publicly supported the concept of arguing it provides stability and enables smaller companies to compete. For fear of trade friction, these opinions are now kept private, but they are deeply felt. The US had a close-up view of the workings of dango, when it was found that 145 construction and related companies had rigged bids for 178 projects at a naval base near Tokyo in the late 1980s. Just over 100 of those companies have agreed to pay a total of Y4.7bn in compensation to the US government.

In the present case, the punishment has been little more than a wrist-slap. The FTC has issued a "cease and desist" order, and last week, representatives of the 66 companies appeared before the Ministry of Construction, which said 63 would be forbidden from bidding for select government projects for a month and three others for two months. The ministry is commonly per-ceived to represent the inter-ests of the industry, and the post of construction minister is sought after by LDP parliamen-

tarians, who rely heavily on funds. The LDP has a construction "tribe" of politicians, many of them from the party's largest faction, who ensure a steady flow of lucrative projects in their own electorates. Later this week, the ministry is likely to issue a formal

instruction to the companies on the lines of the FTC's "cease and desist" order. But an official admitted the month's suspension of bidding would have little impact on the companies concerned. "We are

June generally has few big projects. If we had to impose this penalty during July or August, it would have been a disaster, he said. The LDP argues that tougher penalties imposed on the construction dango, or a long court case, would have damaged the expected recovery of the economy. Although the 66 included most of the industry leaders, including Taisei, Kajima and Kumagai Gumi,

other contractors and, perhaps,

a few foreign companies might

have wanted the work.

Both Kajima and Taisei expressed "regret" for having been involved in bid-rigging, saying they would "strengthen their management systems" to ensure it does not happen again. The implication of the apologies is that this bout of "dango" was an exception and not the norm, as Washington suspects. FTC officials are disappointed that the failure to prosecute has been generally interpreted as the commission buckling under political pressure. The commission, which has drawn praise from Washington for its extra vigilance in the past two years, argues that the Japanese legal system made a criminal prosecution

pressu

virtually impossible.
"Under Japanese criminal prosecute an individual, not a company; it was felt we would not win in this case. It's hard to win," an FTC official said. Criminal charges, the first in 17 years, were filed in November against eight plastic wranping makers controlling 97 per cent of the market, whose executives admitted they regularly held meetings to discuss market trends and plan price increases. The FTC official insisted further prosecutions would ensue, and the commission's interest in the construction "dango" has not waned.

Eurofer concerned at steel from E Europe

By David Buchan in Brussels

EUROFER, the European group of steel producers, yes-terday told the European Commission it was worried about rising steel imports from eastern Europe, particularly Czechoslovakia

Czechoslovak steel shipments rose 126 per cent in the first third of this year, against the same period of 1991, a Eurofer official claimed. Eurofer yesterday discussed with Mr Frans Andriessen, EC external affairs commissioner, the lack of a new Gatt steel code which has prompted two US complaints of dumping against EC exporters.

The Commission says it will try to use the conciliation mechanism of the EC's new association agreement with Czechoslovakia before launching any investigation. Earlier this month, Czechoslovakia all EC quotas and virtually all tariffs on March 1 had led to a surge in its steel exports, and promised to try to re-target these away from Germany, Italy and Greece, which had

taken most of the impact. Czechoslovak diplomats in Brussels say they have been trying to persuade companies to use tariff cuts to increase their profit margin, rather than sell at lower prices and increase market share. The Czech steel issue is one of many tensions likely to arise in the wake of the EC's new

EC External Relations Commissioner Frans Andries sen urged Seoul yesterday to stamp out discriminatory taxes on imported liquor, Reu-ter reports from Brussels. "We are unhappy about the matter and would like to see this corrected," his spokesman said Mr Andriessen had raised the issue with South Korea's Deputy Foreign Minister Kak-Kyu Choi, but received no guarantees the system would be changed,

Poland and Hungary. The Commission yesterday published a report on its antidumping activities in 1991. showing investigations opened during the year fell to 20 from a record 43 opened in 1990. But the rate of new investigations has picked up this year.

The EC executive maintains that, in launching these inveswhat it sees as unfair trading practices abroad, rather than protectionist pressures at home. Thus, 11 of the 33 investigations concluded last year were dropped, 19 ended in duties, and in three, foreign companies agreed to raise prices. One of the year's biggest cases ended in Japanese exporters of DRAM and EPROM computer chips being hit with a 94 per cent duty and undertaking to obey a reference price. At the time, the Commission was criticised for putting chip-users in the EC at

Western donors urged to ease aid conditions

encourage private investment in east Europe and ease transition to market-oriented democracies should relax aid conditions and streamline disbursements, says a report* on aid to central Europe by the New York and Prague-based Institute for East-West Studies.

Aid commitment figures were often misleading. This was highlighted at a recent ECsponsored conference on aid to the former Soviet Union. The EC estimated western donors

WESTERN donors seeking to several years. Credits or grants are often used to encourage companies or non-profit bodies to invest or provide services, but where recipients gain only a part of donors' spending. Except the EC's PHARE technical aid programme and UN funded programmes, credits were usually offered on commercial terms, ensuring many credit lines stay under-utilised.

It was often impossible to distinguish between components of an aid package, but in most cases the concessional element was below the 25 per cent required to qualify technically as "aid". Slow disburse-ment of foreign aid was also a function of the low absorption capacity of countries with fledgling banking and credit systems and inexperienced if fast-growing, private sectors. The report urges a more flexible approach to debt management, better aid co-ordination and more technical assistance to increase aid absorption. "Conditionality should be redefined in the light of recipient governments' commitment to political and market-oriented reforms if a deep financial crisis of a Latin American type is to be avoided."

Lamont faces **EC** pressure on tax rates

By David Marsh European Editor

MR NORMAN Lamont, the chancellor of the exchequer, yesterday came under strong pressure from the European Commission to abandon Britain's policy of refusing to accept legally binding minimum rates of value added tax throughout the EC.

The Treasury signalled that it would be prepared to face a clash with the Commission rather than give in over the issue. Mrs Christiane Scrivener, EC commissioner responsible for fiscal policy, warned that Britain would face a "hard time" unless it agreed a compromise before the end of the month.

She was speaking after talks with Mr Lamont in London called to prepare the next EC finance ministers' meeting in a week's time. Mr Lamont used the talks to reaffirm Britain's firm line not only on VAT but also on excise duties on spirits sold throughout the EC.

Underlining a toughening of months-long sparring over indirect taxation, Mrs Scrivener hinted that Britain might put into jeopardy its hard-won right to maintain zero VAT on a range of everyday goods.

dicted Mrs Scrivener's implicit ous."

takes over the Community

Britain has agreed Commission plans for a Communitywide minimum VAT level of 15 per cent to come into effect with the establishment of the single market. But the UK has refused to enshrine the measure in a legally binding EC directive.

University gains more control over top business school

By fan Hamilton Fazey, Northern Correspondent

PROFESSOR Tom Cannon resigned yesterday as director of Manchester Business School, clearing the way for controversial plans by Manchester University to change the structure of management research and education in the city.

caused 14 private sector representatives to resign from the school's council a demand a government inquiry, but with Prof Cannon no longer available to lead the fight for greater autonomy from the university the demand is

unlikely to be met. Prof Cannon and the university agreed a statement to defuse the blow to the university's prestige caused by the high-level resignations - led by Sir Dennis Landau, chief executive of the Co-operative Wholesale Society, and several

leading business figures. The university plans to federate the management education and research activities of the business school, the University of Manchester Institute of Science and Technology

exemption might be at risk. Britain's zero VAT rates were guaranteed under the EC's 6th VAT directive, which could only be changed by unanimous decision of finance ministers, the Treasury said.

The VAT tussle goes to the heart of Britain's desire to maintain maximum fiscal policy freedom in spite of growing economic integration with the rest of the Community. Mrs Scrivener said she was none the less hopeful that a solution could be found before Britain

presidency in a month's time.

At yesterday's meeting with Mrs Scrivener, Mr Lamont repeated that Britain's opposition to this point was a question of "principle". Britain's VAT rate of 17.5 per cent is above the planned 15 per cent minimum. In a remark which seems to reflect the feelings above all of the Luxembourg and Belgian governments, she The Treasury flatly contra- said, "Some people are furi-

department of accounting. The ordinance will in effect remove what autonomy the business school has and abolish its may eventually fail," he said. council.

The school says the university does not understand the relationship needed between public and private sectors in management education. The ducation in the city.

The plans have already statement that its relations with the school have been problematic for many years. It

> the university says he doubled the size of the school, attracted record numbers of postgraduate students, improved the quality if its research, enhanced its academic reputation, and achieved two years of record profits.

Bank issues warning on overseas merger bids

By Robert Peston in Toronto

THE BANK OF England vesterday issued a warning on the dangers of buying overseas banks and the problems involved in developing pan-European operations.

The management and cultural impediments of adopting either of these strategies 'appear...to be overly daunting", according to Mr Brian Quinn, the Bank director in charge of supervision. He was speaking to the chairmen of the world's biggest banks at the International Monetary Conference in Toronto.

This year's IMC chairman is Mr William Purves, chairman of Hongkong and Shanghai Banking Corporation, the Far East bank which is trying to buy Midland Bank of the UK.

Mr Quinn said cross-border deals similar to the one proposed by Hongkong Bank would remain few and far between. He also said it was unlikely that we will see any pan-European retail or wholesale bank or securities company establish in the near

But Mr Quinn pointed out that banks of different nationalities are on the other hand tending to form looser alliances, which take the form of sharing businesses, or taking minority shareholdings in each other or being jointly

represented in some countries. He was, however, sceptical about the benefits of these alliances: "They appear to owe more to defensive or protective sentiments than to a clearly articulated strategy".

In a separate speech, Mr

Toyoo Gyohten, the Japanese former vice-minister of Finance for International Affairs and an adviser to the Bank of Tokyo, said the losses faced by Japanese banks should not pose a great risk to the international financial system. "Some of the small and weak [Japanese] institutions

He also said the outlook for non-bank financial institutions "which are heavily locked into property lending" is poor. But he pointed out that Japan's 21 biggest banks, which together account for 70 per cent of all lending by Japauese banks, hold between

their aggregate capital resources of 40 trillion yen. • Manchester is to offer its historic Free Trade Hall to house the European Central Bank. The hall is the home of the Halle Orchestra, which is moving to a new concert hall in the next two years.

Manchester announced its intention to bid for the bank in November. A working party of Manchester Financial and Professional Forum and the city council is preparing to raise funds for a formal bid.

Major plans to roll back Brussels 'red tape'

By Philip Stephens, Political Editor

A CAMPAIGN to roll back "unnecessary regulation" by Brussels was yesterday promised by Mr John Major as he set out his priorities for Britain's presidency of the European Community in the second half of this year.

In a speech to a business audience in Scotland the prime minister also pledged to work "unceasingly" for a wider Europe which would embrace eventually the emerging

His appearance in Scotland marked the first in a post-election series of visits north of the border designed to fulfil a pledge to make government from Westminster less "remote" from the people of Scotland.

But while reiterating his promise to "take stock" of the pressures in Scotland for more lf-government, he reaffirmed absolute opposition to legislative devolution. Attacking the "narrow

tish Nationalist Party), he warned that devolution would be a "step half-way across a chasm".

He linked Scotland's past and future prosperity to the role that Britain played in the EC. Separation would relegate Scotland from the heart of Europe to, at best, its outer fringe, depriving it of investment and influence.

Mr Major, who used a trip to central Europe last to back the claims of Poland, Czechoslovakia and Hungary for EC

membership, said that a wider Europe was vital to the peace and prosperity of Europe. "It is not an optional extra. It is essential. And I will work unceasingly for it", he said.

He insisted that the government would not be content with arguing its corner defensively in the Community but would instead set out its own vision of the future.

Britain would take as its starting point that "the cardinal principle of the Community must be the free market." It would use its presidency to

was completed and then move which the EC placed on business.

In an allusion to the principle of "subsidiarity" which the government insisted was writ-Treaty, Mr Major added: "I want to take back from Brussels decisions on issues that do not need to be taken at Community level. We have long fought interfering regulation at home; it is now time to take our campaign into Europe".

Britain in brief

Heseltine urges lower pay deals

Pay restraint was vital if Britain was to maintain its competitiveness, according to Mr Michael Heseltine, president of the board of trade.
In a speech attacking manu-

facturing wage rises for running at twice the rate of inflation, Mr Heseltine said lower pay settlements were vital if Britain was to build on the increase in competitiveness which we achieved in the

He complained that manufacturing earnings were rising by an average of 8 per cent, almost double the inflation rate. "Compared to the UK's 8 per cent, the increase in earnings in manufacturing in Germany last year was 6 per cent, in Japan 4 per cent and in the US just 3 per cent," Mr Heseltine told a London conference of business leaders.

BBC criticised by watchdog

The BBC has been criticised by the Monopolies and Mergers Commission for excessive onair promotion of its products. A MMC report sent to the Department of Trade and industry, calls for a much stricter code of practice to gov-

ern on-air promotion by the corporation. The DTI is expected to accept the recommendations of the body that investigates potential anti-competitive practices. The year-long investigation was prompted by the Sadler Report on cross-media promotion which in March 1991 accused the BBC of "blatant

Solicitors face insurance levy

distortion of competition" in

the promotion of its magazines

on television channels.

Solicitors in England and Wales face a special levy of more than £1,000 this autumn on top of their annual insurance premiums to meet a huge increase in professional fraud

The Law Society, the solicitors' governing body, is also proposing to introduce tough restrictions on the right of solicitors to practise on their own. Dishonest sole practitioners are largely responsible for the rise in payments made by the profession's compensa-tion fund from £11.7m last year to an estimated £20m this

Unit trust sales increase sharply

The election result and new tax incentives led to the highest sales of unit trusts for 12 months, according to figures released by the Unit Trust Association today.

Total sales in April were exactly fibn, while the total number of unit trust accounts held rose for the first time since June 1990. Net sales, at £252.6m, were greater than for the entire first quarter, and reached their highest level since last September.

Broker denies MCC deception

A stockbroker falsely told Goldman Sachs, the US investment hank, in October 1990 that Maxwell Communications Corporation was about to file for bankruptcy, it was alleged at Knightsbridge Crown Court.

Mr Andrew Collins QC, prosecuting, said Mr Peter Marks, a director of Branston and Gothard, had made the statement, which he had known was untrue, to try to lower the MCC share price and make money for himself on dealings in the shares. Mr Marks has pleaded not guilty to a charge under section 47 of the Financial Services Act of making a iisleading, false or deceptive statement to induce share dealing. The trial continues

Lenders prevent home evictions

Chief executives of the top ten UK mortgage lenders will today try to persuade the government that they have managed to prevent evictions of thousands of home owners unable to keep up with their mortgage payments to the absolute minimum, even though the £800m mortgage rescue scheme announced last December has so far failed to get off the ground.

The chief executives, who are meeting senior ministers, say that snags mean that the schemes have been slow to get underway but that they have been able to save tens of thousands of their customers from eviction by negotiating easier terms for them on a case by

case basis. Around 275,000 mortgage borrowers were six months or more behind their payments at the start of the year, but evictions by the year end are likely suggesting that the lenders have found ways of saving about 200,000 homeowners.

Politicians bid to restart talks

Northern Ireland's political leaders have agreed to spend another two days searching for a way to resolve a procedural row that has stalled interparty talks on the prov-

ince's political future. There was little evidence that intensive talks in a subcommittee over the past few days had made significant progress towards resolving the deadlock over the timing of the Irish government's entry into the talks. Sir Patrick Mayhew, Northern Ireland secretary, may decide to suspend the process, given the extent of differences between the two main unionist parties and the nationalist Social Democratic and Labour party. Alternatively, he may announce unilaterally when the Irish government will enter.

Power blow to gas stations

NATIONAL Grid Company, the NCC, may refuse to take power from many of the new gas-fired power stations being built in England and Waies because of fears over the design of the stations, it said yesterday.

National Grid, which owns and operates the electricity supply system, was responding to a statement from Mr Malcolm Edwards, former commercial director of British Coal. He claimed the new stations would be technically inferior to existing coal-fired stations.

However, Mr Bryan Townsend, chairman of Midlands Electricity, rejected the claim. "It's absolute rubbish," he said.

Union leader issues warning

Mr Tom Sawyer, deputy leader of the Nupe public service union and a strong influence in the labour movement, warned that unions would be unwilling to provide funds for the Labour Party if they had no say in its policy formation.

In a spirited defence of the unions' links with Labour, Mr Sawyer said: "People who fund the party must have a say. While we fund the party we will have a say. It is as crude as that."

Mr Sawyer's comments come a week after Labour's national executive committee set in motion an inquiry into the relationship with unions.

([[mist] and the university's The secret buried beyond Journey's End

Irish terrorists still harbour a lethal armoury smuggled ashore near Dublin in 1985-6, Tim Coone reports

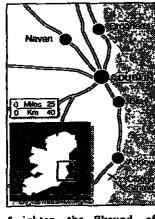

LOGGA STRAND does not appear on most tourist maps of Ireland. It is about 50 miles south of Dublin, a secluded, mile-long bay with golden sand, where oyster and mussel shells crunch underfoot at the high

No road or track reaches the beach, and only shore anglers and other people in the know are likely to turn up there. Set back from the seashore is a cluster of isolated cottages with innocuous names such as Journey's End and Shady Nook. At Clogga Strand, though, they have an intensely ironic meaning.

For it was here in 1985 and 1986 that the chief quartermasters of the Provisional Irish Republican Party (IRA) carried out one of the biggest and most successful arms smuggling operation in the IRA's history. Four shipments from Libya were unloaded in the bay and provided the IRA with an estimated 150 tons of weaponry.

To date, it is independently estimated that only between a quarter and a third of the weapons landed in the first four shipments has been captured by security forces, although the Royal Ulster Constabulary (RUC) in Northern Ireland and the Gardai police in the Republic claim the figure is closer to half.

It included automatic rifles. heavy machine guns, antiaircraft missiles, millions of rounds of ammunition and several tons of Semtex explosive. The operation was disclosed after the capture of a coastal

freighter, the Eksund, off France in 1987. A further 150 tons of weapons were aboard, also destined for Clogga

Most of the rest is believed to be stored in bunkers scattered about Ireland. It is thought that there may be as many as 4,000 AK47 automatic rifles. several hundred machine guns and well over a million rounds

of ammunition. Mr Ken Maginnis, Ulster Unionist MP, said: "I am firmly convinced that if the Special Branch [in the Republic] was given the resources it could do better job. It is underresourced and underfunded in

every respect." Early last February, days after Mr Albert Reynolds succeeded Mr Charles Haughey as Irish prime minister, the Gardai set in motion Operation Silo. Acting on intelligence reports, they uncovered a series of IRA bunkers in the southern counties of Kerry,

Limerick and Kilkenny. The dragnet has since extended to Cork, where this month the

biggest haul since 1988 was made. It uncovered 51 AK47 automatic rifles, a DShK heavy machine-gun - a type used with success against British Army helicopters in the north and 20,000 rounds of ammunition.

The succession of finds prompted one Dublin magazine to publish a cartoon showing one farmer leaning on a fence and saying to another. "That field is corn, those two are barley and the far one is semiautomatic rifles." The IRA's caches in the

of holding several tons of weapons usually concealed under a farm building, to plastic barrels containing only a few rifles or pistols buried in a field.

The biggest find, after the

Eksund capture, was in Janu-

Republic range from purpose-

built concrete bunkers capable

ary 1988, when 100 AK47s, five heavy machine guns and 50,000 rounds of ammunition were discovered hidden in sand dunes in the northern county of Donegal. All the arms finds since then in the Republic do not equal that one discovery.

Since 1987, the RUC, British Army and Cardai together have captured about 500,000 rounds of ammunition and some 350 AK47s. Detailed figures on Semtex are unavailable, but the RUC estimates that 11/2 tons has been used or recovered in the north.

Mr Maginnis said he had put down several parliamentary questions to find out how many of the weapons are still in IRA hands, but without success. "When the government wants to hide failures," he said, "it says it cannot reveal the information for security

Up to a year ago he said that

no more than a fifth of the

Libyan-supplied weapons had

been discovered. The reported finds of the security forces since then would increase that figure to no more than a quar-Mr Maginnis said: "On the present rate of discoveries,

left for the IRA to carry on until the year 2010." Shatter, the justice spokesman for the opposition Fine Gael party in the republic, said:

dispersed its weaponry, or whether there remain several large caches, under the control of just a few key IRA quarter-

even if 50 tons have been found over the past seven years, that means there is sufficient In a similar vein, Mr Alan There is concern that we are

whether the IRA has widely

only scratching the surface." There is uncertainty over IRA's present strategy.

The Gardai declined to divulge figures on the number of Special Branch detectives dedicated to anti-IRA duties, but confirmed that the job fell largely to local detective units who also have to deal with common crime and are backed up by Special Branch units only in some larger cities. Mr Maginnis would seem to have cause for complaint.

It is the Crustration with the

limited success rate against the

IRA's logistic supply lines that has convinced unionist politi-

cians in the north that the best

way of disrupting the IRA's military campaign is to use selective internment against the suspected quartermasters. Much may hinge on what Col Gadaffi, the Libyan leader, decides to do. To ease mounting international pressure against him over the Pan Am Lockerble bombing, he recently offered to co-operate with the UK authorities on disclosing his past links with the IRA. Will he be prepared to detail the shipments that got through and name the IRA

quartermasters involved?. The fact that so lew of the Libyan-supplied arms have been used has prompted the observation that either the IRA has far more weapons than people trained to use them, or the weapons themselves are not particularly suited to the

A renewed political vacuum in Ulster should the current inter-party talks end again in deadlock and the new Northern Ireland ministerial team bowing to Unionist demands is the kind of scenario in which the weapons might be brought out of their bunkers. Operation Silo has so far done little to prevent that happening.

hen Don Gooding changed the name of his west London travel agency from Budget Travel to Carlbbean Gold, business took off.

As Budget Travel, the company had appeared to be just another of the many cut-rate outlets on the high street instead of a specialised agency providing holiday packages to Barbados and the Caribbean.

"People could not reconcile paying £5,000 for a holiday through a company which called itself Budget," he says. "People just walked right past us to one of the other travel agents."

The name change was not the only element in Caribbean Gold's new image. It was just one part of a marketing review, undertaken under the government's Enterprise Initiative, which led to improved financial systems, training for the company's 10 staff and a complete

refurbishment of the agency.

But it was a significant factor in an increase in turnover from less than £3m to nearly £5m in the middle of a recession.
It also played a key role in

emphasising that the eight-year-old company specialised in a particular part of the world and that it offered a quality service.

As Gooding found out, choosing a name for your business is not a simple matter. The start-up company in particular does not always know which products or which markets will develop fastest and whether its original title will still appeal or be relevant.

Entrepreneurs sometimes name their business after their wives or their children or after the street in which they start up.

"Choosing a name can be very unscientific," says Mark Pavan, founder of MAPA, a London marketing consultancy.

"It is often very emotive. People don't research it properly and can cause themselves severe embarrassment if they choose a name which is already being used by someone

"People must think through the strategic and personal implications," warns John Murphy, chairman of Interbrand, a London consultancy which devises names. They must not choose a name which they cannot protect or which is not suitable for international

Murphy has recently been advising two service companies which have chosen lengthy titles made up of the names of their founders and

"I think it will end in tears later because some of them will leave and realise that their name is still in the business's title."

Technical names can frequently trip up the unwary. Derek Clissold

Choosing the right title for your company is no simple matter although it can make all the difference between commercial success or failure. Charles Batchelor reports

What's in a name?

Don Gooding: 'People could not reconcile paying \$5,000 for a holiday through a company called Budget'

set up in business making speciality chemicals five years ago as Chiral

Organics.
Chiral was a technical term which was readily understandable to the chemists to whom Clissold expected to sell his products but meant less to the bio-chemists who actually turned out to be his cus-

The bio-chemistry market also proved more promising so Clissold changed the name of his Readingbased company to Cascade Blochem, a reference to the cascade of effects which lead to a particular

If Chiral Organics was too specific a name, Immunology Ltd found that its name appeared too general. If

the "Ltd" was left off, there was a register a name which is considered danger that the company would become confused with the general scientific term.

So Immunology changed its name to Cantab Pharmaceuticals Research to reflect its geographical base (Cantab is abbreviated Latin for Cambridge) and its sphere of activity.

In choosing - or changing - a name, a company must first check that it is not already in use. It should carry out a search at Companies House and also check the trade marks register of the Patent Office. Trade mark protection is more effective than simple company registration, says Murphy.

A business will not be able to

offensive or illegal and nor can it make use of terms such as Royal, National, Building Society or Bank without fulfilling certain conditions or conforming to regulations governing the sector.

But even thorough research and registration do not provide absolute guarantees against difficulties. Cathy Ridley did a careful search before starting up her company relocation business under the Move Plan title six years ago. She began as a sole trader but on the advice of her patent agent registered the name with Companies House in case she ever decided to become a limited company.

After five years in business, she

discovered that another company was using the Move Plan name. A letter to this company pointing out that the name was already registered produced no result so Ridley went to court.

Earlier this year a judge issued an interim injunction ordering the other company to stop using the

But Ridley says the £15,000 of legal costs incurred and the time she spent fighting the case were a heavy burden on a businesses with just £300,000 of turnover and a full-time workforce of four.

Before deciding on a company name, the founders should decide what personality they want their business to project, advises Murphy. "You must decide whether you want your business to be thought of as being high-tech, strong and incl-sive, caring, British, Italian ... " he

Consultancies such as interbrand tend to work mainly for large companies but they do have smaller clients, says Murphy.

A typical name-creation assignment would cost between £10,000 and £19,000, he says, although the search for an international name in a crowded and difficult market such as computing might rise to £50,000-£60,000.

Company names can be chosen in four broad categories, says John Abram, joint founder of Abram. Hawkes Associates, a Haywards Heath-based marketing consul-

They can be based on the names of the founders; they can be descriptive; they can be witty, involving, for example, a play on words; or they can be anonymous, consisting of a made-up name or initials.

All four can bring problems. The founders may move on; descriptive titles may lose their relevance or become restrictive; witty titles may become tiresome; while made up names and initials can be difficult to inject with personality.

Whatever name is chosen, it cannot project an image which is not backed up by the company's performance, warns Abram. A business which is seen by its customers as old-fashioned and parochial will not persuade them it is run by international high-flyers just by changing its name.

Companies should therefore be very careful before they decide on a name change, the experts advise. "You must first think what problem you are trying to solve," says

"Often it is no more than a vague message from the chairman's office that the company name is no longer modern enough. You must have a good reason for making a change. A name change can appear superficially attractive but it can cause a lot of problems."

All change for the VAT regime

The formal creation of the European Single Market on January 1, 1993, will lead to significant changes in the way value added tax is collected on exports and imports.

VAT will no longer be collected at national borders within the community but will be applied according to what is known as the "transitional VAT regime," according to accountants BDO Binder Hamlyn in a special brief-

ing paper."
"Issue No 77. 20 Old Bailey, London EC4M 7BH. Tel 071 489

Government help is an important factor Nine out of 10 small businesses believe the government does not do enough to help them either by providing finance or advice, according to a survey of 140 companies which made use of factoring. The survey was carried out by Lombard NatWest Commercial Services, the factoring subsidiary of NatWest Bank.

Companies under a year old were more satisfied with government help than those between one and three years old, possibly reflecting the publicity given to schemes for small and start-up enterprises and a lack of assistance for better established business.

Asked to list policy initiatives which the government should take to help small firms, business owners' highest priority was for a cut in interest rates followed by legislation for the prompt payment of bills, a reduc-tion in the VAT rate and increased public spending.

New venture for Foreign & Colonial

Foreign & Colonial Ventures, the venture capital arm of the Foreign & Colonial investment management group, is to take over the management of Hill Samuel Bank's development capital portfolio following the bank's decision to concentrate

on its core merchant banking activities. The Hill Samuel portfolio is valued at under £20m.

As part of the deal, Hill Samuel will invest in F&C's latest management buy-out and development capital fund, F&C Ventures Limited Partnership II, while F&C will gain access to investment opportunities from the bank's merchant banking operations and its branch network.

Playing safe with the

bank manager How to get a better deal from their bank manager is a problem which has puzzled many small business owners in recent months. The banks' large provisions on small business lending has led many of them to take a tougher line with custo

The Director's Guide to Getting the best from your Bank* provides no magic formula, opting instead to repeat the commonsense advice that bank managers hate surprises and that keeping your bank manager informed is the best policy.

The most valuable section of this booklet, published jointly by the Institute of Directors and NatWest Bank, describe the additional services that banks can provide in the fields of payroll management and how to manage foreign currency and interest rate risks.

Other useful chapters explain credit control and factoring and financial management.

Stitching up designers

to use computers Designers in the fields of clothing and textiles are under increasing pressure to create garments in response to rapid swings in fashion. Computeraided design and manufacture (Cadcam) allows designers to experiment with new ideas before committing them to paper or sample and saves time spent painting up or altering sketches.

Suggestions for how textile designers can make use of Cadcam are contained in a new booklet* produced by The Design Council.

Here's one for the road

Ian Holdsworth describes plans to co-ordinate Britain's street works

T f the road outside your house has just been resurfaced, you can be sure that it won't be long before someone comes along with a pneumatic drill and digs a hole in it.

For years, street works have been poorly co-ordinated in the UK, with the gas, water and electricity boards and the local highway authority often ignorant of each other's plans.

A marked improvement is likely from this October, however, when the New Roads and Street Works Act 1991 goes live. The new laws, replacing existing legislation drafted in the 1930s, will improve communication between utilities and increase the highway authorities' responsibility for co-ordination.

Under the new Act, local authoritics must keep a register of all street works, and from 1994 that register will be held on a computer. A single, national database will eventually hold details of all the country's street works and the list will be updated as utilities and highway authorities exchange information by electronic mail.

Whereas under the old Public Utilities Street Works Act (Puswa), there are three kinds of road works - major, minor, and emergency the electronic register will have to cope with a host of new definitions. Certain streets, for example, have been deemed "traffic sensitive" and any street works on them would require a longer period of notice.

The existing system has been notoriously inaccurate — it is said to have records of road works in the North Sea

The total number of messages which utilities and authorities send to each other is also expected to increase by as much as 50 per cent. This is because for the first time local authorities must give warning of anything that is likely to effect the motorist, be it a manhole inspection or the London marathon.

Even though the computer system won't be ready until 1994, authorities must comply with the new Act from this October. While they wait, councils are having to develop interim systems which in most cases will be based on fax

machines and the post. The thinking behind the com-

puter system stems from 1985 when Puswa was heavily criticised by a government report which, among other things, called for a national Computerised Street Works Regis-ter (CSWR). Since then, highway authorities and utilities have been working to develop improved codes of practice, and their representative body, the Highway Authorities and Utilities Committee, has advised the government on what the CSWR should look like.

A blueprint is now being devel-oped for the Department of Transport (DTp) by KPMC Management Consulting, and a contract worth about £14m will go out to tender by

the end of the year.
The CSWR offers a chance to improve the accuracy of road work information. This should not be difficult as Puswa has been notoriously inaccurate - it is said to have records of road works in the North Sea, for example.

Increased accuracy would mean fewer cases of contractors and utilities damaging plant by digging holes in the wrong places. Over the last few years, the National Joint Utilities Group (NJUG), which represents utilities collectively, has been trying to achieve this goal through a series of regional trials; and two of these, in Lothian, Scot-land, and in Dudley, in the West Midlands, have been useful precursors to the CSWR.

in 1982 Dudley Metropolitan Borough Council started a trail-blazing experiment which involved utilities sharing their mains records through centralised digital maps maintained by the council. When this system went live in 1985, damage to plant was cut by about 50 per cent almost immediately.

From 1987, the council decided to use its digital maps as the foundation for a street works register which would chart the life of an excavation from the planning stage to the final reinstatement of the road and settlement of invoices. Holes in the road were defined by their co-ordinates on the maps to an accuracy of within one metre. The maps now hold records of about

45.000 holes. Dudley's system has drawn considerable international interest. However, it is too expensive to be sustained indefinitely and now the council is about to move to a post and fax system to comply with the new Act. The trial will have cost £2.5m, funded jointly by British

From 1994 a computerised register will keep details of all road works

Gas, BT, Mercury Communications, the DTp, the council, and the electricity supply and water industries. Another NJUG experiment managed to outlive its trial by being less ambitious and therefore cheaper. The system, known as Susiephone, started life at Lothian Regional Council as a message-relaying service with the slogan "Dial before you dig". By making a single phone call a contractor could inform all

of underground plant. Backed by a consortium of users including Scottish Power, British Gas (Scotland), BT, Mercury and local cable TV companies, Susie-

the utilities of an intended excava-

tion and receive a complete picture

phone soon developed into a PCbased electronic messaging system. In addition, Lothian developed its own "Puswa management system" which has many of the features of a rudimentary street works register. Susiephone was very successful

but not sophisticated enough to meet the demands of the new Act. So the consortium returned to the drawing board and this year announced a new version based on modern workstations from the US company Sun Microsystems.

The new Susiephone has been aligned with the requirements of the national CSWR. Lothian intends to use it as an interim system before the full CSWR arrives in

1994, and the consortium has signed a £400,000 deal with ICL which will develop the system for marketing to other UK authorities.

Although utilities doubt that it could be used as a full CSWR, it is just possible that Susiephone could evolve into a national system. Both the Dudley and Susiephone groups will be invited to tender for the

CSWR contract later this year. KPMG's specification for this con-tract is nearly finished and some features of the future system are beginning to emerge! A consultation paper issued to authorities and utilities last month by the DTp rec-ommends a single national database built from a network of regional computers. It will support:

 electronic mail for giving notice of road works: • software for co-ordinating road software for handling road-work

inspections (from 1996). For improved accuracy, the CSWR will make use of a new

National Street Gazetteer which will be the first complete list of all streets in the UK.

Greater accuracy - to within metres - would be possible using digital maps. However, a Dudleytype system covering the whole country has been dismissed for the present. The technology is "slightly too immature", says Richard Good-

win, project manager at KPMG. But Mike Bosworth, Dudley council's chief land surveyor, says the CSWR may eventually resemble Dudley's system. "Our concepts are sound and I think the national system will develop into what we've got here at Dudley after 10 years," he says.

The DTp's consultation paper suggests the CSWR will be controlled by its users through a management board, which would appoint a computer company to operate the network. However, authorities and utilities are still considering forming a company in which they would be joint shareholders.

In Scotland, the home of Susiephone, the big issue is whether to have a register separate from the rest of the UK. "There's a fairly strong feeling that we should have a system located in Scotland," says Sylvia Murray, principal policy offi-cer with Cosla, the Scottish local authorities association. "But being Scots it would be hard to argue against sharing a system based in Birmingham - if it were cheaper."

Technically Speaking

Globetrotters at spaghetti junction

By Ian Rodger

Advertisements for notebook computers are so exotic. They usually feature Club Class man, dashing from office to Advertisements airport, from airport to hotel -

always with his little electronic wonder under his arm, ready to perform wherever he goes, set to plug in to data banks anywhere in Would it were so. Alas, in real-

ity, use of notebook computers continues to be stymied by the protectionist designs of the world's electrical and telecoms

In the past year I have struggled with a variety of electrical and telecom sockets in Japan, India, Austria, Switzerland, France, Britain, Canada and the US, and have more than once been tempted to stomp my little wonder

Electricity is the life blood of notebook personal computers because batteries tend to be short lived. But the globetrotting PC user had better be prepared for trouble of two kinds.

The first is voltage, which varies from 100 to 240 in the above-mentioned countries. Some PCs come with a converter that adjusts automatically. Others are not so well equipped, so two converters may have to be carried.

The second problem is the plethora of plug-socket standards around the world. This has been largely solved by the design of universal adaptors available in most airports.

But be warned - the Swiss have out-smarted even them, with a recessed, lozenge-shaped socket good only for their very own

three-pronged plugs.
Telecoms companies too have been imaginative. The introduction of plug-in telephones dates back about 30 years, but their spread outside of North America is much more recent. Still, only Japan, among the countries I have experienced, took the sensible route of adopting the US-Canadian RJ standard plug-socket system. This is sensible because most modems are equipped with RJ

The easiest way to get around this problem is to buy a cable that has an RJ plug at one end and the local plug at the other. These are not always easy to find (and in some countries are illegal), but often at international conferences embarrassed reps of the local PTT can be seen handing them out to frazzled foreign PC users.

Thus, our globetrotting club class man probably needs a second suitcase filled with an array of plugs, sockets, adaptors, converters and cables. Even then, his

problems may not be over. The Swiss PTT, among others transmits high-pitched tones that record the passing of each charge segment during a customer's call. Most users are not aware of them because the beep is suppressed on Swiss PTT-approved telephones. But they play havoc with PC modems. You have to buy a special cable equipped with what is called a "tax impulse filter" to get

You can avoid carrying around a suitcase full of spagnetti if you are willing to spend a bit of time opening up telephone junction boxes and attaching wires from your computer. In preparation for this trespassing, take a cable with an RJ plug at one end and expose the wires at the other.

All telephone circuits around the world are basically the same, consisting of only two wires. Many PTTs try and confuse the would-be trespasser by surrounding them with several other wires, but it takes only a short time to sus out

Another gambit that worked in Delhi once was to use the telecom line attached to a facsimile machine. Most facsimile machines, like modems, are equipped with an RJ socket, so it is simply a matter of pulling out the plug from the fax machine and putting it into the modem.

I read an article recently claiming that a US telecoms company was beginning to install coin boxes equipped with an RJ socket specifically for the mobile PC user. It sounded too good to be true. Perhaps it was written by a PC user with a vivid imagination. Or perhaps I was dreaming.

"WHOSE BUSINESS SCHEDULE ARE you WORKING TO?"

number of passengers using commercial airlines is expected to double.

Expect overcrowding and delays to do the same.

Expect to spend more time crawling along the motorway and even longer check-in times.

For many companies the solution to this long-standing problem has been the corporate jet.

With it you can avoid traffic congestion and indigestion by taking off and landing at an airport of your choice.

You can decide the people you travel with, the cabin layout and of course, your business schedule. With a

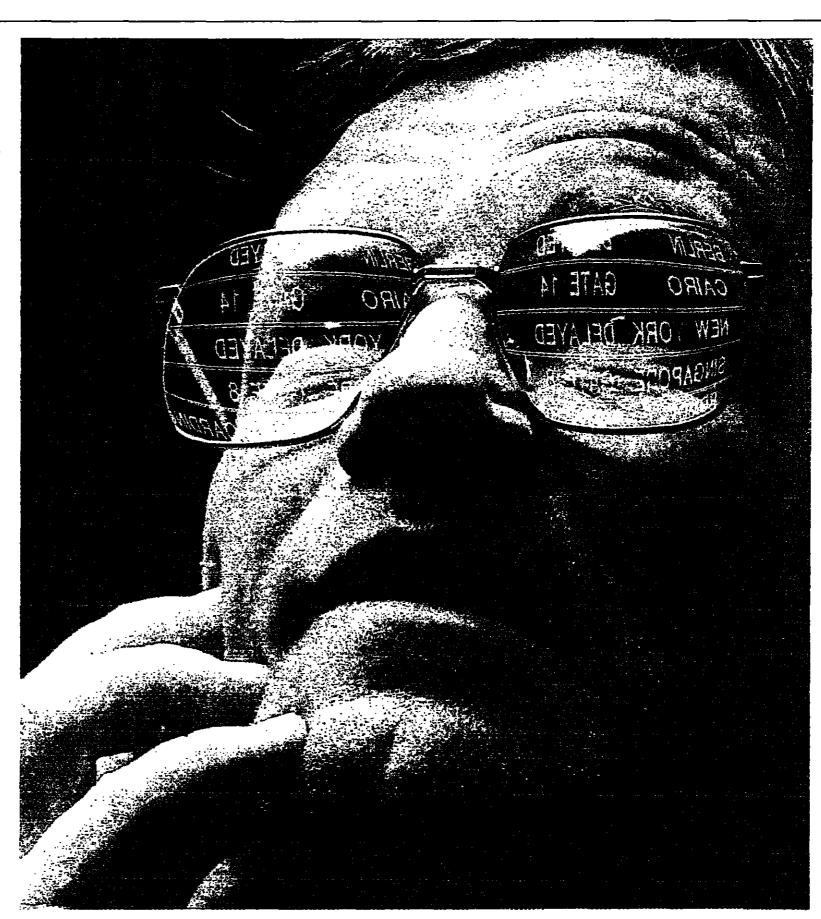

corporate jet you're in control.

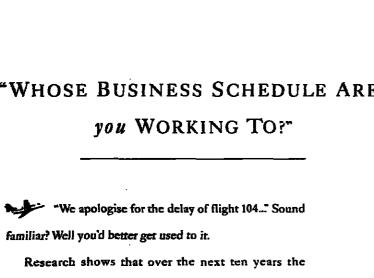

In order to evaluate the business advantages of operating a corporate jet, we've compiled

BUSINESS LAW

Cadbury Committee draft offers mixed news for stakeholders

By Martin Piers and Margo MacGillivray

draft report on corporate governance last week will have been met with sighs of relief in company boardrooms and accountancy firms.

Shareholders, investors, lenders and lawyers may take a more cynical view of the Committee's proposed voluntary code of practice. The Committee tacitly accepts that the code will probably not work, and warns of legislation if there has been widespread abuse and non-compliance when it comes to review the situation in two years time.

dicted that the Committee, made up of the great and the good, would inevitably produce ineffectual recommendations for fear of radical change.

Proper corporate governance requires both the spirit of compliance and legal teeth

The Committee concedes that if the code fails to command support (adherence) then pressure will bring "legislation and external regulation which will be less effective than the approach we recommend". Regrettably, it fails to explain why legislation will be less effective, resorting only to an expressed desire not to inhibit flexibility or stifle "entrepre-

neurial drive". The reality is that proper corporate governance requires both the spirit of compliance which the Committee hopes for and the teeth of accountability

within a legal framework.

The inadequacies and failures of self-regulation and voluntary codes of practice witnessed in the host of frauds, scandals and failures in the UK over the last 10 years, leaves the observer questioning whether there might be something quintessentially British about the Committee's naïveté.

Contrast the British position with that of the pragmatic Australians, who are debating strict regulations, mere wishful

The publication of the their Corporate Law Reform Cadbury Committee's Bill 1992. The Australians propose to reject voluntary codes of practice in favour of laws imposing greater duties on

company directors and officers. Should that bill become law, among other things, directors in Australia would be obliged to: seek adequate information and make proper enquiries about their company's affairs: exercise independent judgment; vet professional advisers; scrutinise conflicts of interest of directors and management; and ensure the adequacy of, and compliance with, reporting and internal control procedures. Disqualification and heavy fines are proposed

Not that direct British legislative intervention in this area is without precedent. The 1986 Insolvency Act and the Company Directors Disqualification Act introduced a revolutionary new framework governing directors' responsibilities and liabilities arising out of the

to encourage compliance.

insolvency of their companies. So why should proper corporate governance not be the subject of a new Companies Bill? Perhaps it will be, in any event, as a result of the proposed European Community Fifth Company Law Directive. The British government might have been better employed in trying to secure a level playing field through negotiation, than by strongly resisting all

change through this directive. The principal outcome of the Committee's draft report is the fundamental change in the role and significance of the non-executive director. A company's audit commit-

tee and (mainly) remuneration committee should now be made up of non-executive directors. Most of them should be independent and their remuneration should reflect the time committed to the company's affairs. Their calibre and number should ensure that their views carry significant weight in all decisions and they should be selected formally by the board.

Admirable sentiments, no doubt, but, in the absence of thinking. Who, for example, is to decide on "calibre"? Answer: the board, where the executive directors command a majority.

The Committee's recommendations are steps in the right direction. But, if the government is to attempt to address the problems which led to the Marwell, Polly Peck, BCCI and other recent scandals, then new rules in a legal framework are required.

It is not sufficient, for example, to recommend a division of responsibility and a balance of power at the head of the company so that no individual has unvetted powers, without prohibiting the chairman from

also being chief executive. The duty to disclose salary and performance-related elements of pay should not be limited to the chairman and the highest-paid director. It should encompass all directors and those operating through service companies and consultancies (as does the Australian draft bill).

Disclosure of audit and nonaudit work recommended by fails to address the inherent conflict facing auditors. The Committee describes the annual audit as "one of the cornerstones of corporate governance" but the problem of the widespread discounting of audit fees aimed at providing accountancy firms with a platform from which to provide their numerous other, more lucrative services, will not be solved merely by this greater disclosure and the rotation of

audit partners. The draft report relies on a voluntary code, influential, experienced and diligent nonexecutive directors and an accountancy profession where the duties to inform and protect the investor (and consequently the creditor/lender) outweigh the need to maintain client goodwill and satisfaction necessary to sell services more profitably than auditing.

A recommendation that the maximum length of service agreements which do not require shareholders' consent should be reduced from five to three years is welcome. The Committee accepts this will require legislative amendment but prefers the voluntary code elsewhere to retain "the essential spirit of enterprise".

Similarly, the proposal that directors state in their report in the annual accounts that the business is a going concern (with supporting assumptions and qualifications) is a good one, but it too will require legislative amendment and should apply to all companies, and not

just listed ones. Clear statements of the functions and duties of the directors and the auditors in company accounts will not necessarily close "the expecta-tion gap" between what the law dictates as the reliance entitled to be placed on filed accounts and the use made of them in commercial life.

Indemnity insurers will have been comforted by the absence of radical recommendations

By not recommending the reversal of the House of Lords decision on auditors' liability in the Caparo case (which limited reliance to the company itself through its board and the shareholders as a whole), the Committee adhered to the policy of keeping the floodgates of litigation firmly shut. Indemnity insurers, both for

auditors' errors omissions insurance and directors' and officers' liability insurance, will have been comforted by the absence of radical recommendations and the voluntary nature of the proposed code. Shareholders, investors and creditors will have been disappointed that just when the

spectacular corporate failures of recent years cried out for bold and imaginative legal reform, the body from which so much had been expected came up with a little tinkering and a voluntary code. Martin Piers is a partner, and Margo MacGillivray is a senior assistant with City solicitors,

PEOPLE

Hanson to groom its image

another pretty filly to his stabie. Aviva Gershuny-Roth, who made her name as a property marketing whiz, has been hired to improve the lacklustre media image of Britain's eighth biggest company. The 34-year-old Gershuny-

Roth will report to vice chairman Martin Taylor who has been the group's principal spokesman to date. Unlike most major companies Hanson has not spent much time grooming its media image because it felt its financial performance spoke for itself.

ever, Shea has spent most of his time cultivating Hanson's contacts with Westminster rather than the City. As a result, when Hanson took a near 3 per cent stake in ICI last year, it was unprepared for the level of media attention - and

criticism - which it received. It has been known for some months that Hanson has been seeking an in-house professional to handle its corporate communications. Nevertheless, Gershuny-Roth's appointment will surprise some Hanson watchers. For the last 15 months she has been involved in the marketing of Olympia & York's ill-fate Canary Wharf

Lord Hanson did hire Michael Shea, a former press secretary to the Queen, as director

development and before that Lord Hanson has recruited of public affairs in 1987. Howshe spent nine years with Savills, the up-market estate Although she is well

regarded, her expertise in marketing property is hardly an obvious qualification for looking after the image of a company like Hanson which employs over 70,000 people

Taylor refused to comment on reports that his new assistant has been lured to the company by the promise of a package worth around £100,000.

A surrealist cast of symbols

retired Professor of Sculpture at the Royal College of Art, is now 58. He read Modern Languages at Cambridge before turning to sculpture, which he studied under Anthony Caro at St Mar-tin's in the late 1950s, followed by a brief stint around 1960 as an assistant to Henry Moore. Late vocation or not, his critical success was almost immediate. He was a particular star of Bryan Robertson's seminal New Generation show at the Whitechapel Gallery in 1965; a trustee of the Tate by 1967; CBE by 1974; ARA by 1977; and subject of a full retrospective at the Hayward Gallery by 1981. All the while there has been a constant stream of shows at home and abroad, regular solo shows of current work with the old Rowan Gallery, and significant contribuno surprise. tions to group exhibitions. His work is now in collections around the world.

In short, King is a substan-tial and influential figure in his generation, an artist with a truly international reputation. Or is he? Any artist, in shifting the course of art in his turn, though by only a little, only adds to its impetus and the capacity of those who follow to shift it further in their turn. Our much vaunted British Sculpture, in received opinion our one consistent and truly significant contribution to the world's art in the 20th century, is now carried on by other, younger hands. If King's reputation has lain somewhat in the shadows since the apparent zenith some 10 years ago or more, this show at the Yorkshire Sculpture Park, along with Tim Hilton's timely and invaluable monograph, affords us the proper occasion to bring it once more, quite literally,

out into the light of day.

that hall so precious.

ments the sound became unhelp-

chaps less poor for chamber-mu-

King's work is, of course, no stranger to the open air, but with such public monuments as the "Clarion" at Fulham Broadway, and the "Diamond Sculpture" beside the road at Street in Somerset, it is more familiar in an urban of industrial than a rural context. Also, his early use of bright, unnatural colour and apparently insubstantial materials, and the long, inevitable practice of showing even the most monumental of the works inside the gallery, have conspired in the common belief that the true place for his sculpture is indoors. Only to the comparative few of his public, familiar with the sculpture garden of his long-time dealer. Alex Gregory-Hood at Loxley in Waxwickshire, will this splendidly bucolic display in the park at Bretton Hall come as

Even to them, with so many definitive pleces on show, the urge to modify both expectation and judgment is irresistible. For what emerges is not just that these things look so much at home on the grassy slopes beneath the trees, but rather that brightly coloured or drab and natural, they display a remarkable consistency both in their imaginative preoccupation and formal develop-

The differences are clear enough: the hints at figurative reference in the earliest; the overt figuration in the latest works; and, in between, works in which formal and material considerations are over-riding. Yet, whichever it is, what brings it so to sit happily with the oeuvre at large is an unmistakable sense, not just of space occupied and articulated, but of a place established and enclosed. Given the open nature of so many of the structures in the purely formal

No stranger to open air: 'Ascona', 1982: steel, by Phillip King

sense, this may seem a some-what contradictory thing to say but, even so, it holds good. Stonehenge may be open now to all the winds that blow, but its sense of enclosure and, more than that, of being enclosed to some purpose, is undeniable. And by how much is the same true of ruins of all kinds, whether of castles or cottages, temples, tombs, sacred graves?

If King does not make the point himself, the works make it for him in a remarkable combination of sculptures, set out more or less across the slope and half-way down the hill toward the lake. On either side sit two works of 1977, "Open Place" and "Sure Place", each a low slanting structure, decep-tively tumbled, of slabs of slate set into a steel framework. In between are two bright and open structures, arched and sprung, not so much higher and with the same scope across the ground. They could hardly be more different, and yet so very much the same: the dome,

the canopy, the tent, the tomb. So back it is to those earliest things, to "Genghis Khan" of 1963, dark blue against the green and what might be a great swirling cape or tent surmounted by an imperious set of heraldic antlers. On to the most recent things, to the clouds and the arcades and

tumbled elements, redolent of Giacometti and de Chirico, Picasso and Miró: and again, King sets out the same contained space, though now a stage, as it were, on which to put his discrete surrealist cast of symbols - the hand, the ball, the

Those latest, openly surreal ist works may seem something of an arbitrary break in the natural development, romantic as ever but a conscious rejection of the abstract and the formal. Shown as they are, however, in the pavilion in the upper garden alongside a group of the earliest things, colourful pyramids and cones fraught with a latent surreal

ism, they seem less so, less certainly than they did new and alone a year or two ago. Who knows where they may tend? But an artist in mid-career is the master of is own direction, and the professor, Emeritus now, has yet to collect his bus pass. Already the work comes together, all of a piece. There is plenty of time.

Phillip King - Sculpture 1960-1991, Yorkshire Sculpture Park, Bretton Hall, Wakefield until August 31. The Sculpture of Philip King by Tim Hilton published jointly by Lund Humphries and The Henry Moore Foundation.

Opera/Andrew Clements

When the Royal Opera House's "Garden Venture" went public for the first time in 1989 with six specially commissioned music-theatre pleces, one of the most successful of a strikingly undistinguished bunch was Priti Paintal's Survival Song, to a text by Richard Fawkes. Its portrayal of the events leading up to a necklace killing in a South African township was described then as a study for a full-length opera on the life of Steven Biko, and the Garden Venture has gone on to commission that piece; Biko was unveiled in Birmingham on Friday, directed by Wilfred Judd, artistic director of the Venture, and

conducted by Timothy Lole. Paintal evidently learnt about Biko through Richard Attenborough's Cry Freedom, and Fawkes's scenario follows the approximate outline of the first half of that film. It presents Biko among his family, a man of non-violence working for the black community despite constant police surveillance, threats and banning orders; his growing friendship with the journalist Donald Woods and Woods' attempt to intercede on Biko's behalf with the state security minister Kruger, and chronicles the escalating harassment, Biko's arrest, torture and death.

The bare historical facts have a tragic trajectory of their own, but they are treated here with almost cartoon-like simplicity. Even the character of Biko is hardly given any per-spective, while Woods emerges as a hapless stooge, unaware of the potential brutality of the state. Too much of the dialogue is suffocated by banality -Biko surely did not always discuss his aspirations in such clichés - while the lack of cadence and rhythm creates insuperable problems for Paintal's word setting, which falls back on the infuriating tic of repeating every second or third phrase to add emphasis.

Much of the score is slight. The climactic moments of the work - Biko's unaccompanied monologue in the first act his torture and murder in the second - are never underpinned with the musical intensity they demand, and Paintal's mixture of minimalist washes and Bernstein-like melodic invention consistently seems underpowered. Only briefly, at the beginning of the second part when Woods confronts Kruger at his home, does the music begin to function dramatically; there the dark-hued woodwind solos generate exactly the kind of ambiguity and unease the situation requires.

Judd's frugal production does what it can, but it is hard to sustain tension when so much in the music and text appears to be conspiring against it. The playing from the Endymion Ensemble is vivid and alert, and there are some fine performances. Daniel Washington makes Biko a highly moral, stoic figure, and Damon Evans contributes a byperactive performance as Thomas, the militant who rejects Biko's strategy of nonviolence; Hyacinth Nicholls is Biko's wife Ntsiki, Angela Caesar the family friend Miriam Stephen Richardson's portrayal of Woods seems intentionally shallow and naive, while Gerard Quinn and Stephen Austin are the security police; as Kruger too, Quinn gets a second chance to polish his

Afrikaner accent. In the end Biko neither rise to the importance of its subject matter nor leaves the impres sion of a rounded piece of music theatre even on its own limited dramatic terms. As the first fully ripened fruit from the Garden Venture it is a disappointment; Judd's claim in the programme that the project is now well established as "the prime mover in developing new opera in the UK" still needs to be taken with a pretty large pinch of salt.

Birmingham Repertory Theatre until June 6; Riverside Studios, London, June 10-15

Music in London

Musicians who miss the Wigmore

"Death and the Maiden" Quartet neu-mais was held at bay. Where the Lindand Quartet seizes the music by the throat, or the Amadeus was wiry and Onartet seizes the music by the tensile, the Takacs still find time to shape broad lyrical phrases (the ele opening of the slow movement was coloured with particular sensitivity). The players will be hosting their own festival at the Wigmore Hall in 1994, so they clearly recognise where their true London home lies.

A word of recommendation, too, for the Beethoven Trio, who gave the first of three recitals at the Purcell Room on Friday. Each of these programmes features a new work by an Austrian composer together with Mozart and Beethoven trios, for which the players are winning an increasing reputation at home and ahmad

To judge from the standard of performance in this first recital there is no reason to question those high opinns. The Beethoven Trio is a meeting of three equal musicians, less dominated by the planist than is often the case in more starry ensembles, a trio of young and fresh interpreters, able to build long paragraphs of music into

style unexaggerated. Warmth and lyricism are their hallmarks, although statements of some depth and import.

The new work on this occasion was Gerhard Schedl's Second Piano Trio, ing of their native Hungarian paprika in Bartok's First Quartet and also the subtitled "Lamento", which takes the scherzo of Haydn's B Flat Quartet, Op.76 No.4, where the vigorous music of the two Armed Men from Mozart's Die Zauberflöte and sets isostamping rhythm was taken up rather lated phrases from it afloat in a sea of In their performance of Schubert's vaguely expressionist sounds: not a

piece of strong individual merit, although at 10 minutes it did not outstay its welcome. The third and final recital, with a new work by Thomas

Richard Fairman

In a Purcell Room agreeably tarted up with paintings from the Arts Council collection, including Gillian Eyres's eye-catching "Spica" and a yellow and blob-red Caulfield, the English tenor Adrian Thompson and pianist Iain Burnside gave a recital on Thursday, fifth in a song series which would normally be staged, one presumes, in the Wigmore Hall.

Certainly the Wigmore acoustics would have been more accommodating to Mr Thompson's searingly pow-erful instrument. He makes a clarion sound which is apt to go frantic with decibels in upper register climaxes and produce a cuttingly painful effect in the confinement of the Purcell Room. which oddly seems to stop the voice dead without muting it.

Passionate and in many ways persuasive, Mr Thompson's recital problem was sheer vocal bulk. From the start he was overwhelming his planist as well as flattening his listeners in a Schubert group, though the passionate, storm-lashed Der Schiffer (The Boatman) positively benefited from the ferocious despatch. Among a selection of Hugo Wolf's Morike settings, Der Tambour, a drummer boy's

(Stork-tidings), with its bitonal piano part figuring the shepherd's creaky hut (and anticipating the methods of Britten), made a vivid impression. An eine Aolsharfe (To an Aeolian Harp) received a strong, solemn delivery.

I found the five Geraid Finzi songs after the interval dullish, and the four Samuel Barber's not much less so: Sure on this Shining Night sets words by James Agee but isn't a patch on Knoxville. Mr Thompson came on in chef's togs for Leonard Bernstein's Faure send-up, La bonne cuisine, the four song-texts being French recipes.

The 33-year old Russian conductor Yakov Kreizberg (he emigrated to the USA in 1976) made his London debut on Sunday night with the Philhar-monia Orchestra at the Royal Festival Hall in an all-Russian programme. It was not an exceptionally interesting programme, but Kreizberg made it uncommonly gripping and the orchestra's playing was of the highest stylishness throughout.

The Polonaise from Tchaikovsky's opera Eugene Onegin was a brief but cracking opener and its brilliant bluster was no sooner in our ears than forcibly contradicted by the bleak depression of Shostakovich's second cello concerto, Op. 126, a late work written for Rostropovich in 1966 between the thirteenth and fourteenth

Our soloist was the American Lynn

Harrell (in the news because of his appointment as next principal of the Royal Academy of Music), and no more searching or finely shaped interpretation could have been asked for. Harrell's tone is as clear as it is expressive, as minutely governed as it is boldly (and with seeming effortlessness) projected. Shostakovich's invention is not perhaps of the most distinguished in this work, which is just a very good performance "on the Shostakovich"; but Harrell read in a marvellous intensity everywhere and the orchestra answered Kreizberg's evident commitment with a high-tension accompaniment notable for individual excellences (the sturdy peculiar horn calls at the end of the first movement, the split-second demented xylophone interjections of the scherzo) as well as formidable group cohesiveness.

Kreizberg cuts an impressive figure on the podium: unflamboyant but intense, dapper but keenly effectual. His account of Rakhmaninov's second symphony was beautiful, profoundly persuasive (the work can easily become a romantic thrash) and, in its slow movement, quite overwhelming. The string textures of the slow introduction were built up with glistening precision, and brass layers superadded with a disciplined ear for balance. The performance of the scherzo was masterly one blessed Kreizberg for the tiny touches of violin portamento. Michael Whight's quiet, poised clarinet solo in the spacious Adagio took our breath away, if not his; and the movement went its noble way "among the deepening shades".

National Opera Studio

Students of accountancy and law may count themselves fortunate that they do not have to do end-of-term public show-ings. Each year the singers of the National Opera Studio are expected to appear in an evening of scenes from various operas, which is in some ways more difficult than performing in a complete one.

For this year's "Showcase", given at the Queen Elizabeth Hall on Saturday, the Studio made sure that professional guidance was on hand. Tim Albery was the producer and David Parry with the Bourne-mouth Sinfonietta took charge of the musical side, but neither exactly gave the students an easy ride. The ensemble was precarious even in the scores the orchestra seemed to know, while events on stage sometimes saw ingenuity triumph

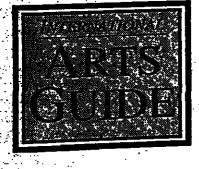

over commonsense. The test of an evening like this is to see if the student performers can find the mechanism that makes their characters tick within the timescale of a single scene. To this end Albery had not been a wholly reliable guide. The amorous cavorting between Rossini's Figaro and Rosina had little to Paul Driver do with their operatic charac-ters; and Don José was left to

sing the Flower Song lying on his back while his glamorous Carmen did a striptease on the other side of the stage. Nevertheless, at least the Studio does have a Don José.

Indeed, both the tenors made a good impression vocally. Mark Luther, who had appeared in the Carmen excerpt, also sang in a scene from Donizetti's Anna Bolena, though arguably with a better feeling for the French sound and style. Mark Le Brocq was wanting in sensuality as Massenet's Des Grieux, but returned as an outstanding Albert Herring, genuinely moving, a complete operatic portraval in embryo. The standard of singing

suggested a good year. Among the strengths were Kay Jordan's Anna Bolena and Anita Morrison's Agathe, in Weber's Der Freischütz. The honours of the evening, however, went to the partnership of Mary Plazas and Ann Taylor-Morley, who took on a scene from Donizetti's rarely-performed Maria Padilla and delivered it with a fine sense of style. These were two operatic people who came alive and one would gladly have stayed for them in the rest of the opera.

Richard Fairman

BERLIN

Philharmonie 20.00 Bernard Haitink conducts Berlin Philharmonic Orchestra in Brahms' Double Concerto (Toru Yasunaga and Georg Faust) and Shostakovich's First Symphony, repeated tomorrow (West Berlin 2548 8232). Sat: Vladimir Ashkenazy conducts works by Zemlinsky and Schumann (3027 242). Sun morning and Mon: Kurt Sanderling conducts Saint-Saens and Tchaikovsky (2548 8232) Deutsche Oper 19.00 Gounod's Faust with Glacomo Aragali and Nelly Miriciolu. Tomorrow: II provatore. The isolation of Serbia

THE HORROR of the human tragedy provoked by Serbia first in Croatia and, more recently, in Bosnia and Hercegovina, has at last persuaded the international community to take action. Predictably, critics now maintain that the sanctions adopted by the United Nations Security Council last Saturday have come much too late and should have been approved at least nine months ago. But the necessary consensus was not forthcoming at the time and the US, in particular, made it plain that it did not want to get involved in a far-off ethnic conflict which did not seem to threaten wider international security.

There is little point now in pursuing the argument whether the European Community is more to blame for its incapacity to solve the Yugoslav crisis in the first place, or the US, for washing its hands of the whole affair until outraged domestic public opinion forced the Administration to change its mind. What is certain is that international solutions to crises of this magnitude still require the involvement and commitment of the only remaining superpower,

In spite of the mixed results that international sanctions have had in the past and the bluster of Mr Slobodan Milosevic, the Serbian leader, who boasts that the Serbian economy can survive in spite of them, there is every indication that sanctions will bite deep. This is particularly true of the oil embargo, given that Serbia is dependent for some 75 per cent of its oil needs on foreign suppliers such as Russia, China, Romania and Angola. In the circumstances, it is hard to see how its military effort can be maintained indefinitely, though civilian users of cars and fuel will probably be made to pay the biggest price to keep the military machine going.

Popular opposition

Equally important will be the effect that shortages, the inconvenience caused to travellers by the suspension of international flights and the disappointment for a football-obsessed people of seeing its team banned from the European championship finals in Sweden, will have on national morale and Mr Milosevic's political standing.

The demonstration in Belgrade at thing less, as has been proved conthe week-end by some 50,000 anti-

war protesters was an indication that popular opposition to his policies is growing, at least in the

however, is mainly middle class based. It would be an illusion to believe that it finds much of an echo in the rural Serb and Montenegrin population, not least the Serbs in Bosnia, who look upon the Belgrade government as their main protector and champion. Indeed, Mr Milosevic is far from being his own man in Bosnia, alist irregular Serbian military units are even accusing him of being too soft.

Perverse effect

There is clearly a risk, therefore that UN sanctions could have the perverse effect of giving a boost to rbian nationalism. Even if the Belgrade government were to have a change of heart as the result of international pressure, regional nationalist groups might well decide to pursue their crusade. The Yugoslav partisans demonstrated during the Second World War how effective they were at guerrilla warfare.

If the international community were to wait until Serbia is economically exhausted or Mr Milosevic is overthrown, it could wait for a very long time. Sanctions must be given a fair chance to bring Mr Milosevic to his senses, but if they fail, what then?

international military action can no longer be ruled out as a longer term option. As in the Guif crisis, such operations would have to be sanctioned by the Security Council, though they would probably have to be undertaken by surrogate organisations such as Nato or the Western European Union. Military action should be restricted to air strikes against strategic targets, it would be most unwise to contemplate sending ground forces, since they might come stuck in Yugoslavia indefinitely and suffer politically unacceptable losses.

But whatever action is finally decided, it is essential that it should be taken by the international community as a whole including the US, which alone has the clout to bring transgressors of international law to heel Anyclusively, is doomed to failure.

The next step in housing

WHEN THE chancellor. Mr higher level of transactions by Norman Lamont, meets representatives of the leading building societies this afternoon, he and his ministerial colleagues will no doubt be given reassuring news about repossessions in the housing market. And there is indeed room for modest reassurance: while repossessions remain at historically high levels, the trend has unquestionably improved in the first few months of the year.

Yet it could hardly have been otherwise. Since the government and the building societies agreed in December on a package of measures to help stabilise the housing market, nominal interest rates bave fallen further and income support for mortgage interest has been paid direct to lenders, automatically reducing the risk that borrowers will go into default. In addition the societies have recognised the advantages of keeping overstretched mortgagors in the property. With the aid of counselling and renegotiation, otherwise shaky borrowers have been kept afloat to the benefit of both par-

What is clear at this point is that the improvement in the fig-ures owes precious little to the attempt to encourage defaulting mortgagors to become housing association tenants in the former owner-occupied property. Those who have escaped the problems of the rented sector for the financial strains of home ownership appear singularly reluctant to rejoin the tenantry. The scheme has anyway been criticised for its legal complexity. And from the building societies point of view the economics look unfavourable, since former owner-occupied property does not enjoy the grants that enable housing associations to charge low rents on new property.

Enormous pressures

That said, it is hard to see a chancellor who faces enormous pressures on public finances being prepared to contemplate the cost of equalising the financial position of these two forms of tenure. Nor does it seem likely that Mr Lamont will accede to the demands of those who would like to see his temporary relief against stamp duty extended beyond the summer. If it has failed to kick-start the market into a significantly

now, its point has anyway been lost. The question is why it has failed and what else the government should do, if at all, to help.

By past standards the relation ship between house prices and earnings, which was distorted during the boom of the late 1980s, is back to its long term trend level. House prices appear affordable again. Yet buyers remain elusive.

Affordable prices

One explanation might be the caution-inducing persistence of high real rates interest after a decade in which the personal sector doubled its indebtedness in relation to household income. Another could be that buyers expect prices to look even more affordable in due course. That is far from implausible if the first big fall in nominal house prices since the war causes the speculative investment premium in housing to disappear - an outcome that could be reinforced by the erosion of the real value of mortgage interest relief and the less favour-able trend in household formation that is expected later in the decade. Against that background house prices might well be expec ted to settle at a lower multiple of carnings than hitherto.

A more tangible factor behind the low volume of transactions is that between half a million and a million buyers are reckoned to have a negative equity in their homes, whereby the mortgage exceeds the value of the house. They are stuck on the bottom rung of the housing ladder and unable to move. It is here that the housing market slump is doing economic, as well as social, damage. In the absence of a more flexible private rented sector, job

mobility is reduced. Existing legislation prevents the building societies from transferring mortgages to a new property by stipulating that they cannot lend more than 100 per cent of value. Where housing equity is already negative this prudential requirement is academic. It also acts as a needless constraint on labour market flexibility. The chancellor should explore the case for a limited relaxation of the legislation to cope with this unexpected consequence of the collapse in house prices.

lobbying MPs at Westminster next Monday will be a graphic reminder of the hardship caused by the failure of schemes controlled by the late Mr. Robert Maxwell - and of the pensioners' expectation that the government should play some part in

easing their plight. Since the election, the efforts of MPs campaigning on behalf of the Maxwell pensioners have become more urgent. An all-party group of MPs was set up last month and now numbers more than 100, including some ministers. The subject of pensions' safeguards is moving up the political agenda as the group steps up its activities: tomorrow it will meet to discuss how to exert pressure on banks to help bail out those who lost their life savines in Maxwell pension funds.

"'Pensioner' is a very emotive word," said Mr Richard Thomas, a director of Law Debenture Corporation, the independent trustee to the Maxwell Communication Corporation Pension Scheme. "The role of povernment is to protect its most defenceless individuals."

More than 30,000 were left without immediate protection after Mr Maxwell disappeared over the side of his luxury yacht last November and auditors discovered £400m was missing from the total assets of 695m in pension schemes he controlled. Aiready, 240 members of one Leeds-based scheme have had their monthly pension cheques stopped, while 5,000 members of another scheme face a 70 per cent cut in benefits by next month.

The five Maxwell company pension schemes have 32,710 members. Of these, 14,110 are already pensioners, highlighting the extent of the government's dilemma. The largest scheme, representing more than 12,000 present and former Mirror Group Newspaper employees, is peing shored up by contributions from the employer. However, the scheme includes hundreds of members who worked for a separate Maxwell company, and Mirror Group has said it will not guarantee the pensions of those individuals.

If any more Maxwell funds stop paying pensions at the end of this month, the government is likely to come under renewed pressure from the group of MPs. "That is when it will get nasty and spill over on to the floor of the Commons," said Labour MP Mr Frank Field, cochairman of the all-party group.

Ministers have so far rejected the group's plan for a "drip feed" from the government to enable the schemes to continue paying while assets are pursued by independent trustees. The idea of a drip feed, put forward by Mr Richard Page, the Tory MP who co-chairs the group, was intended as a temporary measure until the assets could be located and the most pressing obligations (legal and moral) could be

Ministers are awaiting a report by the Securities and Investments Board, the City's regulatory watchdog, into the role played by linro, the self-regulatory body for the fund management industry, in oversee-Bishopsgate Investment Management, Mr Maxwell's fund management company.

Pensioners argue that Imro, and by extension the government, did not fulfil its regulatory duties with regard to BIM. It is alleged that BIM allowed securities belonging to the five Maxwell pension schemes to be 'ioaned" to other Maxwell-related businesses. These were then used, it is alleged, by Mr Maxwell as collateral for loans from UK and interna-

As UK regulations come under scrutiny, Norma Cohen and Alison Smith look at the pressures building over the Maxwell affair

The charge of the pension brigade

tional banks. "There will be political pressure on the government to move very, very quickly once SIB is out," Mr Page commented. "It would be unwise not to be there ready with a statement, a position and a series of decisions.'

MPs, however, are far from convinced that the government should pick up the entire bill - which could amount to £150m-£200m - to compensate Maxwell pensioners. What they do agree on is that the pensioners have a strong moral case for help from somewhere. Under the law they had no choice about where to invest their funds, or indeed whether to contribute to an occupational pension scheme at all Until 1988, all employees were required to contribute to a pension scheme if an employer offered one.

While the idea of a governmentfunded compensation scheme has not garnered wide support at Westminster, the government appears to Miss Ann Widdecombe, a junior social security minister, said it would be "irresponsible" for the government to consider such a fund before investigations into the disappearance of the missing Maxwell assets are complete - but she said nothing had been ruled out.

As political pressure grows at Westminster, the group of 100 MPs is switching its focus from Whitehall to the City, and to the Bank of

England in particular. They want the Bank to exert pressure on commercial banks to return some of the securities they received on behalf of Maxwell companies. Some ministers are joining forces with the pensioners' lobbyists to urge the banks to acknowledge their moral obligations. For their part, the banks say that they are studying the matter, but they point out that they accepted the securities in good faith and had no way of knowing that they were pension fund assets.

aged when they saw Mr Peter Lilley, the social security secretary, recently by his undertaking to pass on their criticisms to the Bank of England. Last week. Mr Page wrote to Mr Norman Lamont, the chancellor, asking him to put pressure on the Bank to take re active view of its supervi-

The failure of Mr Robin Leigh-Pemberton, the governor of the Bank, to acknowledge publicly that the Bank played a rather too passive role in the Maxwell affair is likely to result in some uncomfortable questions from the group of MPs. The Bank's reluctance to become involved in seeking a solution is also likely to raise some uneasy questions about City regulation in general.

"If the Bank steps back from this it is saying it has no role in regulating the City: it would be entirely wrong for the Bank to step back. This strikes at the fundamental core of how the City runs itself and the basis on which transactions take place," said Mr David Shaw, Tory MP for Dover and another leading member of the MPs' group. He said the entire structure of selfregulation in the City had been called into question, and described as "profoundly unsatisfactory" the prospect of MPs shuttling about in taxis from one regulator to another in search of a single voice to speak for the City.

His remarks echo the findings of the all-party social security committee of MPs in the last parliament. Its report on the Maxwell affair commented that the most striking result of months of hearings was that no single body or individual appeared to have full responsibility for monitoring pension fund activities. "Pontius Pilate would have blushed at the spectacle of so many witnesses washing their hands in public before the committee of their responsibilities in this affair."

One of the main recommendations of the committee will now be implemented. Mr Lilley is about to announce a government review of pension law, although not specifi-cally within the suggested

nine-month timescale. The review will address the fundamental question of the status and ownership of pension funds, but is also set to include other select committee proposals such as: the appointment of independent custo-dian trustees to hold pension-fund assets, all with clearly designated ownership; the annual right of every pensioner to transfer his or her assets from a pension scheme to another recognised financial institu-tion: and the right of pensioners and contributors to veto transfers of

assets to another scheme. It is also likely to look at the concerns already voiced by Imro, about the difficulties of marrying trust law - the legal framework governing pension funds - and financial services legislation. The strengthening of the Occupational Pensions Board to police a new regime will also be considered.

ow that a portion of the pensions-industry has accepted that some sort of compansation fund is needed one problem is the form the fund most European countries, including France and Germany, already have such funds. Setting one up in the UK would entail an overhaul of current pension law because the fund would insist that any scheme covered by it met minimum standards.

Mr Brian McMahon, chairman of the National Association of Pension Funds, the industry trade association, has called for scheme members to be eligible to apply to the Investors Compensation Scheme set up under the 1987 Financial Services Act. The ICS allows investors to receive up to £48,000 in total compensation - a paltry sum compared with the notential benefits lost when a pension scheme collapses.

The NAPF has also embarked on a feasibility study of a separate compensation fund. This would be an additional safety net for pensioners whose schemes had failed without sufficient assets to meet all liabilities. One proposal is that it be funded by a levy on all UK pension schemes - an idea which has proved divisive. "On the basis of my postbag, there isn't much support for it," Mr McMahon said. "The postbag tends to be from the larger schemes who say they run good schemes. They don't want to bail out the likes of Robert Maxwell."

Clearly, neither the government nor the industry wants to pay for a compensation fund. The government is waiting to assess exactly how much funding would be needed and to see whether the banks will return some of the securities received on behalf of Mr Maxwell. The industry, on the other hand, wants to reassure pension scheme members that their savings will not disappear if a company fails, but it does not want to underwrite pension fund abuse by an open-ended commitment to a compensation

Over the longer term the government review will be of immense significance for an industry that has operated in an almost unregulated environment. But it will do little for the Maxwell pensioners because they would be outside the scope of any future legislation.

Mr Page compared their position with that of passengers on the Titanic, if they had known that its sinking would lead to new international regulations about lifeboats and safety at sea. "I'm sure they would be delighted that in future people would have more protection, but they are bound to be concentrating on their own predicament.

Joe Rogaly

The essence of leadership

such an historic deal, had he used

his single most outstanding skill:

working the telephone. What he has

instead bulldozed out of the rest of

us is a toothless draft on the global

threat and, on preserving plants and animals, a neutered document

that the US will now not sign

because the president fears the

effect on his domestic biochemical

industries. I say this as an unashamed admirer of the US. We

Europeans would not be enjoying

the blessings of a free society if it

had not been for the sacrifices of

life and treasure made on our

behalf by Americans. It is what

their current administration is doing to our grandchildren that

Bush was at his best during the Gulf war. For a few heady months the prospect of a Pax Americana in the Middle East shimmered before our eyes. Now, as the Earth Summit

President George

begins in Rio de Janeiro, the US president is at his worst. He is the elected head of the most powerful nation. His natural role is to lead us. He alone might have been able to make a success of Rio. Instead, he has striven to wreck it. What the planet is getting is not US leader-ship, but a *Pox Americano*. This is not to say that Washington should have signed the lengthy

draft treaties on global warming and biodiversity without demur. There was, and still is, plenty to argue about. But the head of the single remaining superpower should have taken the initiative. He was right to brush aside absurd Third World demands, but he should have replaced them with reasoned proposals of his own.

A positive treaty curtailing emissions of greenhouse gases, and another protecting threatened species, could have been shaped to fit US thinking. Both could have been kept within manageable bounds by going ahead full steam where the science is clear (on the ozone layer, for example) and sticking to the precautionary principle where there is imprecision (the greenhouse effect). Action could have been confined to the use of market mechanisms, tradable permits, globally-negotiated tax strategies, tied aid, and, where prohibition is the only answer, universal agreements. Many polluting industries would prefer the certainties of regulation to life in a market governed by green consumer pressures. They could have had it.

Mr Bush could have pulled off

In his foreign policy, Mr Bush represents the finest in the post-1945 American tradition. He is of the old school - Atlanticist, outward-looking, a skilled diplomat. In his Mr Bush has bulldozed out of the rest of us a toothless draft on the global threat

domestic and environmental policies, he looks like a cheap politician, a buccaneering oilman, a prisoner of the new Right. The man who promised to be "the education president" and build a "gentler America" has presided, bewildered, over the rioting in Los Angeles; the candidate who said he would be the "environmental president" speaks

today like an enemy of the earth.

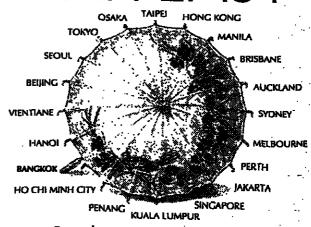

One reason is that the intellectual pendulum has swung against action by governments. I was reminded of this by the text of a recent address to the class of 1992 at Fordham university in the Bronx. The speaker, Dr John Brademas, is, like Mr Bush, an American of the old school. There the resemblance ends. Dr

Brademas, who is president emeri-tus of New York University, was a Democratic congressman from Indiana for 22 years and majority whip under president Carter. He worked with the liberal Adlai Stevenson and, as member of a congressional committee, helped draft many of President Lyndon Johnson's bills establishing the "Great Society". In short, he represents everything that today's conventional wisdom says went wrong in the 1960s and 1970s. He was swept out of Congress in the 1980 Reagan landslide.

So why listen to him? Because he has a point. "The essence of leader-ship in a democratic society," he explained to the Fordham freshers, "is to persuade the electorate to do that which they might not as indi-viduals want to do but know in their hearts they should do for the greater good". Such an approach can lose elections, but nobody is seriously advocating that it is always good campaigning strategy. In office, it is an essential principle. This is particularly true in the

US, whose constitution prevents any one individual, or body, from exercising dominant control. "Often, a president's major challenge is shaping a consensus...inside his own administration before taking that policy to congress and the people," said Dr Brademas. It is not only big-government big-spenders who need to do this; conservatives too fare best, and serve most beneficially, when they seek to lead in a positive direction.

Mr Bush, like his predecessor, has been hampered by a Democratic Congress, but that is no reason to abdicate the role of leader. President Ronald Reagan did not do so and, for all his shortcomings, he has lived to see the crumbling of the "evil empire". President Bush or his successor must now strive to ensure that liberal democracy has not triumphed merely to inherit a desert. BANGKOK AND THE FAR EAST

Every day, we can fly you to Bangkok, the gateway of the Far East, and on to 33 destinations around the region... without changing airlines. Key is not to produce less but differently

Martin Wolf explores the meaning of sustainable development and the difficulties of putting this idea into practice

ow could anyone be in favour of "unsustainable development"? It would be like favouring matricide, the victim being Mother Earth.

Yet what precisely is "sustainable development"? Sustainable development, says the World Commission on Environment and Development, consists of "forms of progress which meet the needs of the present without compromising the ability of future generations to meet their needs". That does not make one

wiser. Try this, instead: "... In the end, sustainable development is not a fixed state of harmony, but rather a process of change in which the exploitation of resources, the direction of investments, the orientation of technological development, and institutional change are made consistent with future as well as present

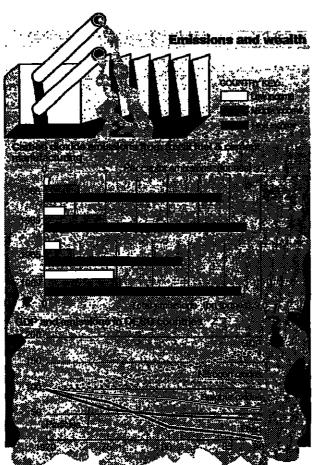

This is merely wordier. What, above all, are future needs? Citizens of rich countries would number among them a standard of living at least as high as that enjoyed poor that would be no more related to "need" than is a Rolls-Royce motor car to cost-effective transportation. Fundamentalist environmentalists. who often advocate something like the medieval manorial economy, would

How then can the concept of "sustainable development" be made operational? One way is to recommend that the capital stock be maintained. More narrowly still it is suggested that not the total capital stock, but the stock of natural resources alone should be maintained. The reason for this restriction is evident. How many miles of

road are worth one rhinoceros? Among the rules suggested for use of the natural capital stock is that there should be "no net losses", meaning that any natural resources should be replaced. Another is ume the worst": any action affecting the environment is guilty, unless proved innocent. Yet how many acres of wet-

lands compensate for a forest? Is a giamorous species on the savanna worth two obscure ones in the rain forest? Unless one advocates the impossible actions that have no deleterious effect on any ecosystem ural capital must be preserved

takes one little further. The World Commission opment, "with its concern for the needs of people today and tomorrow, is ultimately a moral and ethical issue". But that is all it appears to be. It is

thought is buried within it: that the globe's ecosystems have limited carrying capacity. The idea has intuitive appeal. Over the last generation gross global product (GGP) has been growing at

more than 3 per cent a year. At that rate, GGP would be 1,600 times greater 250 years from now. Either growth would have ceased long before, or the composition of Polluters should be so different pay. But who as to be incom-

parable. Just decides how much? contrast today's And who will output with that of 1742. make them? This notion is the basis for the relative optimism of the also offers a strategy for "sus-World Bank's World Development Report on Development and the Environment. "The

"but to produce differently." The report argues that there linear relationship between economic activity and environmental damage. On the contrary, the emission of many important pollutants has declined with development. This may not be true of municinal waste and carbon dioxide emissions, which have continued to rise with income. But

key to growing sustainably is

not to produce less," it opines,

that, suggests the report, is because there have been no incentives for changed behav-

The World Bank asserts that the link between economic growth and the environment depends on four factors: • structure: the goods and services produced • efficiency: the quantity of inputs per unit of output: • substitution: the ability to

substitute for scarce • technology and management: the environmental daminput or output. The report

tainable development", defining that term as "development that lasts". This has three ele-

 build on the positive links: many policies that promote growth - appropriate energy improve the environment: break the negative links: introduce appropriate incentives and disincentives; and • clarify and manage uncertain links: where the consequences of human activity are unknown, the response should be the search for further infor-

mation, combined with precau tionary measures

How can sustaining the natural environment or, where pos-sible, improving it be made consistent with development? The problem is market failure, the way people can ignore the nt in their economic decisions. The solution is to introduce environmental

incentives. Unfortunately, this conclusion is more easily written than implemented.

First, the use of non-marketed, but scarce resources, has to be reflected in corporate and national accounts. Second, rational incentives

improve the environment have to be introduced against entrenched vested interests. Third, many important environmental goods (and bads) species diversity, the composition of the atmosphere, the number of children people have - cannot be property. Others, like rain forests, are difficult to protect. Polluters should pay. But how much?

And who will make them? Fourth, turning hitherto "free" goods into property or taxing their use redistributes wealth, sometimes massively. Equally intractable distributional questions arise when valuing the welfare of future generations against that of those living now.

Finally, some problems run across frontiers. A few affect everyone. Establishing, enforcing and distributing rights to pollute across countries is vastly more difficult than doing that within them.

Nothing raises more difficulties than global warming. Both the size of the threat and its potential economic costs are uncertain; the costs of lower emissions for important interests would be large; the atmosphere is not appropriable; emissions can only be monitored with difficulty; the way in which rights to emit carbon dioxide are allocated would affect the international distribution of income; and overall reductions in emissions would influence inter-generational income distribution as well.

No wonder, developing countries argue that the rich countries want them to stay poor, merely so that they themselves can continue their profligacy. ing countries believe they now have goods to offer - more bon-dioxide - that the rich want still more than they do.

Rio is just a start to the hard bargaining ahead. If environ-mental market failure is, in fact, as great a problem as many now believe, a world as divided as ours seems unlikely to deliver a solution.

The myth surrounding vocational training

From Ms Lesley Ellis. Sir, May I express my amuse ment at your article "Vocational tests body comes under attack" (May 28). Part of the problem in this debate is that everyone is trying to compare

apples with pears.
The competence-based approach quite rightly (if you are an employer) insists that the key issue is that an individual demonstrates his or her ability to do a particular job competently. It recognises that, to do so, the person needs some theoretical knowledge, but it focuses primarily on the acquisition of appropriate skills. How sensible!

The traditional academic approach quite rightly (if you are trying to develop an aca-demic) concentrates on giving a large amount of knowledge but training the student in a limited range of skills, primarily research, analysis and argu-

Unfortunately, somewhere along the road a lot of business training was developed using the academic model. The competency approach is demon-strating just how poorly the other translates into practical skills. This is the real cause for all the academic sound and

continued with the woolly thinking and typical British snobbery that has dominated this debate. It implies that it is strange to consider a set of practical competences, including handling documents and answering phone calls, as equivalent to a GCSE.

As both a graduate in phys-ics and an experienced man-ager, I find no difficulty in recognising, the breadth of competences defined by the Management Charter Initiative level 1 (NVQ level 4) for example, as broadly equivalent to my degree course.

Yours is a respected newspapropagate the myth that the ability to demonstrate academic knowledge is much effect on empty properties and the liability itself reduced | liability following a three in 40 per cent followed by fur | month period of grace after to 40 per cent followed by fur-ther phased reductions. Unless action is taken, this highly destructive process of "stripping out" is bound to continue. Such a situation does little to

more difficult or important Rationale for European than demonstrating a range of administrative, managerial or Central Bank in London practical skills.

From Mr David Courtney. Sir, The siting of the proposed European Central Bank is already becoming a subject of profound and widespread debate across Europe and is one which will intensify over the coming months. One cen-tral issue, agreed upon unani-mously, is that the ECB must be immune from political interference in order to be truly

effective. With this in mind, it should be made clear that although the ECB should be politically independent, it cannot be inde-pendent of the financial markets themselves. As such, to locate the ECB anywhere other than in the best-equipped financial centre would, by definition, be a triumph of politics and would deleat the very

basis of this principle. in terms of the derivatives markets, London and Liffe must be considered to be in an unassailable position to accommodate the prospective activities of the ECB and is clearly able to demonstrate its advantages over its contemporaries As initially, the ECB will only be active in interest and forelgn exchange rate management, the primary derivative instruments underlying this activity will be short-term Ecu interest rate futures and

Given that Liffe is the only exchange upon which this con-tract is listed at present and that Liffe also lists similar contracts on several other European short-term interest rates. its aggregate volume is vastly superior to any other European

derivatives exchange.
The DTB in Germany has no short-term interest rate derivatives listed, whereas the Matif in Paris, which is the second largest exchange in Europe in this respect, traded in 1991 the equivalent of just 25 per cent of the total turnover of the European interest rate contracts recorded on Liffe.

This being true, the home of the ECB, so far as the derivatives markets are concerned. can surely only be based in

18ct yellow gold - £4,250 stainless steel — £1,175 Prepare yourself for a flight of fancy that had its start half a century ago, in 1940, to be exact. with the world's first pilot's watch. This fabulous flight continued with the Mark XI (1948), its successor. It was and is held in such high esteem that current collectors' prices are likely to bring you back to terra firma in a hurry. Our new pilot's chronograph is the logical consequence of a line of famous predecessors: outstanding exterior styling in the round, the toughness of a true pioneer, and a set of construction principles that even connoisseurs of IWC watches wouldn't have thought possible. Characterizing as worlds apart the difference between our pilot's chronographs and other watches aspiring to the same lofty goal, has become a virtual tradition to which our new model is happy living up to.

OBSERVER

Step in the right direction

■ Anglo American, having long resisted token appointments of blacks to its board, has now leapt into the deep end by making sociologist Dr Mamphela Ramphele a non-executive director.

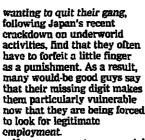

While Angle is doubtless pleased about the symbolic on the board, there is nothing tokenistic in the appointment Indeed, chairman Julian Ogilvie Thompson's comment that she "would bring a new aspect to our deliberations' is an understatement. Ramphele, a close friend of

martyred black activist Steve Riko, who died in police detention in 1976, is a formidable personality, likely to subject Anglo's corporate practices to gruelling scrutiny Indeed, the dialogue between her and Anglo hard men like Graham Boustred and Lesley Boyd would be worth paying good money to listen to

A deputy vice-chancellor at Cape Town university, Ramphele made her name as co-author with Dr Francis Wilson of an acclaimed study on poverty. She has been helping Anglo in research to define affordable programmes to alleviate hardship.

The company will have been liberalism, combining champlonship of the oppressed with the tenet that the state must not encourage a culture of entitlement. But will it be enough to stop those who want Angio broken up?

Hard graft ■ Reformed Japanese gangsters are finding it hard to convince potential employers that they can now toe the line. It seems that gangsters

However, an entrepreneurial doctor from the north of the country has offered to graft a toe in the place of the missing finger to make the problem less obvious. So far, 20 repentant mobsters have mended their ways.

Career paths

■ If Marcus Davison, a 42-year-old banker, had hung around at National Westminster Bank as long as young Derek Wanless did, then he too might have stood a chance of being group chief executive of Britain's second biggest bank. However, Davison, like most of the more ambitious young graduates entering British banking in the early 1970s, was bitten by and therein lies a tale.

Whereas Wanless, a contemporary of Davison's at NatWest, has risen farther and faster than anyone imagined, equally ambitious bankers such as Davison have kept on losing their commands. Davison's first port of call after NatWest was dear old Western American Bank, a casualty of the recession before last. He left before the ship went down but was less lucky last week when he lost his finance director's job after the the plug was pulled on DG investment

Can any reader beat Davison's unfortunate career record? All of the six banks he has worked for are now but a memory in the headhunters'

"I'm new here – what are we drawing straws for?"

files. The name plates of Davison's old employers such as European Asian Bank, European Banking Company, and Philadelphia National Limited, have long since disappeared. Indeed, Davison now wonders whether he should write to prospective employers asking them to make him a modest subscription in return for his promise never to darken their doors as an employee. With this sort of capital he should be able to start his own bank.

Right choice

■ When it comes to political infighting, Italy's bankers are almost as professional as their legislative neighbours. Hence there is some relief that technocrat Giuseppe Zadra has seen off the opposition and collected the directorship of Italy's bankers' association.

In many other countries the post would be regarded as a restbed for weary commercial bankers. But not Italy. At a time when the country's fragmented and inefficient banking system is on the brink of substantial change, Zadra will be in a powerful position

to influence the cause of sensible reform. He will not be as easily swayed off course by political undercurrents as ne previous incumbents.

During his seven years as head of the stock market division at Consob, Italy's stock exchange and companies' watchdog, the 51-year-old Zadra helped transform Italian equity trading. A fluent English-speaker he has been a tough defender of the new bourse rules against foreign

Tancredi Bianchi, the professor of banking who chairs the bankers' association, was so desperate to recruit Zadra that he reportedly threatened to resign himself, if his colleagues baulked at

Inflation

■ While there is no such thing as a recession-proof industry, canny investors might do worse than inspect the UK brassière market. According to the research organisation Mintel, British women spent £450m on 84m bras in 1991, up from £388m on 71m in 1989. The market is also changing shape. There is a "a swing towards the more glamorously styled, underwired bra", and the average size has gone up to 36C from 34B in just ten years. The manufacturers are putting the increase down to more exercise and the use of the pill".

Bird's eye view: A City Air Scandinavia jet has Canary Wharf in its sights as it approaches London City Airport on the inaugural flight from Stockholm — the first scheduled service from the city's Bromma airport in 13 years Picture, Glyn Genin

Hanson believes Canary Wharf project worth £600m at most

Houlder, Ivo Dawnay and

TWO potential corporate purchasers of Canary Wharf have separately concluded that the insolvent office project in London's Docklands is worth no more than £600m (\$1.1bn). Hanson, the Anglo-US conglom

erate, and P&O, the UK shipping and property group, would be likely to offer considerably less than that figure if either decided to bid for the development.

Canary Wharf was put into administration, a UK insolvency procedure, last week by Olympia & York, its Canadian owner. Hanson's and P&O's conclusions about the value of Canary Wharf emerged yesterday as the government's proposals to move government officials to Dock-lands came under fire from Westminster Council, central London

landowners and unions. They yesterday stepped up their lobbying of senior minis-ters,including Lord Wakeham, the lord privy seal, who is co-ordinating all government negotiations over Canary Wharf.

Lord Wakeham yesterday also met Lord White, chairman of Hanson Industries in the US and

Lord Hanson's partner.

According to one of Hanson's financial advisers, Lord Wakeham was told that Hanson would be interested in making a bid only if banks wrote off most of Canary Wharf's £1.2bn debts and the government proved flexible over O&Y's promised £400m contribution to extend London. Underground's Jubilee Line to

Lord Sterling, chairman of P&O, which has been closely involved in Canary Wharf's development as owner of Bovis. the construction company, would not consider putting in more than a few hundred million pounds of new money if it

to a financier close to P&O.

The opposition Labour party is set to press Mr Michael Howard, environment secretary, today to explain what criteria will govern any decision to move Whitehall departments or agencies and on the future of the Jubilee line. At a meeting of senior minis-ters chaired by Lord Wakeham,

Mr Michael Portillo, chief secretary to the Treasury, made clear any move could only be approved on grounds of value for money. Mr David Weeks, leader of Westminster Council, warned yesterday that an exodus of 4,000 government officials to Dock-lands could have a "very severe" mpact on the economic health of

ment offices are located. The run-down of the area could prompt other organisations to leave, probably for mainland

Victoria, where many govern-

Europe, he said. Central London property owners including Land Securities and

Chesterfield Properties yesterday

urged the government to put the health of central London before Docklands. "It should not take a decision for political expediency to the detriment of central Lon don and the taxpayer," said Mr Peter Hunt, chairman of Land

Securities.

If Hanson acquired Canary
Wharf, Lord White said, it would have an enormous property arm which would include 3,715 acres of land in the San Francisco bay area, 350 acres of land belonging to London Brick in Peterborough, in central England, as well as property attached to ARC, the UK-based building products group it acquired with Consoli-dated Gold Fields. Lord White said: "We are head-

ing into this as fast as we can. Our team is moving right away to see the administrator. This could be one of the most exciting projects. If we did acquire the development it would make a good fit with our property rede-velopment plans in the US."

THE LEX COLUMN

The accountants' audit

Judging by yesterday's figures from the big UK accountants, the Accounting Standards Board has a strong case for extending its brief. As usual, the various partnerships declined to vol-unteer how much they profited from the vicissitudes of their clients. The largest among them quietly slipped in a prior-year adjustment to give the appearance of a flat performance, when the truth was slightly worse. Legal obligations aside, when it comes to disclosure they are up there with

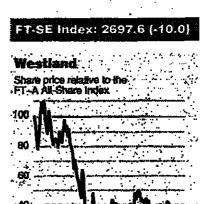

the worst of their clients. All the same, one gathers that accountants are not much different from other service companies. Granted, they were late into this recession, while their greater diversity of operations gave a degree of protection at group level – Arthur Andersen increased fee income in its consulting business by 30 per cent. More generally, UK demand for insolvency and tax advice was steady enough to offset some of the pressure on the basic audit business, while corporate finance for smaller companies was surprisingly resilient.

Nevertheless, lower corporate activity and increased competition led to some painful adjustments last year. Price Waterhouse, for example, reduced its UK cost base by nearly £30m. In the absence of recovery among its clients, it is unable to rule out a further round of cuts. But until they disclose profits, only the partners will know whether they are doing a

Westland

Westland's days as an independent company may be numbered. But there is still time for those analysts and institutions who wrote the group off as a basket case to have another look at the shares. Yesterday's 11 per cent advance in interim pre-tax profits was an impressively solid performance and demonstrates that the bloated cost base has finally been brought under control. Margins improved in all divisions, but most notable was the way the fall in helicopter profits was kept to just 16 per cent, when turnover from this activity dropped 30 per cent. Helicopter deliveries are currently running at just 10 a year, a sixth of the level in the mid-1980s.

The bull argument is that Westland is in the middle of a trough from which it will emerge triumphant in the middle of this decade. Its Sea King and Lynx will keep profits ticking over for the next couple of years. Thereaf-

ter the market for the EH101 could be enormous. The Ministry of Defence order is in the bag, but the Italians and Canadians, as well as North Sea to buy. Add in the possibility of a Black Hawk order from the Saudis and the huge civil order book on the aerospace side, and the shares more than justify their current year multiple of

The trouble with all this is the tim-ing. The EH101 may occupy an attrac-tive niche in one of the few defence sectors which is growing. But until the overseas orders start to materialise the market will doubtless treat the company's ambitious long-term forecasts with some scepticism.

Electricity

Until the government decides just how it intends to privatise British Coal, there will be rich seams of confusion to mine. It is pertinent, all the same, to ask what the rumoured quashing of the so-called dash for gas might mean for the UK electricity industry. The short answer is relatively little. Arguably, the majority of planned gas stations will never be built anyway, either because they will not be given permission or, more simply, because there is not gas to go

A more complicated response concerns the consequences for the two generating companies. On the face of it, they would lose out because their dependence on coal would remain uncomfortably high. In reality, the impact would probably be rather more favourable. Assuming Mr Michael Heseltine steps in, the generators'

market share will gain a degree of protection as competitors fall away. They would also be spared the capital cost of at least three large gas-fired power stations. In the case of National Power, that could leave up to £500m of cash looking for an alternative use.

Perhaps most important, the general tors' hands might be strengthened in negotiations over future contracts with British Coal. They could extract a higher price for agreeing to take more domestic coal, helped by the knowledge that the government might also be making plans to dispose of its remaining 40 per cent stake in them.
Thus, the market was probably right to mark the generators' shares higher vesterday.

US economy

So far it looks as though the strong personal income/consumer spending patterns and weak output/employment tronds which marked the first quarter in the US will be reversed in the sec-ond three months. While yesterday's jump in the widely watched US pur-chasing managers' index for May to some extent merely makes up ground lost in April, the advance is neverthe less consistent with a relatively robust manufacturing recovery. It also suggests that the US is well ahead of the UK at this stage in the cycle. All six components showed good gains, with the employment number bolstering hopes that Friday's eagerly awaited official May job statistics will show an

Sears

Sears' executive pay remains modest by the standards of Burton under its old management: according to its latest annual report and accounts, the entire board received emoluments worth a mere £1.6m last year. It is nevertheless curious that this was a 35 per cent increase on the previous year. Sears' pre-tax profits fell by 45 and 37 per cent in the last two years respec tively, so there was little by way of performance-related pay in the direcಷ್ಟರ್ಜೀಕ್ ಚಿತ್ರ ಚಿತ್ರಕ್ಕೆ

Affe China cannect

Main His issue

÷.

The explanation lies in a series of boardroom expansions and reshufflings during the year, including an unfortunate six-month period when there were two chief executives on the pay-roll. Investors will doubtless watch with interest what happens to directors' pay if the group's muchvaunted recovery finally gets under

over EC review

By Robert Thomson in Tokyo

THE Japanese government, in an unusual show of anger, plans to send a letter to the EC this week to complain that a recent Commission review of relations was "one-sided" and "inappropriate".

The letter, still in draft form, uses far tougher language than the usually understated Japanese comments on foreign policy

The Ministry of Foreign Affairs argues that a Commis-sion review of relations, delivered late last month, should have enhanced the relationship between Brussels and Tokyo but instead was "discouraging".

Japanese anger stems from the Commission's stress on economic issues and from the tone of the report, which, for example, says the EC "must convince Japan" to cut its trade surplus and that direct talks may be needed to open its markets.

The degree of Tokyo's irritation also reflects a deeper frustration with the Commission's policies and, in the view of Japanese officials, its neglect of opportunities to improve political and cultural ties.

Japanese officials argue that bureaucrats in Brussels have not noted improvements in the country's bilateral links with individ-

Commission report breaches the spirit of a Japan-EC Joint Declaration signed last year and

intended to broaden the relationship beyond economic issues. The EC reluctantly signed the declaration, after first demanding that it be preceded by a more balanced trade relationship.

"Japan had expected the [Commission] communication to be a positive message, reflecting the on-going co-operation between Japan and the EC based on the Joint Declaration," a senior foreign ministry official said.

However, the communication raises the concern that it could rather be counter-productive in promoting the spirit of co-opera-tion growing between Japan and

the EC," he added. The Tokyo letter will suggest that parts of the document are "revisionist" - implying that Japan is different from the rest of the world and needs to be treated as such, particularly by trade negotiators attempting to

improve market access. Tokyo is sensitive to this accusation. Japanese officials believe that it can undermine the country's acceptance by the international community and, in certain

forms, is little more than racism. The letter will also argue that, if the EC wants to redress the trade imbalance. EC companies should expand their exports.

Tokyo to complain German industry's Eurofighter 'error'

GERMANY'S aerospace industry made serious tactical blunders in its campaign to participate in building the European Fighter Aircraft, and now has virtually no chance of winning support for the project in the Bundestag, according to a leading parliamen-

tary defence spokesman.

Mr Werner Hoyer, the defence expert for the Free Democrats, warned that the issue would be decided on an emotional, not factual, basis. He is a member of the six-man working group which met last night to recommend the degree of Germany's future participation in the joint project to build a sophisticated fly-by-wire fighter aircraft with Britain, Italy

and Spain. interviewed before the meeting, Mr Hoyer said that in the present climate of budget cuts there was no hope of putting together a parliamentary majority in favour of allocating more funds next year

to the EFA project.
The disagreements about the aircraft within the governing German coalition were made clear yesterday when two leading politicians differed fundamen-

tally on what should be done. Mr Erich Riedl, a member of the Christian Social Union (CSU) and state secretary in the Economics Ministry, said tens of

aerospace industry would be lost if Bonn pulled out of the project.

The opposite viewpoint was put by Mr Peter Hintze, newly appointed as secretary-general of Chancellor Helmut Kohi's Christian Democrats (CDU). Mr Hintze said the Eurofighter project was not appropriate "in the changed financial and security situation in a united Germany".

The CSU succeeded in having a decision on the project deferred, with tomorrow's joint meeting of the CDU/CSU parliamentary

group postponed to June 16. But Mr Hoyer believes that, in spite of the delay, the late of German participation is sealed.

"The decisive point in our report is whether the working group recommends, or whether the defence minister recommends, allocating some DM100m (\$61m) in the 1993 budget for preproduction costs [for EFA], to purchase the tools needed for

later construction," he said. "The decision to put this into the budget will be seen as a point of no return. But there is no majority in the Bundestag in

"It is a catastrophic mistake by the German [aerospace] industry to have insisted on this. "They thought they could get a positive decision now, and that

was a huge mistake."

Leading South African group raises dividend on hopes of economic recovery

nglo American rises 15% to R2.45bn

By Philip Gawith

ANGLO American Corporation, South Africa's largest company, yesterday signalled optimism about the prospects for an eco-nomic upturn by lifting its dividend 6 per cent on the back of maintained earnings for the year to the end of March.

Mr Julian Ogilvie Thompson,

ground of a quiet world economy and weak commodity prices. The result was testimony to the strength and diversity of the group's interests, in terms of location, commodities and industry, he said. Pre-tax income rose 15 per cent to R2.45bn (\$865m), consisting

mainly of R1.65bn investment income, R507m trading income, and R222m surplus from the realisation of investments. The increased surplus on real-

chairman, said he was pleased with the results given the back-

isation of investments, up from R47m in 1991, is the result of the sale of a number of holdings. The R630m realised from the sale of large stakes in First National Bank and Gencor was treated as extraordinary income, with R500m set aside as a general provision against the carrying value of investments and loans.

Although attributable earnings were 20 per cent higher at R1.68bn, helped by the investment surpluses, the retained

earnings of associate companies dropped by 22 per cent to R927m, leaving equity accounted earnings marginally higher at R2.61bn, from R2.59bn.

A break down of earnings shows the main contribution -24.5 per cent - coming from dia-monds. Last year diamonds contributed 29.1 per cent. Other contributions came from mining finance (21.6 per cent), industry and commerce (14.3 per cent), gold and uranium (9.4 per cent),

platinum and base metals (9 per cent), financial services and property (8.5 per cent) and coal (6.4 per cent). Investment surpluses and other net income contributed 6.3 per cent (against 0.3 per cent).

Mr Ogilvie Thompson said he was optimistic that there was scope for an upturn in the South African economy. He expressed disquiet, how-

ever, at possible plans for mass action announced by the African National Congress saying these

would not accelerate a political settlement, but would delay an economic upturn.

In terms of commodity prices, he said Angio American felt gold had bottomed, diamond retail sales looked like they would be higher than in 1991 and there were also signs of an upturn in steel and alloys sales.

Attributable earnings per share rose to 724 cents from 604 cents and the dividend was lifted to 345 cents from 325 cents per share.

Dunhill buys Karl Lagerfeld business

By William Dawkins in Paris

MR KARL LAGERFELD, the German designer who is one of the brightest stars of French fashiou, yesterday agreed to sell his business to Dunhill Holdings, the British luxury goods group. Lord Douro, chairman of Dun-hill, said he paid "less than

FFr160m" (\$29m) to buy Karl Lagerfeld from Revillon Luxe, the privately owned French group which used to control it. The Karl Lagerfeld business, which includes a Paris-based haute couture house, a shop on the exclusive Rue du Faubourg St Honoré near the Elysée pal-ace, the French company's trade marks, a franchise and a net-

work of foreign boutiques. In return, Mr Lagerfeld has agreed to again become designer for Dunhill's Chloé ready-to-wear shion business, acquired by the British company in 1985. He will esent his first Chłoé collection in October, said Lord Douro. Mr Lagerfeld used to work for

Dunhill took over. He was hired by Chanel where he is credited with having restored the group's image and fortunes. It is understood that he will continue to design collec-

Chloé in the 1970s but left when

tions for Chanel. "This acquisition is evidence of our strategic objective to have a significant investment in the female luxury fashion market

worldwide," said Lord Douro. "We look forward to further growth in the Lagerfeld and Chioé brand names over the coming years," he said. Both brands' distribution and franchise net-

works would be enlarged. There would be no senior management changes, so that Mr Ralph Toledano would continue as Karl Lagerfeld's managing director and Mr Jean-Claude Pledelievre will stay on as Chloé's managing director, said Lord

Several leading Parisian fashion houses are believed to be incurring losses, after two years' of recession, worsened by the temporary blow of the Gulf war. Like most of its French competitors, Karl Lagerfeld does not publish results. It would be surprising if it were not affected by the fashion industry downturn.

Dunhill also owns Mont Blanc pens and Hackett, a chain of classic English clothing stores, as well as marketing its own brands of accessories and

Christian Dior, the fashion

house which was floated on the Paris stock exchange last year, yesterday reported a 12.3 per cent net profits increase for 1991. The group, owned by Mr Bernard Arnault's Financière Agache holding group, made FFr902m net. Operating profits rose from FFr5.89bn to FFr6.53bn.

Coca-Cola is pouring resources into the former communist countries in a battle for market share, writes Guy de Jonquières s the countries of the for-

A mer Soviet Union and eastern Europe adjust to life after communism, Coca-Cola, the world's largest soft drinks company, is pushing ahead aggressively with plans to turn them red again.

Gdynia, on Poland's Baltic coast, has just been given the treatment. Dozens of Coca-Cola salespeople dressed in the company's scarlet livery swarmed through the city brandishing scarlet promotional material to mark the opening on Sunday of the first of several new Coke bottling plants in the country.

The plants are important in

Coca-Cola's efforts to come from behind in the battle for eastern Europe's markets, where PepsiCo, its smaller US arch-rival, has long had extensive operations and sells up to three times as many soft drinks. Only in Yugoslavia does Coke out-sell Pepsi. Nor is Pepsi standing still. It is stepping up investments to help its more than 60, mainly state-owned, bottlers modernise and to strengthen distribution, sales and marketing. Ms Susan Hooper, Pepsi's marketing direc-

tor for eastern Europe, says com-

petition is so intense that a regional "cola war" is looming. For both companies, the potential looks almost limitless. Per capita consumption of soft drinks in the region is far below western European levels, and western products are a fraction of total sales. "Clearly, these will be among our fastest-growing markets anywhere," says Mr Neville Isdell, president of Coke's Northeast Europe/Africa division. "In percentage terms, growth will be

Coke's first big move was in eastern Germany, where it dispatched an advance team soon after the Berlin Wall fell and aims to invest more than \$450m (£250m). More recently, the company has turned further east. announcing a string of deals and further investments of almost \$1bn in local bottling, distribution and marketing

Pepsi refuses to be impressed by such figures. "Til believe them when I see them," sniffs Ms Hooper. "Coke sometimes tends to add a couple of zeros to its sums." Nevertheless, Coke's ambitions are exceeding even its resources, prompting it to search out partners wherever it can find them. Hungary and Czechoslovakia have been entrusted to Coca-Cola Amatil (CCA), a 51 per cent-owned Australian affiliate which runs Coke's operations in Austria, while Coke's bottler in Greece is handling Bulgaria and Romania. Coke has also signed deals in the former Soviet Union.

Coke's sales are rising fastest in Hungary, where CCA has two bottling plants. But the biggest short-term target is Poland, where a five-fold increase in production and investments of \$150m are planned over three years. Coca-Cola will split the some operations.

A new red flag flies over eastern Europe

Coke on stream: Donald Keough, president of Coca Cola, opening a bottling factory in Gdynia on Sunday, part of a \$150m investment over three years to boost production in Poland fivefold

in the past, most east European sales volumes, like Pepsi's, to its willingness to engage in countertrade, and allocated production to state-owned bottlers who neither knew nor cared much about the business. Unlike Pensi, Coke has chosen to sever many traditional business links and start again

ut finding suitable sites for new plants in countries where property rights are often hazy and there is no real property market has not been easy. Nor has acquiring existing businesses been exactly

In the Czech republic CCA was allowed to buy a state-owned bottler only after agreeing to donate funds to the Prague zoo and to a research institute. What it got was an over-engineered plant with a defective water purification system which needed to be completely re-equipped.

Though Coke flies in expatriates to support its fledgling east European businesses, it wants them to become entirely locally managed, All 230 permanent staff at the Gdynia plant are Poles or Polish speakers, and it is run by a former general manager of a local shipping line.

Coca-Cola starts with a big advantage - one of the bestknown international brands in eastern Europe. So much so that the company - unlike Pepsi, which is still widely viewed as a local product - sees no need yet for television advertising.

"Putting cold bottles on shelves is the best marketing we can do," says Mr Isdell. "We don't have to costs with Ringnes, its Norwe-gian bottler, which is helping run ask ourselves if our product will sell, only how do we get it to the

That involves more than build- it first six months in Poland governments tied the company's ing modern plants. The biggest retail customer turnover reached challenge is to build up what

Coca-Cola calls "the system" the developed distribution, marketing and service network, its most powerful weapon in the battie for retail mistomers Trained sales and delivery staff in brightly coloured Coca-Cola

trucks are already roving the streets of east European cities.

For retailers long accustomed to surly and unreliable stateowned suppliers, the experience is a revelation, says Mr Isdell: "When our people say they'll be back with more stocks next Friday, shopkeepers are amazed." More of a problem is finding reliable customers. Coke says that in 60 per cent, though conditions have since begun to stabilise. Initially, Coke is pricing its products at only two thirds the

level in west Germany. However, as trade barriers with the EC fall. it expects to raise prices to pre-vent "parallel" imports of cheap east European Coke streaming

But right now the flow is all the other way, as Coke continues to pour in resources. Mr isdell is coy about when the investments will show returns. "We take a long-term view," he says. "None the less, we will have profitable operations in each country within three years of start-up."

Accounting change lifts **Carlsberg**

By Hilary Barnes

CARLSBERG, the brewery group, reported a 7 per cent increase in pre-tax profits, from DKr623m to DKr670m (\$108.4m), in the half year to March 31. However, the interim statement said all but DKr10m of the increase came from changes in accounting principles.

Operating profits were ahead by 27 per cent, from DKr385m to DKr491. Factors in the improvement were continued rationalisation of Danish brewing operations and the disposal last summer of the loss-making Spanish brewery, Union Cervecera.

Net interest income fell from DKr231m to DKr189m, taking profits before extraordinary item**s from DKr6**16m last year to DKr680m.

Sales declined by DKr29m to DKr4.70bn. In the absence of unforeseen events, pre-tax profits for the year are expected to be on a level with last year's DKr1.23bn, said the statement. Accounting principles were profits in associated companies. **Earlier**, only dividends from associated companies were

included. The interim statement said that it is taking longer than expected to obtain approval for the merger of the UK brewing interests of Allied-Lyons and Carlsberg, which was proposed last October.

The UK Mergers and Monopolies Commission is due to hand its recommendations to the Department of Trade and Industry on June 12, said Mr Michael Inul, a member of the board of management vesterday.

This announcement appears as a matter of record only.

Viag sees higher profits and hopes to lift payout

By Christopher Parkes in Bonn

VIAG, the acquisitive German conglomerate, yesterday forecast a further rise in profits this year and its ninth consecutive

dividend increase Meanwhile, it is to continue its vigorous expansion and plans to spend around DM2bn (\$1.2bn) a year on investment in growth, according to an interim report published yesterday.

Viag's latest acquisitions in packaging and motor components helped it to record a 26 per cent rise to DM6.15bn in group sales in the first quarter and a "modest" but unspecified rise in operating profits.

The company confirmed net earnings for 1991 of DM405m and Canada, yesterday that the proposed a DM9 dividend, group's expansion strategy, based

and a payout of DM8.50 the previous year.

Improved results in the current year would allow this dividend policy to continue, it added. Viag draws around 50 per cent

of its earnings from its stakes in German electricity and gas companies, and another 40 per cent from aluminium and packaging. The company said it was currently negotiating to buy a majority stake in Debrunner-Koenig, the biggest steel trader in Switzerland.

to take a majority in another steel concern, Metalpo of Italy. Mr Alfred Pfeiffer, chairman, told shareholders in Quebec,

Last month it concluded a deal

compared with profits of DM336m on taking 51 per cent holdings in compatible groups, had so far proved very successful.

It spent DM115m on such moves in the first three months of this year, compared with DM3m in the first quarter of 1991. Acquisitions last year accounted for around half the total DM4bn investment budget. Future core business areas highlighted yesterday include packaging, chemicals, motor

Following last year's acquisition of Continental Can Europe, Vlag - which already owned Gerresheimer Glas - has become one of Germany's leading packing groups. Group sales have increased four-fold since the government disposed of its 60 per cent stake in 1988.

components and health foods.

INTERNATIONAL COMPANIES AND FINANCE

Air France and Lufthansa shy from hotel deal

By David Waller in Frankfurt

AIR FRANCE and Lufthansa of Germany have pulled back from plans to merge their hotel operations. The airlines mphasised the merger when they announced plans for closer co-operation in the hotels business at the end of

Lusthansa said yesterday some form of merger between Lufthansa's Kempinski hotels and Air France's Meridien hotel chain was still an objective. However, co-operation at this stage would be limited to a marketing agreement whereby the parent airlines market each others' hotel subsidiaries. Lufthansa said if this worked

out it planned to take the second step of combining the shares into a mutual holding company. However, it said there was no timetable for such a merger. If it happened,

Recession, competition hit top UK accountants

By Andrew Jack in London

RECESSION and competition sharply reduced fee income growth in most of Britain's largest six accountancy firms, according to figures for the year to April 1992 released yesterday.

Coopers & Lybrand remained the largest UK firm with fee income of £577m (\$1.04bn) in the year to April 30, but also registered the only absolute decline, with revenues down by 1.87 per cent.

All the top firms except Arthur Andersen cut professional staff, including partners, by between 7 per cent and 10 per cent, reflecting the widespread redundancles in the past few months.

Income from three of Coopers' divisions - audit, management consultancy and tax - all declined, while insolvency income rose by 16 per cent. But the firm said last year's reported £588m income had been adjusted downwards to £577m, reflecting difficulties in calculation after the merger with Deloitte Haskins & Sells. The name Deloitte was

Swiss business opens its doors to the world

Ian Rodger looks at rapidly changing attitudes among the country's company directors

ScarceLy an eyebrow was raised in Swiss business circles when Ascom, the telecommunications equipment group, revealed last week that a majority of its capital was held by non-Swiss.

And the group's announce-ment that it proposed appointing a German and an American to its board of directors drew only muted reaction.

A few years ago, such developments would have provoked shock and dismay in Switzerland's introverted business community. With a mercantile culture uncapnily similar to Japan's, Swiss industry thrived for a long time by attacking markets all over the world while keeping most operations at home. Ownership and top management posts remained exclusively in Swiss hands.

In the past few years, how-ever, top Swiss industrialists have recognised that being international now requires more than having sales offices abroad. And this year the pace of change has accelerated sharply. Among the big companies and banks, cases of exclusively

Swiss boards of directors are now the exception rather than the rule. And many companies are actively encouraging for-eign ownership of their shares. Swiss business leaders seem to be making these changes with their eyes open. "Our responsibility is to run an international group called Sandoz, not to stick to our roots," says Mr Rolf W. Schweizer, group vice-presi-dent responsible for strategic

planning at the big Basle-based

Mr Schweizer says it was

pharmaceutical group.

even possible that Sandoz would one day move its headquarters out of Switzerland. especially if some Swiss hostility to some types of pharmaceutical research continued.

For now, what is noticeable is that Sandoz and other leading companies are aggressively building up operations abroad

while just ticking over or cut-

Nestlé, which has hitherto

concentrated its group man-

agement in Vevey, revealed recently that, in the wake of its

takeover of Source Perrier, it

would locate the headquarters

of its mineral water operations

in France. Sandoz is expanding

drug production in Ireland and

the US. The big Swiss banks

have shifted large chunks of their capital market operations

out of Switzerland to London

The changed focus often

shows up through big foreign

acouisitions. The engineering

group, Brown Boveri, led the

way in 1987 with its huge

merger with Asea of Sweden.

Roche basically moved its bio-

technology research effort

from Basle to the US when it

bought a controlling stake in

foreign ownership of their shares.

last year. The group, which a

few years ago was largely

dependent on the Swiss state

posts and telecoms authority for its revenue, is aiming to

make 70 per cent of its sales

abroad by the end of the cen-

The reasons for these moves

Probably the most impor-tant is that the Swiss-skilled manpower pool is no longer sufficient for the

needs of the international com-

panies. This is particularly the

case in high technology fields and the fast-moving financial

specialities, such as the design

and trading of derivatives. Yet

companies and banks find it

increasingly difficult at a time

of rising unemployment to get

permits for foreigners to live

• In the past, Switzerland's

neutrality and its laws provid-

ing solid protection of intellec-

tual property were strong

incentives to keep research.

and work in Switzerland.

tend to be the same.

development and production inside the country, but these characteristics are no longer as unusual or important.

• The cozy Swiss capital markets, which used to be adequate for most companies' needs, are in decline and can no longer provide the large amounts of capital on the

internationally competitive

terms that big companies

demand. Thus, they have

had no choice but to open

their share registers to

foreigners and meet the tough

in distress, as in the case of the rescue organised last year by the big banks for the armaments and engineering group. Oerlikon-Bührle.

not remains to be seen. In the

past, the close-knit Swiss busi-

ness community has usually

closed ranks to save a member

As companies become more cosmopolitan, this sort of community spirit is likely to

The Swiss media already feels betrayed. It roundly criticlsed Ciba-Geigy, the pharmaceutical group, and CS Holding, the parent company of Crédit Suisse, for holding their annual press conferences last month in London rather than

in Switzerland. And the new chairman of Société Générale de Surveillance, the Geneva-based inspection group, has been attacked for replacing some of the group's Swiss directors

the centrifugal trends are unlikely to be reversed They might slow a bit if Switzerland joins the European Economic Area (EEA), the new free trade association between the European Community and the seven countries of the European Free Trade Area (EFTA). EEA membership would require the country to permit free entry of people and capital from other EEA countries, and to exempt EEA nationals from the Lex Fried-

crucial to their Swiss status for However, this liberalisation The inevitable effect of these trends will be to dilute the "Swissness" of the companies. Whether that is a good thing or

n spite of this grumbling,

would not come into effect until 1998, and most companies seem to feel they cannot wait

DG Bank to restructure overseas operations

By David Waller

DEUTSCHE Genossenschaftsbank, the central bank for Germany's co-operative banks, is restructuring its overseas operations.

After rationalising its domestic activities, the financiallystretched bank has decided to close DG Finance in Paris DG Investment Bank in London and New York, and a securities interest in Singapore.

Buyers will be sought for two other operations, one in London and another in Amsterdam. In future, securities business will be managed from the bank's Frankfurt

headquarters.

Together with other rationalisation in commercial banking, these closures are likely to lead to the loss of around 180 jobs out of the 780 currently filled in 14 overseas centres. This will contribute to the total 800 job cuts the bank wants to make within the next five

To build up its commercial banking operations overseas, the bank intends to open representative offices in Madrid, Milan and Paris. It also plans to intensify its business in eastern Europe and Turkey with its existing joint venture partners in the region: representative offices are likely to be opened in

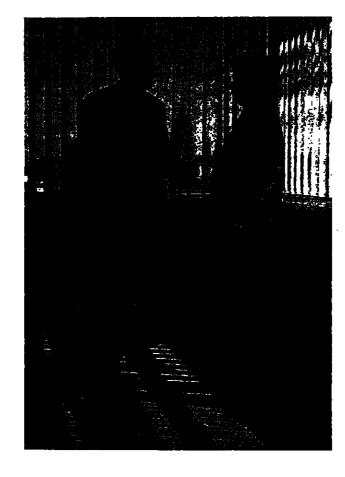

Warsaw, Prague and Budapest. The person behind moves to tighten the overseas network is Mr Bernd Thiemann, chief executive since early 1991, who

outlined his plans in October. Under his predecessor, the bank became involved in a complicated dispute over bond and sale agreements with French banks, leading to heavy write-downs. In October DG Bank announced a DM1.4bn cash injection.

Hoesch approves Krupp merger

THE SUPERVISORY board of Hoesch, the German steelmaker, has formally approved its merger with steel and engineering group Fried. Krupp. AP-DJ reports from Dortmund. Krupp last year acquired a controlling stake of more than 50 per cent of Hoesch.

A meeting for both companics will be held on July 27 to approve terms of the share swap to complete the merger.

write-down on retained profits.

CSR in the red after A\$558m write-down

By Kevin Brown in Sydney

The state of the state of

CSR, the Australian sugar and building products group, yesterday reported a net loss of A\$385m (US\$291.6m) for the year to the end of March, after taking account of a A\$558m write-down of asset values:

Net profit before taking abnormal items into account fell by 46 per cent to

The loss was in line with expectations following earlier profit warnings and the publication in April of a ruling by the Australian Securities Commission (ASC) on the accounting treatment of the write-down.

CSR announced earlier this year it had written down the value of plant, equipment, goodwill and trademarks by A\$558m in order to comply with accounting standards requiring

Outboard Marine and Volvo in venture

VOLVO PENTA and Outboard Marine of the US are to form a new company to produce sterndrive and inboard marine power systems, AP-DJ reports from New York.

The companies said the new company would be owned 60 per cent by Volvo Penta, a unit of Volvo of Sweden, and 40 per cent by Outboard Marine, the world's largest producer of outboard engines.

The venture will develop and manufacture a new generation of advanced marine propulsion systems, and provide parts and after-market service for these and existing prod-

These products will be used in boats manufactured by Outboard Marine companies and will be marketed by Volvo Penta to independent boat manufacturers worldwide under its brand name.

The new company will acquire the existing Outboard Marine production facility in

Lexington, Tennessee. The companies said the agreement, subject to the approval of the boards of both parties and various governmental authorities, was expec-ted to be finalised by the end of this month.

Lawson Mardon 9% ahead in first quarter By Robert Gibbens

in Montreal

LAWSON MARDON, the international packaging group now controlled by Italian investment bankers Cragnotti Financial, posted a 9 per cent gain in profits for the first quarter despite the long North American recession.

Earnings were C\$6.1m, or 21 cents a share, against C\$5.6m, or 20 cents, a year earlier on sales of C\$309m (US\$257.5m), down 3 per cent.

Cragnotti is positioning cost the central bank \$15.8bn Lawson Mardon as the centre during the 1980s has gone of a plan to create a global packaging group with operations all over Europe and North America.

became a nightmare of fraud, tax department, they would refused to pay up, arguing they last year. He holds up the Kon-"sell" their tax credits at a diswere being made to pay for a corruption and arbitrary govcount. The "buyer" - invariably a multinational - could ernment that cost them about crime committed by others. They alleged that the DGI had An embittered executive now then reduce its tax bill by acted in bad faith. "paying" part of its tax bill The case reached the warns companies to "think five they large or small. with tax credits to the DGI at times" before investing in Although Mr Tacchi refused Supreme Court over a year ago. But it said that before it Argentina. He says: "You must their full face value. One of the biggest players in be very wary and mistrustful. could rule on the case, the the tax credit market was Konplaintiffs first had to comply That jars with Argentina's

style. John Barham in Buenos Aires reports

Taxing times for multinationals in Argentina

In 1983, companies such as Shell, Firestone and BAT Industries

entered the South American's government-sanctioned secondary

market in tax credits. But within five years, their experience

became a tale of fraud, corruption and taxation - Argentine

er-Salgado, an Argentine conglomerate. It sold over \$100mworth of credits over a six-year period.

But, in 1988, the DGI suddenly declared Koner-Salgado's credits worthless after investigators said the company faked investments to generate tax

The DGI then ordered Koner-Salgado's clients to pay back all the taxes they had "paid" with its allegedly fraudulent ut the multinationals

Begins to the fact that the DGI investigation took place in 1985, three years earlier. They say DGI officials supments in development zones in pressed the report, failed to that originated in those warn buyers of Koner-Salgado credits, and continued accepting the credits until the report ment from the DGI, the was leaked in 1988. bureaucratic and inefficient

At first the companies

with the DGI's tax demand of hundreds of millions of dollars. They could then try to recover the money by suing the DGI. A tax lawver explained that

the DGI's apparently arbitrary claim was based on legislation under which it could paradoxically rule a company was evading taxes even if it acted legally. This is because transactions are not assessed for tax on their legal "appearance" but on their underlying "real" pur-

The lawyer says: "The government is never wrong. It is like Big Brother. Argentina is a perverse country where something may be permitted one day and the next day it has become a crime."

Naturally, the government's view is rather different. The present head of the DGI is Mr Carlos Tacchi, a tax lawyer

er-Salgado affair as an example of his offensive against tax evasion, in which he does not discriminate between evaders, be

to be interviewed for this article, he has claimed companies knew the credits were false all along. He says that, like all other tax specialists - including the multinationals' advisers - he was offered commissions to push the deep-discounted credits.

r Tacchi, who is as honest as he is fero-ciously efficient at collecting taxes, implies that at best, companies were robbed by corrupt employees and advisers. At worst, they actively dodged taxes. Rather than begin long,

expensive litigation in a judicial system not known for its independence or impartiality, the companies decided to negotiate.

In the end, all but two accepted a compromise, their liability was reduced, and they were given five years to pay. But Firestone and BAT

the suspects were ever brought before entering government Industries' affiliate Nobleza-

GOVERNMENT OF PERU

Privatization of Empresa Minera del Hierro del Peru

The Government of Peru, through COPRI, the Commission entrusted with privatizing all state-owned enterprises, is initiating the process for the privatization of Empresa Minera del Hierro del Peru (HIERRO PERU), which is engaged in iron ore mining. Hierro Peru's mines are located in the San Juan area of southern Peru.
The Government is offering for sale its interest in Hierro Peru to an eligible

private buyer or consortium, which meet certain minimum requirements. These requirements are detailed in an "Instructions for Pre-Qualification" document which, along with an Information Memorandum, will be provided in an Information Package to eligible parties. The Government requires that eligible parties desiring to receive a copy of the Information Package, submit a letter of interest, which must be received prior to June 30, 1992.

In order to qualify to participate in the international bidding process, eligible parties will be required to show proof of meeting the minimum qualifications by July 17, 1992. Upon qualification, bidding instructions and access to additional due diligrange metagrals will be provided as a standard section. diligence materials will be provided to them.

Fujitsu to swallow rest of Poqet

INTERNATIONAL COMPANIES AND FINANCE

By Louise Kehoe in San Francisco

POQET Computer, a pioneer in the market for pocket-sized personal computers, is to become a wholly-owned subsidiary of Fujitsu and the vehicle for the Japanese computer giant's entry into the US and European personal computer

Fujitsu, which already holds more than 80 per cent of Poqet's equity as a result of a series of investments, is in the remaining portion which is owned by current and former Poqet executives,

The company was yesterday renamed Fujitsu Personal

Poqet stem from a long-standing business relationship with Mr Robb Wilmot, chairman of Poqet and the former chairman of ICL, the UK computer company now owned by Fujitsu. ICL is also expected to play a role in Fujitsu's expansion of European personal computer

The Poqet acquisition represents a strategic move by Fujitsu, said Mr Tadayasu Sugita, former general manager of Fujitsu's personal computer

division in Japan, who became

president of Poqet last year. The trend in reducing the size of computer technology, in which networks of personal computers are increasingly replacing larger minicomputers and mainframes, means it is increasingly important for Fujitsu to have a world-wide presence in the personal computer market, Mr Sugita

Although Fujitsu's Personal Systems Division in Japan recorded sales last year of \$2bn (that includes word processors and some consumer products). the company has yet to make any significant inroads into the international market.

The company will use Poqet's established US and European distribution and marketing operations as the

business relationship

"Poqet", a miniature personal computer, and Poqet's recently

Rob Wilmot: long-standing

basis for its market expansion. "That is the reason for Fujitsu's decision," he said.

Initially, Fujitsu will focus on the portable personal computer market with the tiny announced pen-computer will attempt to penetrate the

Ultimately, however, Fujitsu will address broader segments of the portable personal computer market, "after we have achieved a foothold and good

brand name recognition". • International Business Machines is to acquire a minority stake in Parallan Computer, a California computer company that specialises in network servers.

The IBM investment is part of an agreement between the companies to work together on development of servers and networking software.

IBM will obtain worldwide rights to market products developed by Parallan and future products developed by

the alliance. Mr Paul C. Mugge, vice-presi dent of development, IBM Entry Systems Technology, said: "We expect the IBM/Par-allan alliance to provide industry leadership in network servers this year and in years to

Warner declines to back Sony Mini Disc

By Patrick Harverson

in New York WARNER Music Group, a division of US entertainment giant Time Warner, has declined to commit its roster of artists to the new Mini Disc audio technology format which is being developed by Sony of

Mini Disc is a portable recording and playback system which Sony hopes will become the main successor to the ana-

The decision by Warner not

ever, deals a blow to those hopes. In order for Mini Disc players to succeed, Sony must offer a wide range of music titles to potential buyers when the product first enters the market later this year.

So far only two big labels, EMI Music and Sony's own music division, have signed up with Mini Disc.

Sony had hoped that Warner, with its powerful roster of stars, including Madonna and Rod Stewart, would prove an

would announce its commit- and of the digital compact casment to Mini Disc within a few

Warner, however, is reluctant to commit itself to the new digital technology which means either Mini Disc or its main rival, digital compact cassettes being developed by Dutch group Philips because of concern that new formats may crimp the growth of compact discs (CDs), and to a lesser extent, of cassette

important recruit. Only last week a senior executive at Sony predicted that Warner relative merits of the Mini Disc

Mr Robert Morgado, chairman of Warner Music Group, said: "Compact Disc is the pre-mier carrier for the music industry and we are asking manufacturers to assure us that their new technologies do not adversely impact CD's con-

tinued growth."
Philip's digital compact cassette format appears to have a head start on Sony's Mini Disc. It has won artist commitments from the music industry's six biggest labels time for the product's September launch.

Digital to lose 3,700 employees

By Louise Kehoe DIGITAL Equipment said that 3,700 employees in the US, including seven of the company's vice-presidents, would leave the company under an early retirement programme that began in March.

Digital has been trying to cut its payroll for two years in the face of losses and declining sales. It had about 119,500 employees when the retirein early March, against a peak

retirement programme has been stronger than expected. Digital offered retirement incentives to 7,200 US employees over the age of 50, expecting about one-third to accept. Further job cuts are expected.

For the first three quarters of fiscal 1992, Digital reported net losses of \$403.9m, including charges, on sales of \$10bn. It expects an additional charge, perhaps as high as \$1bn, in the current fourth quarter.

Digital said seven corporate officers would take early retire-

ment. They include Mr George Chamberlain, vice-president, marketing finance; Mr Henry Crouse, vice-president, strate-gic relations, and former presi-dent of the Open Software

facturing.

Foundation; Mr James Cudmore, vice-president, operations staff; Mr William Heffner, vice-president, image, voice and video products; Mr Robert Hughes, vice-president, US sales; Mr Albert Mullin, Jr., vice-president, corporate relations; and Mr Richard Yen,

vice-president, Far East manu-

of 126,000 at the end of 1989. Corona first-quarter earnings depressed

By Robert Gibbens

LOWER gold output and lower prices, combined with higher taxes, weakened first-quarter results of Canada's International Corona which is planning a merger with Homestake Mining, the US gold producer. Corona's earnings were C\$1.4m (US\$1.1m), or 2 cents a share, down from C\$6m, or 6

cents a year earlier, on reve-

nues of C\$64m, against C\$75m. Production was 169,000 oz. a fall of 10,000 oz because of the closure of two small Canadian operations. Average cash cost was US\$210 per oz, against US\$202, while the average price received was US\$370, compared

with US\$385. SEC approval for the merger has been delayed, reportedly because of accounting and val-uation differences between

Canada and the US.

The two companies would have annual gold production of about 1.4m oz and annual revenues of more than US\$500m. Homestake's experience in autoclave production would be applied to Corona's Canadian operations. Homestake would gain control of the Eskay Creek gold property in north-western British Columbia and Corona's interests in the Wii-

liams and David Bell gold

mines in northern Ontario.

Upjohn places freeze on wages, hirings By Martin Dickson in New York

UPJOHN, the US pharmaceuticals group, is implementing a temporary freeze on hirings and salary increases from today as it completes a

lengthy strategic review of the

A company spokesman said the policy review, designed to improve the company's operat-ing performance and margins, might be completed by the end of the month. Upjohn's shares have been subject to periodic Upjohn spokesman said yesterday that its "strategic vision" included the belief that it was "in the best interests of all stakeholders to remain an

independent pharmaceuticals company." Analysis noted that patents on three of Upjohn's leading drugs – including Halcion, the sleeping pill recently ban-ned in the UK – were due to expire in the next two years, suggesting Upjohn would need to clamp down on costs.

Rivals buy Steinberg food chain for C\$275m

By Robert Gibbens in Montreal

THE 75-year-old Steinberg food chain, a former North American leader in automated warehousing and manufacture, is

about to disappear from eastern Canada. Steinberg, opened in Mon-treal by Ida Steinberg, a Polish immigrant, in 1917, is being taken over by its rivals Provigo and Metro-Richelieu, for C\$275m (US\$231m). This

INTERNATIONAL COMPANIES AND CAPITAL MARKETS

Hong Kong groups lift their eyes across the border

Developers are making the most of pro-China fervour by building land banks, reports Simon Davies

CONTINENTAL Bank has named Mr Kenneth Cunningham to the newly-created position of managing director of financial risk management and trading products, Reuter

reports from Chicago. He will direct Continental's financial risk management activities as well as its trading in interest rate products and related instruments in Chicago, London and Tokyo.

bought for less than \$HK2,000 (US\$258) per sq ft. In Shenzhen, even after the recent price explosion, prices are half that. Analysts estimate that at least 60 per cent of units available for sale in Guangdong Province last year were sold to overseas Chinese buying holiday homes and flats. Special licences are necessary for overseas buyers, but these are eas-

ily circumvented. It is impossible to tell what will happen when this pent-up demand is satisfied since at present the mainland Chinese have very limited access to mortgage financing.

Developers have to face up to a chaotic system for obtaining planning permission. Henderson Land claims that only 40 per cent of the projects it has negotiated are likely to be completed and successful projects

progress very slowly. "Developers say that for every official stamp there is a bribe of as much as HK\$200,000. And you need around 20 stamps," said an analyst at Crédit Lyonnais

Most Hong Kong companies link with a joint venture partner which provides the land and pushes through the paperwork, while the foreigner pays for the construction. Often the China partner fails to obtain

good title for the land. Contacts are crucial, which is why manufacturing companies are in the forefront of the property boom. The industrialists have already built up connections in setting up their fac-tories in the Pearl River delta.

The shortage of regulations in China has one large advantage: a Hong Kong developer can pre-sell units before it starts work, thereby raising the bulk of the funds required to complete the project. But this obviously depends on the continuing strength of the

The key is timing, location and linking up with the right partner," said a developer. The crunch will be felt three years from now, when the proposed developments finally become

"I think it is going to take a lot more projects for the bubble to finally burst," said Mr Peter Churchouse, vice-president at Salomon Brothers. There are few statistics to show how great the supply will be, but it seems only a matter of time before that point is

## Enthusiastic response to French utility FFr3bn issue

ACTIVITY in the Eurobond market picked up yesterday, and is expected to remain buoyant throughout the week, with several new issues likely to emerge in a stronger Ecu bond market.

#### INTERNATIONAL BONDS

Among yesterday's offerings, Electricité de France, the French electricity utility, launched a FFr3bn issue due 2022, marking a further extension of the Euro-French franc yield curve from 20 to 30 years.

A month ago, Caisse Autonome de Réfinancement, the French government-owned agency, launched the first issue of 20-year bonds in the Euro-French franc bond market. Outside the government bond market, the longest duration available prior to the CAR deal was 15 years in the domestic market and 13 years in the Ruroboud market.

CAR transaction. Demand was concentrated among international institutions, which are currently bullish on both the French bond market and currency. Insurance companies, which like to match assets to long-dated liabilities, were particularly active buyers.

In addition, the rarity of 30-year paper boosted demand. Dealers noted the spread for 12-year EDF paper is a basis point or two wider than the launch spread of 36 basis points above the 30-year OAT offered by EDF's 30-year deal. For French borrowers which

require long-dated funding, the long end of the yield curve has obvious attractions, since the yield curve is virtually flat from 10 years to 30 years, so they can extend maturity without paying a higher yield. in the Ecu sector, Mobil Oil

Canada launched an Ecul25m five-year deal via Credit Suisse First Boston, targetted at retail investors. The deal is intended to catch an expected surge of demand for Ecu bonds this

Paribas, was rapidly sold out, week, if the Danes vote in repeating the success of the today's referendum to ratify the treaty on European monetary union signed at Maastricht by European government leaders last December. The Ecu bond market rallied as much as haif a point at the end of last week, as signs that Danes would vote for ratification relieved some of the political concerns which have been

dogging the market. A number of borrowers are preparing transactions, on expectations of a positive result for the market. France Telecom is planning an Ecu300-Ecu350m 10-year deal, while Caisse Nationale des Autoroutes is considering a nineyear deal of similar size.

Two Swedish borrowers. Riccirclux, the manufacturing company, and Spintab, the Swedish mortgage subsidiary of Swedbank, tapped the dollar sector. Electrolux brought a \$150m five-year deal via Lehman Brothers, while Spintab launched a \$300m five-year deal, due to be priced today, via JP Morgan. The Swedish National Housing Corporation

### Mexico embraces the international financial markets

N THE past 12 months around a dozen Mexican L companies have become significant players in the international financial markets, issuing billions of dollars in new stock and, in some cases, acquiring listings on Wall

Just a few years ago such events in Mexico would have

been thought of as laughable.

to buy the country's privatised banks from the government. Most Mexican companies were starved of capital during the 1980s. They are now having to invest heavily in a re-shape in order to compete under Mexico's relatively open trade

policy, and prepare for a North American free trade area. With foreign banks reluctant to lend directly, Mexican busi-

Damian Fraser on the share offerings and foreign listing which have made an impact on the country's business methods

Not surprisingly the speed and extent of the changes are having a profound effect on Mexican business methods.

The share offerings have been spurred by the large financing needs of industry which needs badly to catch up after a decade of weak capital investment if it is to make the most of the proposed free trade pact with North America. The trend started in May

1991 when the Mexican government sold 14 per cent of Telmex, Mexico's telephone monopoly, for \$2.17bn, most of it in American or Global Depository Receipts.

In all, Mexican companies placed about \$4.8bn of stock at home and abroad last year. This year \$3.6bn has already been raised and a further \$2bn could be in issue before the year is out.

Companies as diverse as Telmex, Vitro, Mexico's largest industrial conglomerate, and ICA, the construction company, are now listed on the New York Stock Exchange, with more to follow.

Foreign investment in Mexican ADRs is now short of

In part, the rush to sell stock abroad reflects the phenomenal rise of the Mexican stock market and the desire of existing owners to cash on the high earnings multiples being offered: and the issues have had to be international since the Mexican stock market is far too small to absorb all the paper on sale. The more so since more than \$11bn of Mexi-

can savings have been used up

ness has been forced to tap foreign money through equity or bonds.

At the same time the large public offerings of Mexican stock are forcing Mexican companies to face the discipline of the domestic and international equity markets, and meet much tighter reporting require-

This marks a particularly profound change in management styles. In the past, even some publicly owned Mexican companies were treated as little more than personal flefdoms, an approach which helped put many of the country's largest companies into virtual bankruptcy in the early

Mexican companies, prodded by the finance ministry, can see the benefits of giving up their freedom to run companies as they wish: going public. or being listed on foreign markets, cannot just reduce the cost of capital, but attract foreign partners that might otherwise shun a third world com-

Mr Arturo Trevino, the director general of Gigante, the supermarket chain, suggests that had it not been for his company's public listing, its joint venture with the US's largest wholesaler Fleming

could not have gone ahead. Similarly, Mr Hugo Jaime Garcia, who is head of banking relations at Vitro, says that his company's presence in global capital markets, while perhaps demanding in terms of investor relations, "reduces the aspect of Mexican risk". - - - - - - -

## Strong purchasing data trigger selling of Treasuries

By Patrick Harverson in New York and Sara Webb In

A MUCH stronger-than expected National Association of Purchasing Management's report triggered heavy selling of US Treasury securities yesterday, although late in the day prices recovered from their

#### GOVERNMENT BONDS

In late trading, the benchmark 30-year government bond was down 11 at 1011, yielding 7.887 per cent. The short end of the market was also markedly weaker, with the two-year note off 4 at 993, yielding 5.259 per

The rise in the NAPM's index for May from 51.3 the previous month to 56 was bigger than analysts' forecasts (which had centred around 54), and sparked an immediate sell-off as hopes for another interest rate cut from the Federal Reserve dwindled further.

The purchasing managers figures indicated the economic recovery may be advancing at a faster pace than bond investors initially realised. The data suggested that Friday's employment report for May could show an improvement in labour market conditions.

■ UK government bonds ended the day lower, taking their cue from the US Treasury bond market.

The benchmark 11% per cent gilt due 2003/07 fell from its opening level of 1182 to trade at 1174 by late afternoon, yielding 9.07 per cent. Short-dated gilts slipped by around & of a point, dealers said. The Liffe gilt futures contract fell from its opening of 100.02 to end the day at 99.23, but volumes in the futures market were lower than normal with about 15,000

contracts traded. The latest tap stock - the 9 per cent Conversion stock due 2000 - continues to overhang the market, and dealers estimate that only about £200m of the total £800m has been sold since it was issued on May 22.

TI GROUP, the specialist engineer, yesterday appeared to lose some of the momentum it has build up in its hostile £495m bid for Dowty Group, the aerospace company, after its target's share price fell in the market.

Dowty's shares fell 5p to 173p, below the 175p value of a cash alternative that II has offered shareholders. Coming just seven days before TI's final offer closes, it was the first time that Dowty's

share price had fallen below the cash alternative. Arguably it is the first time that Dowty has looked as if it stands a serious chance of

escaping from the confident TT's clutches. "There are plenty of things that can happen in the next week", said a Dowty adviser. "But the word I get from the market is that people are nothmg like as certain that TI is going to win."

II said that trading in the shares was thin and dismissed the price fall as the result of

Hawthorn

One option, as yet unused, is offer. for TI to buy shares in the mar-

ket. It is allowed to buy up to prices up to the 175p cash alter-

one small sale followed by native or up to 10 per cent of brokers marking down the Dowty's shares up to the value of the four-for-15 share

The share offer was worth 182.4p after TI closed yester-29 per cent of Dowty at day at 342p after a share

As the two sides traded interpretations of Dowty's share price move, the war of words continued over Dowty's estimated £29m pre-tax profit figure for 1992.

Responding to Dowty's confirmation that it will add a further £3m to this figure - from a cancelled Ministry of Defence contract - when it publishes preliminary figures on Friday, TI again attacked the quality of its target's earn-

"Dowty has attempted to bolster its profits with one-off receipts and credits and has yet to provide a convincing explanation for a higher than expected profits estimate." TI Before Dowty announced its

529m estimate, but after TI had declared its offer final, the market had been expecting profits of about 922m Mr Roy Roberts, Dowty chairman, wrote to sharehold ers saying TI's bid was "run-

ning out of wind". "Your board sees little or no premium in the level of the Tl

### Pacific Horizon hits out at manager Jupiter Tyndall

By John Authers

DIRECTORS OF Pacific Horizon, the investment trust, yesterday issued a strong attack on Jupiter Tyndall, its manager, which last month blocked an agreed takeover. Martin Currie Pacific had made an offer but Jupiter Tyndall assembled a 25.1 per cent r closed. Earlier this year the

This enabled it to block a resolution allowing for an improved version of the Martin Currie offer at an extraordi-

Directors said the actions taken had placed the group in a "stable financial position, albeit with a continuing weak balance sheet" and had enabled them to request the restoration of dealings in the shares - up %p yesterday to

Turnover of continuing businesses amounted to £49.6m and losses per share emerged at 6.84p.

nary meeting of warrant holders. A majority of 75 per cent was required.

Pacific Horizon's board continues unanimously to recommend the Martin Currie bid. It said it believed it "unlikely that Jupiter will now put forward proposals which are better for shareholders than the current Martin Currie Pacific stake in the trust's warrants.

The board's statement went on to express concern at the effect Jupiter Tyndall's management functions could have

on its independence in the

It added that the warrant holding had an approximate aggregate cost of £150,000, and that Jupiter Tyndall's management fees in the nine months to the end of April this year were £216,873. It stands to lose these if the Martin Currie bid is successful, according to Pacific Horizon.

The bid has been extended until today. Martin Currie said yesterday that up-to-date figures on valid acceptances would not be available until this afternoon. A decision would be taken on whether to continue the offer once this information is available.

The terms of the deal are complex. Martin Currie is offering to pay shareholders 92 per cent of the trust's formula asset value. This excludes 11 per cent of the fund's portfolio invested in illiquid stock. which would be sold, the proceeds being distributed to

## Net assets **Property**

By Vanessa Houlder, Property Correspondent

TR PROPERTY Investment Trust, which took over New England Properties at the end of January, yesterday announced a 24 per cent fail in its net asset value, from 40.61p to 30.71p per share, during the year to March 31.

Revenue before tax fell from £3.79m to £1.31m as a result of lower trading profits and provisions of £2.15m against the fall in value of property dealing stock. Group income from fixed investments rose marginally to £6.5m.

Mr Paul Hyde-Thomson, chairman, said that the New **England Properties acquisition** had fitted well with the existing spread of assets. The acquisition had enabled TRPIT to increase its weight in industrial property and increase the income return on the property portfolio to 10.3 per cent.

"Although activity in many areas of the property market is quickening, values remain depressed and it may be some time before our markets reflect the economic recovery that appears to be beginning. he said.

**Earnings** per share fell from 1.04p to 0.34p. A final dividend of 0.85p is proposed, making an unchanged 1.45p for the

#### Moratorium by Walbrook Ins

Walbrook Insurance, subsidiary of London United Investment, has imposed a moratorium on all claims from May 29, writes Richard Lapper. Directors said they believed the company would be able to develop plans, in co-operation with its policyholders, to ensure its long-term solvency.

Discussions had begun and

it was intended to invite policyholders to receive proposals before the end of this Southwark Run-Off Services

will continue to service its policies and agree claims in the normal course of business.

### | Celestion Audio and | Borthwicks' fall by 24% Kef both sold to SE **Asian Kinergetics**

By Daniel Green

names in British hi-fi were sold yesterday to a south-east Asian-controlled company. Celestion Audio was sold by its parent, Celestion, for £4.7m including £1.6m of debt and

2500,000 of goodwill.

The new owner is Kinergetics Holdings (UK), 50 per cent held by a subsidiary of Hong Kong-based Gold Peak Industries with the remainder divided between Kinergetics Research, a US audio maker (with 40 per cent) and PL Banner and Associates, a UK ven-

ture capital company. Kinergetics Holdings also bought Kef Audio, the loudspeaker manufacturer, from the receiver yesterday. The price was not disclosed.

Mr Paul Banner, Kinergetics Holdings chairman, said; "These are old English brand" names which could have been marketed better in certain parts of the world." He said there was scope for higher revenues in North America and south-east Asia.

Celestion and Kef are among the companies that have main-

tion among specialist hi-fi buy-TWO OF the most famous

The sale leaves Celestion to concentrate on its other businesses in lingerie and swim-

"In a business the size of ours, we have to focus," said Mr Charles Ryland, chief executive. "There is a tremendous Opportunity in our textiles business, primarily with Marks

The deal will cut gearing from a year-end figure of 42 per cent to about 20 per cent, said Mr Ryland. Gearing would be cut in half again by the end of the current year in December.

Earnings per share would rise slightly. Mr Ryland said that the disposal of the audio division was not related to its poor performancé last year when it recorded an operating profit of £76,000 on sales of £13.6m, compared with £1.2m on £15.6m in 1990.

Celestion Textiles achieved an operating profit of £606,000 in 1991 on sales of £19.8m down from the previous year's £1m. Between 85 per cent and 90 per cent of sales are to Marks and Spencer.

### Hongkong Bank raises stake

By David Barchard

Hongkong and Shanghai Bank yesterday purchased 5m shares in Midland Bank at 415p, raising its stake by 0.66 percentage point to 15.23 per cent,

Hongkong Bank declined to identify the seller but said that the shares had been offered to it by an associated company. The hank said it was not the

prelude to substantial buying of Midland shares. • The Department of Trade and Industry has allowed Mid-

land and Lloyds to trade in eachother's shares during ordinary business. Such activity would otherwise be illegal because of the Monopolies and Mergers Commission's investi gation into Lloyds' possible bid for Midland.

#### New trust from Kleinwort stable

Management is to launch an and will probably not pay any investment trust aimed at raising about £30m.

A formal launch is expected within the next two weeks once various technical details have been decided.

The trust would be the first to invest solely in secondhand unmatured endowment poli-

Kleinwort Benson Investment - cies. It will have a fixed life dividends.

A large supply of endowments is available at present, as most are sold as a repayment mechanism for a mortgage. Many homeowners in arrears on their loan have opted to sell their endowments

to marketmakers.

## flavours decision justified

MR JOHN Thomson, chairman of Borthwicks, said the improved results for the year to March 28 justified the decision to dispose of the meat business and concentrate on natural flavours and food

products. Pre-tax profits improved from £255,000 to £1.29m, helped by exceptional profits of £226,000 relating to profits on the sale of a trademark less reorganisation costs. Last time there were exceptional charges

of £633,000. At the operating level profits were £1.76m, compared with £1.16m which included losses of £543,000 on discontinued businesses. Turnover fell from £51.3m to £44.4m but stripping out the £13.9m from discontinued businesses there

was a 19 per cent rise. Mr Thomson said that "oper ating margins had widened, from 2.25 per cent to 3.98 per cent, reflecting a striking improvement in the underlying quality of the ongoing businesses". Especially pleasing had been progress at Globe Extracts in the US where although profits were similar there had been a move to

higher quality. He added that the group was increasing its emphasis on the natural flavours business as shown by the acquisition of Cooke Tweedale & Lindsay. In giving greater importance

to the final dividend the proposed distribution is raised to 0.6p (0.5p) for a total of 1.1p (1p). Earnings per share came out at 1.8p (0.1p).

#### Scholl steps into herbs

Scholl, the personal care products group best known for its health sandals, is stepping into the expanding field of herbal medicine.

It is paying an undisclosed sum for Gerard House, a Bournemouth-based company which currently markets 30 licensed herbai medicine prod-

Gerard House had turnover of £1.9m last year and has net assets of 250,000.

### TO THE SHAREHOLDERS OF JEFFERSON SMURFIT GROUP plc

Due to the curtailment of postal services in Ireland, it is not possible at this time to post the Notice of the Annual General Meeting together with the Annual Report to all shareholders. The Annual General Meeting to be held at the RiverView Racquet and Filmess Club, Beech Hill, Clonskeagh, Dublin 4, on Friday 26 June, 1992, at 3.00 p.m. is convened by the Notice reproduced below. Shareholders may collect their copy of the Notice, the explanatory letter to

of the Company at Beech Hill, Clonskeagh, Dublin 4 during usual business hours on any week day (Saturdays and public holidays excepted) from Wednesday, 3 June, 1992 until Thursday, 25 June, 1992.

The Company will accept a duly completed instrument appointing a proxy as valid if sent by fax to the Registered Office on fax number (01) 2694481 if received no later than 3.00 p.m. on 24 June, 1992. Because of the postal difficulties, it will not be possible to convert the 93/4%

Convertible Unsecured Loan Notes of the Company as originally scheduled. The directors intend to proceed with conversion as soon as practicable after the resumption of full postal services.

### shareholders, the Annual Report and the Form of Proxy at the Registered Office

Notice is hereby given that the annual general meeting of Jefferson Smurfit Group public limited company will be held at the RiverView Racquet and Fitness Club, Beech Hill, Clouskeagh, Dublin 4, on Friday 26 June. 1992 at 3.00 p.m. for the following purposes

1. To consider and adopt the accounts for the year to 31 January, 1992 together with the reports of the directors and auditors thereon (Resolution No. 1). 2. To re-elect as directors the following persons who are recommended by the board for re-

P.J.F. C... J.B. Malloy (Resolution No. 2(b)) (Resolution No. 2(c)) (Resolution No. 2(d)).

## BEP falls to £4m and board changes planned

By Peggy Hollinger

BOARD CHANGES are likely soon at the Bristol Evening Post, the regional newspaper in which Sunday Sport publisher Mr David Sullivan owns a 10 per cent stake.

Along with the announcement of a 15 per cent fall in annual pre-tax profits to £4.06m, Mr Michael Gay, chief executive of BEP, said top managerial changes would be announced later this month "which would lead to possible

board appointments". Mr Gay said the changes had come as the result of an "internai reappraisal".

The candidates - who could come from outside the company - are unlikely to include Mr Sullivan, who was thwarted in his attempt to win a seat on the board at an extraordinary meeting in August.

Mr Sullivan, a multi-millionaire who made his fortune through the sale of a string of sex shops in 1981, was also blocked by the Monopolies and Mergers Commission from taking a controlling stake in the middle-market tabloid in

The advertising recession continued to weigh heavily on BEP over the year ending

David Sullivan: unlikely to

decline in advertising - 67 per cent of total newspaper revenues - had been the main reason for the profits decline. Sales were flat at £61.4m.

Employment advertising was hardest hit, with revenues down by 36 per cent to £3.5m. Mr Gay said there was no sign of an upturn in advertising, and any recovery would be

Newspaper profits fell from £1.4m to £800,000. Sales of the flagship paper rose by 2.5 per cent to 102,000 average daily

The increase had been achieved by becoming more 'popular", Mr Cay said, and not by moving down-market. BEP retained 83 retail outlets, although it was still planned to reduce this to 50 confectionery and newsagent shops. The retail division had been disappointing, with prof-

reduced staff from 937 to 810, while 72 employees took pay cuts of up to £3,500. Net savings of £1m were achieved as a result. Mr Gay said costcutting would save a further

its down almost 32 per cent to

£2.1m in the current year.
The redundancies resulted in an exceptional cost of £3.2m which was offset by the sale of 357,800 Reuters shares for £3.3m. BEP retains 535,000 shares, representing £6.2m at yesterday's close. The company has £2.7m cash in the bank. Earnings per share fell from

13.54p to 12.44p.
A maintained final dividend

### Zider to apple lager - country smocks to urban image Richard Gourlay looks at the forthcoming market flotation of Taunton Cider

conjured up images of the rural English idyll; felt-capped yokels leaning on five-bar gates, straw between teeth and scrumpy at hand. More prosaically it was gentlemen of the road, or students, sliding comatose from their seats after availing of one of the most cost-effective ways of

getting drunk. Neither image is exactly what the large commercial cider makers want. Over the past decade, HP Bulmer and Taunton Cider, the UK's two largest producers, have spent large amounts advertising an altogether different - they say contemporary - image.

Among their greatest challenges has been to make a cider that can be drunk in "sessionable quantities", a piece of exquisite marketing-speak referring to the search for a cider whose taste will not stop drinkers in their tracks after a few pints - even if its strength

While cider's image is far from reconstructed, the repositioning of the product appears to have been remarkably successful. Last year, when the UK drinks market shrank 5 per cent, cider sales volume rose by 3 per cent in spite of the bad summer and the recession. From a position of 2.5 per cent market share 20 years ago, one in every 20 pints drunk in the

UK today is cider.
It is into this background that Taunton Cider, the west country company founded 90 years ago, is to come to the stock market early next month. The flotation is likely to put a valuation of £130m-£150m on the company which its management bought from a consortium of brewers, includ-

CHEWICAL BANK

IME WAS when cider ing Bass, Courage and Scottish conjured up images of & Newcastle, in May last year for £72.5m.

Such a rapid transition, and at such a premium, might suggest that the buy-out team bought Taunton for a song. But Mr Peter Adams, chief executive and managing director since 1987 and one of the team that with employees put up 15 per cent of the £3.3m initial capital, insists this was not the case.

"At the time of the buy-out there was great uncertainty," he says. "We had broken free from our previous partners and there was concern over how well we could perform." At the same time the EC was contemplating applying much higher wine excise duties to cider - a move Brussels has now decided not to make - and the Gulf war was in full swing. In any case, Schroders, the merchant bank, oversaw the trade sale to ensure the management team had no advantage.

While the uncertainty may have been there, foundations were in place for impressive growth. operating profit rose from £5m in 1987 to £12.5m last year and James Capel, the company's brokers, expect operating profit of £16m for the vear to last April.

"The sea change in the cider market came in the late 1970s when draft cider became widely available in bars," says Mr Adams. Taunton's Dry Blackthorn and Bulmer's Strongbow began to grow rapidly, with Taunton increasing its market share from 18.7 per cent in 1975 to 33.4 per cent in 1991, compared to Bulmer's 45

per cent share. Then in 1986, Taunton launched Diamond White, designed to compete with pre-

Bottling up: Peter Adams with Taunton's brands

Pils and Becks, but with a significantly bigger kick.

Squad series, that is as expen-

This was followed in 1989 with the launch of Red Rock, thorn that tends to sate the backed by an advertising campaign featuring actor Leslie Nielson, star of the US Police

sive as it is eccentric. Red Rock is aimed at the lager drinker and, Mr Adams says, lacks the bitter-sweet edge of Dry Black-

palate too quickly for the sake of healthy sales. Cider's transformation to something the style-conscious

drinker felt good being seen with is reflected in the premium ciders' share of Taunton's sales. Growing 20 per cent year on year, premium ciders now account for 25 per cent of Taunton's sales volume and 40 per cent of sales.

jestlar jeks cl

These developments were taking place as the brewers' stranglehold on distribution was being loosened by the Monopolies and Mergers Commission. The March 1989 order that there should be more competition between brewers and a restriction of the tied system gave the buy-out team the opportunity to go independent, with the prospect of a freer market for their product.

Mr Adams then put his own bid together, backed by Samuel Montagu and Morgan Grenfell Development Capital, at the same time as he was supplying Schroders with the information other bidders would need for a

Barely 14 months after the successful buy-out, Taunton is ready for the market and hoping to float at a rating somewhere between Bulmer and Cuinness at a multiple of

about 16. The flotation is likely to raise about £70m which will be used to repay all £41m loan stock and mezzanine debt and all but £10m of bank debt, leaving the company with pro-

forma gearing of 44 per cent.
It is almost guaranteed to lead to jollity in Taunton where all but eight of the company's 500 employees became shareholders, albeit on a modest scale, in the buy-out. A rather larger glass will be raised by Mr Adams' management team which will be retaining about 4 per cent of

### Record £2m (7.82p). A proposed final dividend of 2.2p lifts the total by 51 at Hicking **Pentecost**

RECOVERY AT Hicking Pentecost was confirmed yesterday as the Cardiff-based tex-tiles and specialist castings manufacturer reported profits ahead to a record £2.17m pretax for the year to the end of

The outcome - scored on turnover ahead to £24.6m (£21.1m) - compared to £782,000 last time and a deficit of £1.69m the year before.

Mr John Lister, chairman, said that Nicholson Plastics, which makes glass reinforced plastic water storage tanks, made a better-than-expected contribution to profits since its acquisition last July.

Since the year-end, Hicking signs of the economic recovhas acquired Thompson Horseley Bridge, another water tank manufacturer, and Mr Lister said that further purchases

were being sought. Operating margins and return on capital improved, he said, and the proceeds of last year's open offer, after the Nicholson purchase, helped to cut borrowings.

Gearing was eliminated by the year-end with a net cash balance of about £1.5m.

After an increased tax charge, carnings per share Improved 44 per cent to 11.25p

Local advertising lifts Midlands Radio

Improved revenue from local advertising and reduced operating costs helped Midlands Radio achieve a rise in profits from £307,000 to £605,000 pretax for the haif year to March 31. Turnover rose 8 per cent to

Earnings per share increased from 1.55p to 3.04p and the interim dividend is a sameagain L5p. local advertising was not

matched by increased national advertising. Mr John Parkinson, chair-man, warned: "The directors feel they must show some caution until there are clearer

#### Deeper losses and refinancing at Porth

Performance at Porth Group, the USM-quoted Christmas decorations manufacturer, continued to decline over 1991, with turnover down from £21m to £17.6m and pre-tax losses deepening to £1.34m against £1.04m.

Losses per share were 9.6p (18.3p), reflecting a consolidation and rights issue.

The company has now nego-

## Westland advances 11% and seeks closer links with Agusta

By Paul Betts Aerospace Correspondent

WESTLAND, the helicopter group, is intensifying its industrial links with Agusta, the Italian state-controlled helicopter company, in an effort to forge a second European helicopter partnership to compete against the recently established Franco-German Euro-

copter venture.
The group said it was getting closer to Agusta and looking for new co-operation opportunities with the Italian company. The two companies are joint partners in the development of the CH10L anti-submarine and search and rescue helicopters.

.Westland also reported yesterday a 11 per cent increase in pre-tax profits to £10.4m for the six months to March 27, compared with 19.4m. The figure was helped by a lower excep-tional charge of £900,000 (£3.4m) mainly because of Although the current confused

Mr Alan Jones, Westland's chief executive, said the EH101 programme underpinned the future of the company's helicopter business. He described the collaboration with Agusta as encouraging and expected it to lead to greater co-operation in production and marketing activities.

However, he emphasised the two companies were not considering equity investments or other financial links at this

Mr Jones said the UK government's agreement last year to acquire 44 EH101 helicopters for the Royal Navy would provide Westland with business worth £900m, the first helicopters being due to be delivered

Italy is also committed to buy KH101 helicopters for its navy but the order hinges on Italian parliamentary approval.

made the timing of the helicopter order uncertain. Italy is expected to order 16 with options on an additional eight. Westland would benefit by

about £125m from the Italian Mr Jones said Canada was reviewing the possibility of acquiring 50 of the helicopters. He expected a decision by the

end of this year but conceded Canada could either go ahead or drop the proposal. While seeking closer ties with Agusta in Europe, Westland is continuing to co-operate with Sikorsky and McDonnell Douglas of the US on other

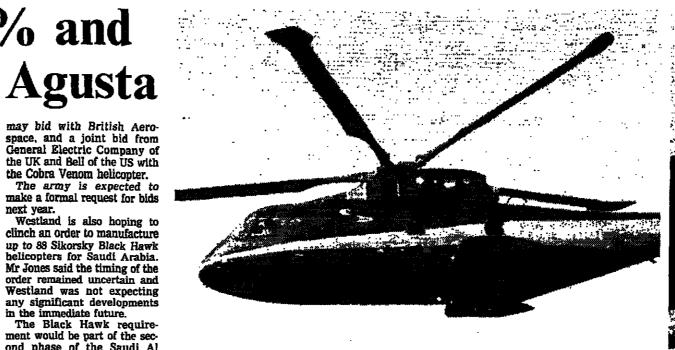

military programmes. Westland has teamed up with McDonnell Douglas to bid for a £2bn UK army attack helicopter contract based on the McDonnell Douglas Apache AH-64. It faces competition from the Franco-German Eurocopter Tiger helicopter, which

political situation in Italy has may bid with British Aerospace, and a joint bid from General Electric Company of the UK and Bell of the US with the Cobra Venom helicopter. The army is expected to

> next year. Westland is also hoping to clinch an order to manufacture up to 88 Sikorsky Black Hawk belicopters for Saudi Arabia. Mr Jones said the timing of the order remained uncertain and

in the immediate future. The Black Hawk requirement would be part of the second phase of the Saudi Al Yamamah defence contract led by British Aerospace. Mr Jones said the Saudis' top priority was a new air base, followed by additional Tornado aircraft with the Black Hawks in third

increases to hard-pressed.

(11.65p).

(20 per cent). The interim dividend is maintained at 1.25p. Mr Jones said the company's commercial aerospace business had been affected by the diffi-culties of the civil aircraft and

airline markets. But the company is hoping to see some recovery in the second part of the year as airline traffic continues to improve.

### US financier claims to have taken stake in \$1bn WPP debt

By Gary Mead, Marketing Correspondent

MR GARY KLESCH, a prior WPP approval. London-based American financler, has announced that his company, Klesch and Company, has "within the last 10 days" bought an unspecified amount of the bank debt of WPP, the troubled international marketing services group which owes \$1bn

However, WPP expressed surprise at the suggestion that Mr Klesch had bought some of its debt - \$1bn spread across a 28 bank syndicate - since the company had not been informed that debt had been consigned to another holder. This is normally a technical requirement for such debt

Mr Klesch said he had not yet bought the debt "under assignment" which he said "would require WPP's consent not to be unreasonably withheld" but on a "sub-participation basis". He suggested that a contract between himself and a selling bank does not require

He declined to say which of WPP's banks have sold him WPP debt, what amount of debt had been sold or at what

WPP said Mr Klesch might have a "phantom" arrangement with some of the banks to eventually purchase WPP debt, but that actual purchase of the debt could not go ahead without WPP's approval. WPP added that "it would be most unlikely" for the group to agree that any of its debt eventually be reassigned to Mr

Mr Klesch said that he intended to seek to have the debt fully assigned to him eventually, but probably not in the next two weeks. He added that it was normal practice for his company - which deals in corporate restructures and valne-impaired assets - initially to buy secondary bank debt on

the 'silent' sub-participation basis before going fully public. There have been signs for some time that some of the

smaller banks in the syndicate are unhappy with their WPP loans and wish to withdraw from the syndicate. Mr Klesch yesterday declined to say whether his purchase of WPP bank debt was intended to enable him to take a stake in the group or for trading on at a

future date.

WPP is currently in the midst of discussions with its banking syndicate on a refinancing proposal which would see the banks subscribe for a rights issue of £150m, which would be used to reduce the group's debt by 25 per cent. In exchange, the banks would agree to subscribe for up to 55 per cent of the enlarged equity. In turn, such a proposal would require shareholder approval; there have been indications in the last two weeks that some shareholders are dissatisfied

with the terms on offer.

#### MTM secures extended bank facilities

By Paul Abrahams

MTM, the chemicals group, has secured extended credit facilities with its banks until January 4 next year.

The move, involving a standstill arrangement, follows two short extensions after the disclosure last month that it was in breach of its covenants. MTM ended the 1991 year

with total endebtedness of £82.2m. By last month, when the group announced its results for 1991, debt had risen to £106.7m. Mr Ken Schofield, the newly appointed chief executive, has said his main objective would be to reduce the company's debt to about

Meanwhile, the company has received the final version of a report by auditors Binder Hamlyn on the events leading up to the series of profit warnings this spring. The report is understood to reveal transactions that were "incorrectly recorded" last year and in

#### Disposals help Faber Prest advance to £1.84m

By Peggy Hollinger

SHEDDING less-profitable husinesses helped Faber Prest. the industrial and distribution services group, lift pre-tax profits in the first half by 2 per cent to £1.84m.

Mr Roger Feaviour, the former Norcros executive who took over at Faber in September, said the company had taken out "elements which contributed large turnover"

but not much profit. The result was a 12.5 per cent decline in sales to £34.7m for the six months to March 31, and steady operating profits of £2.2m

At the same time. Faber reduced debt from £9.5m at the vear-end to £6m at the interim stage. About half of the decline was achieved through disposals and the rest by cash management.

Gearing stood at 32 per cent and interest was 4.5 times covered with payments 48 per cent down at £530,000.

The dividend is maintained at 4.3p, payable out of earnings

### Cullen's dips to £608,000

CULLEN'S HOLDINGS, the food retailer, experienced a fall in annual profits despite a strong performance from its neighbourhood food stores and an increase in turnover from

£18.1m to £20.6m. The pre-tax figure for the year to March 1 fell from £825,000 to £608,000, reflecting primarily the decline in profits from the sale of franchises on existing stores.

Retail operations contributed £509,000 to operating profits, an increase of almost 40 per cent over the previous year, reflecting the strength of the neighbourhood food store oper-

The company has launched two new food retail formats, a prototype patisserie cafe and chicken and ribs restaurant which also supplies speciality foods to the stores.

Development and launch costs of these prototypes have been written off within the £146,000 exceptional items, which also include compensa tion paid to a former director.

There is currently no debt and an unchanged dividend of 0.5p is recommended, payable from earnings of 1.5p (2.8p).

#### SEGMENTAL ANALYSIS OF EQUITY ACCOUNTED EARNINGS\*

\*The equity accounted earnings have been analysed on a segmental basis to show the relative contribution of the various sectors in which the Corporation is invested. This analysis is based on the principal business activity of each investment and so does not indicate the diversity of the underlying investments, details of which will be given in the annual report.

#### COMMENT

In a year in which world economies, and in particular South Africa's, deteriorated further, the resilience of the Corporation's spread of investments was confirmed by a marginal increase in equity accounted earnings to R2 607 million (1 124 cents per share) from R2 591 million (1 118 cents per share). While attributable carnings increased by 19.9 per cent to RI 680 million (724 cents per share) from RI 401 million (604 cents per share) mainly owing to the realisation of increased investment surpluses, retained earnings of associates fell by R263 million. Dividends were increased by 6.2 per cent from 325 cents per share to 345 cents per share, a total distribution of R801 million. Accordingly, dividends were covered 2.10 times by attributable carnings and 3.26 times by equity accounted earnings compared with 1.86 times and 3.44 times respectively last year.

income from investments of RI 654 million was 8.4 per cent higher than the comparative RI 526 million. Trading income, mainly from coal but also from property and industrial minerals interests, decreased marginally from R515 million to R507 million. The surplus on realisation of investments increased to R222 million from R47 million. Other net income was higher at R69 million, resulting partly from lower prospecting costs. The 18.8 per cent fall in the tax charge to R254 million reflects a reduction in Amcoal's tax charge including an adjustment to prior years' deferred tax benefits arising from a lower tax rate. Accordingly, net income after taxation increased by 20.6 per cent to R2 198 million and, after deducting outside shareholders' interest which rose by 23.0 per cent to R518 million resulting largely from consolidating Amgold for a full year, attributable earnings were R279 million higher at RI 680 million.

Retained earnings of associates, which are transferred to non-distributable reserve, fell by R263 million to R927 million. This occurred partly because Rustenburg Platinum's dividends in specie, debited against retained carnings, are brought to account as investment income and also because the financial strength of associates enabled them largely to maintain their dividends in spite of adverse trading

The sale of substantial holdings in Gencor and First National Bank referred to in the interim report realised a surplus of R630 million. This has been treated as extraordinary income. However, in view of the possible impact of difficult world economic conditions on certain of the Corporation's interests and the continuing weak gold price, it was considered prudent to set aside R500 million of this extraordinary surplus as a general provision against the carrying value of investments and loans.

Registered office: 44 Main Street Johannesburg 2001

2 June 1992

Dividend No. 112 of 255 cents per share has been declared payable on Tuesday 4 August 1992 to shareholders registered at the close of business on Friday 26 June 1992. The register of members will be closed from Saturday 27 June 1992 to Saturday 11 July 1992. The full conditions relating to the dividend may be inspected at the Johannesburg and London offices of the Corporation and its transfer secretaries.

The annual report and chairman's statement will be posted to shareholders on or about 29 June 1992.

## Weather worries spark surge in US grain prices

By Barbara Durr in Chicago

GRAIN FUTURES prices shot up in Chicago yesterday as concerns about weather gripped traders. In late morning trading at the Chicago Board of Trade the July contract, the spot month, for soyabeans jumped 17 cents to \$6.31 a bushel, wheat climbed 8.5 cents to \$3.58 and maize rose 4.5 cents to \$2.64.

"It's pure weather." said Mr Steve Bruce, grains analyst for the big Chicago trading house of Geldermann. "They're not going up on nearby demand, it's going up on concern about the crop. The trade is very weather sensitive."

Differing weather patterns in the midwest's and south-western growing states were affecting crops in various manners. But the overall effects appeared negative for crop harvests and growing conditions.

Heavy rains were pounding certain Plains states, such as Oklahoma, where it was Mr Bruce.

red winter wheat could have suffered damage. Spurring further concern in the wheat market, the Kansas Farm Bureau reduced its estimate of the 1992 wheat crop by 20m bushels because of last week's frost damage.

Meanwhile, in the northern Midwest, particularly in Illinois, persistent dryness was touching off worries that there would be damage to the newly planted crops of soyabeans and

The National Weather Service and other long-term forecasters have been predicting hot, dry weather for June and July. Illinois has already recorded its driest May on

The weight of the weather forecasting has sent large com-modities funds into the grain pits to buy, speculating that The spate of fund buying "has fuelled the fire" on prices, said

### US silver mine closes because of low prices

Fresh 'mad cow' study urged

By Barbara Durr in Chicago

DEPRESSED SILVER prices have prompted Asarco, the big US mining group, to close temporarily its Galena silver mine in Northern Idaho. The mine, which produced 3.3m troy be placed on a care-and-mainte-

Silver prices are at the lowest level in real terms since the late 1960s and there is little expectation in the silver market that they will turn around

### Ekofisk oil field back to full production

By Neil Buckley

NORWAY'S EKOFISK oilfield was back in full production yesterday, less than a week after being shut down following a fire in an air filter on. one of its platforms.

Phillips Petroleum, the field's operator, said Ekofisk was producing at slightly above its usual output of 250,000 barrels a day, because of a small build-up of pressure while the field was clo nearby Valhall and Hod fields, linked to Ekofisk by pipeline, were pumping a combined 114,000 b/d, up from their nor-

mai 100,000. Gas supplies from Ekotisk to a consortium of European buyers via Emden in Germany had

NPD, Norway's oil industry watchdog, ordered the closure of the field on Monday of last week pending clarification of the cause of a brief fire in the air filter of a gas turbine.

Phillips said vesterday that the incident was the result of haman error, which led to a small explosion in the turbine following routine cleaning. The company is changing the alarm system on its turbines as a result.

The fire occurred only hours before a planned maintenance shutdown that would have closed the field for about 90 hours. Had the Ekofisk closure lasted for an extended period. there were fears that this might have affected production from the giant Statiford and Gullfaks fields, with combined output of more than 1m

The Ula and Gyda fields, which are also tied into Ekofisk, were not yet producing because of maintenance work, Phillips said, but were expected to be back on-stream soon.

## Mr Koskov's copper-bottomed business plan

One of Russia's small but growing band of entrepreneurs talks to Kenneth Gooding

offering holidays in Spain and Lada cars to encourage people to collect the copper scrap that he says is liberally scattered across Russia. Collectors are rarely interested in roubles, he says. So student collectors can earn eight days in Spain for every half a tonne of old copper they deliver. He has also bought 100 Ladas, each to be swapped for four and a half tonnes of scrap. Mr Koskov is one of a small but growing band of Russian entrepreneurs battling a system that is proving resistant to change. Copper is central to his plans for the future. He sees the metal as a certain way of converting roubles into hard currency. But there is the little matter of obtaining export

Viadimir Koskov: Sees metal exporting as a certain way of converting roubles into hard currency

kov simply gave them to someone who was about to take off from Moscow airport to London. "There were some problems with customs officers at Moscow," he recalls with a stalle. "But I said, where is it written that an aircraft passen-

ger can't take 100 guitars?" Today his Teknesis group of companies, based in Ekaterin-burg, has a wide range of interests but the most important one at the moment is collecting Russia's copper scrap and having it re-refined into metal suitable for export.

He says that last year Teknesis exported about 10,000 nnes of copper (as well as 10,000 tonnes of aluminium, some tungsten and molybde-num). This year he hopes to get licences to export 75,000 tonnes of copper from Russia. Teknesis also has a deal with the Balkhash and Upper Pysh-minsky refineries in Kazakstan to sell all their production, per-

haps 150,000 tonnes. To put this into context, the former Soviet Union's net copper exports moved above 100,000 tonnes for the first time only in 1989. Last year, as the new Commonwealth of of Independent States exported every-

thing possible to raise desperately-needed hard currency, net exports are estimated to have reached 312,000 tonnes.

Mr Koskov is storing copper in a warehouse at Le Havre, France, where it can be used as collateral for loans from the Credit Lyonaise bank as well as providing a buffer stock to ensure a smooth supply to customers. He says a quality guarantee is given by the Societé Général Surveillance of Geneva. He has set up companies in France, England and Switzerland to handle his export business, which he claims now has an annual

turnover of about \$100m. Metal sales are organised by his London office. He describes the copper operation as "an enabler". It is simply a way of raising the hard currency he needs to push through ambitious plans for his business in Russia.He is using the hard currency raised to import computers and other equipment into Russia. His aim is to link the main business centres there through one or two computer head stations eventually using about 30,000 terminals. He also hopes Russia's newlyexchanges will be linked via this system and suggests that this link should help to stabilise the prices of some goods. There tend to be gluts of goods in some parts of the

republic, particularly at the ports, and severe shortages in others. Mr Koskov believes an integrated commodity exchange system would reflect the overall situation more accurately

Teknesis is also setting up business centres in, initially, five cities (Ekaterinburg, Moscow, St Petersburg, Khabarovsk and Novosibirsk) aimed particularly at western companies that would prefer to move in when all the equipment telephones, computers, furni-ture and so on - is installed and up and running - Mr Koskov is even offering Renault limousines as part of a package for companies needing to ferry people to and from airports.

In spite of Russia's economic problems, he hopes to sell about 1,000 of these business centres at 9m roubles each, or \$65,000 or 70 tonnes of copper. He says that, once the price is paid, he can guarantee an office will be ready for occupation in 45 days.

Mr Koskov also is building up his copper business in Russia. His company is supplying the Kazakhstan smelters from a plant in Omsk - with a flotation agent, needed in the refining process. The new agent, he claims, reduces emissions of sulphur dioxide (one of the causes of acid rain) by 10 to 20 per cent.

He recently started to supply the flotation agent and scrap copper to the huge Norilsk nickel-copper combine. Norilsk needs scrap for its smelting process and in return Koskov is willing to buy refined copper for 300,000 roubles a tonne instead of the 70,000 roubles the Russian state export

agency would pay. He is also selling copper to a pipe producer at Revda, near Ekaterinburg, which in turn is exporting his products to France.

Mr Koskov says he set up his Swiss company to manage the group's finances because the Russian banking system has virtually collapsed. According to his statement of account. the Bank for Foreign and Economic Affairs owes his companies \$500,000 in hard currency. But the bank has no money. The state took the money."

He complains that, until recently, any person with hard currency and apparently well-off was assumed by most Russians to be a criminal, part of Russia's Mafia. That is now changing, he suggests. "People are now begining to realise there are good as well as bad ways of making money."

But the entrepreneurial spirit is still hard to detect in Russia. Mr Koskov says he knows of only a handful of other Russian entrepreneurs and tells an anecdote to illustrate his point.

A year ago he approached the management at the defence plant where he once worked offering to help. They were not interested. But recently they called him back. "The plant was at a standstill. The managers were just sitting there, twiddling their thumbs. waiting for something to happen." He asked them if the plant could produce car bodies if it was given a contract. Yes, said the managers, but there was no capital and, even worse, they had to dispose of 6,000 surplus missiles.

Mr Koskov had to point out that there were toos of valu-able alloys, ounces of precious metal and hundreds of expensive components to be reclaimed from this missile stockpile.

Many other people in Mr Koskov's position would have taken the profit and retired, perhaps to a sunnier climate. Why does he press on, combatting a system and enduring the

He does not pause an instant before replying: "It is sad for any man to see his mother dying - Russia is dying and it

#### **MARKET REPORT**

London's robusta COFFEE market saw early gains erased in the afternoon, leaving the September contract unchanged from Friday's close. Dealers said there was little follow through buying interest after Friday's advance in New York. The market could now settle down to trade in a narrow band ahead of the first set of negotiations for a new coffee pact on June 22-26. Dealers discounted some unconfirmed talk of cold weather In Brazil. LME trading was mainly influenced by fluctuations in the sterling/dollar exchange rate, with most metals ending below their highs. Three-month TIN touched a 20-month high

of \$6,460 a tonne after European trade buying touched off short covering and buy stops. While profit taking eventually pared gains, chartists are still looking for a near-term target of \$6,500. Nymex PLATINUM futures were firmer at midday as the fundamental front continued to look bright. Analysts cited continued concerns over the availability of physical supply particularly in Europe, as well as perceptions that European car companies are coming to market. The EC set the end of

TURNOVER in equities fell away in London yesterday as the new two-week trading account opened on a flat note. The FT-Sis index quickly lost the 2,700 mark and the downward trend steepened briefly after Wall Street opened lower ment Index discouraged hopes of an early easing in Federal

Reserve credit policy.
Traders sounded unperturbed, however, by yester-day's loss of 10 points on the Footsie, about half of which reflected nothing more than ex dividend adjustments to a batch of leading blue chip stocks. The FT-SE Index closed at 2,697.6, with chart analysts

Heavy

activity

in Racal

The unwinding of a big stock

overhang and some determined buying by at least two of the

market's most influential secu-

rities houses helped Racal.

Electronics shares to improve

on exceptionally heavy turn-

higher at 63p with turnover

reaching 27m shares, the heavi-

est since the placing of Wil-

liams Holdings' near 10 per

cent stake in the group on

Racal ended the session 11/2

suggesting that 2,675 could be the next testing level. The international scene remained quiet, with sterling showing little change against the D-mark Multinational stocks moved in response to sector influences rather than wider currency implications.

Seaq volume fell to 425.3m when news of a sharp rise in . shares, compared to Friday's the US Purchasing Manage 520.7m. Yesterday's Seaq total was believed to include a programme trade carried out by a eading UK institutional broking house which, as has become the convention, made its move in the stock index futures market early in the trading session.

The London market appeared to be moving into a period of relative calm. This week promises no scheduled

cham, which gained 10 to 925.

SmithKline lifted on talk

that agency broker James

Capel had published a buy recommendation on the stock

and realisation that the compa-

ny's anti-nausea drug, Kytril,

was doing well in France. The

shares, a third of which are

held in the US in the form of

American Depositary Receipts,

also benefited from a stronger

Tightiy-traded Reckitt & Col-

man was helped by a technical

squeeze with some pointing to

an agency cross. The shares

Smith & Nephew slipped 3 to

150p reflecting disappointment over an anticipated sale. The

group said the proposed sale of

its Solpak generic drugs divi-

sion in the US for \$19m

(£10.5m) to Ivax had fallen

USM-listed research group

ML Laboratories jumped 60 to

958p. The group is awaiting a

product licence for a kidney

dialysis substitute, but ana-

hinting at any imminent news

and the leap in the share price

was probably prompted by

technical reasons. Seventy five

per cent of the shares are held

by one trust and, consequently,

they move sharply on very lit-

market reacted to news that

direct competitor to Well-

Wellcome was weak as the

lysts said the company was not

picked up 10 to 650p on turn-

over of 2.7m shares.

dollar.

important economic or company announcements, and traders believe that any further shocks from the Canary Wharf property collapse are largely discounted in the stock market. However, the dangers of further setbacks in property groups continued to hover over back those UK clearing banks known to be heavily exposed in

come's Retrovir. The shares

was among the front runners

in a generally firm banks sec-

tor, and easily outpaced the

wider market, after news that

Hongkong & Shanghai Bank-

ing (HSBC), via its broker

James Capel, had moved into

the market last Friday and

purchased a block of 5m Mid-

land shares at 415p. The purchase saw HSBC's stake in

Midland increased to 15.225 per

NatWest Bank attracted

keen support after a broker's

profits upgrading, the shares

closing 6 firmer at 358p. Lloyds

Bank, given a push by the

banks team at Smith New

The Scottish banks moved in

opposite directions, with one

broker said to be recommend-

ing a switch between the two

stocks. Royal Bank of Scot-

land, increasingly viewed as a

takeover candidate, edged

ahead to 199p after heavy turn-

over of 4.7m shares, but Bank

by the relatively low valua-

tions inferred by the merger of

Centel and Sprint, two US tele-

coms groups, continued to suf-

fer from international selling,

the shares dipping 10 to 374p

on heavy turnover of 6m.

Vodafone is scheduled to

announce preliminary figures

Although restrained by the

weakness of the UK and US

stock markets, the oil sector

Vodafone, shaken last week

of Scotland slipped 2 to 116p.

Court, edged up 3 to 439p.

fell 8 to 972p.

Dealers reported some signs unsettled by worries over the that fund managers were connace of economic recovery, tinuing to back away from the retailing and consumer stocks, which stood out in the market's post-election advance, and moving towards stocks considered to be "safe earn- its growth forecast for the UK ers", such as the utilities. US investors again sought out pharmaceutical stocks, reversing their policies of the earlier months of this year. But equity business was not heavy enough yesterday to pro-

vide a genuine test of institutional attitudes. At Nikko Europe, Mr Peter Thorne expressed a widely-held view in saying that he expects the London market to consolidate around its current level "for the next few weeks". He sees the short-term outlook as

account did little to generate activity on the derivative markets, and both traded options futures, as did the poor openand stock index futures on the ing on Wall Street during the whole experienced a quiet sesafternoon. sion, writes Joel Kibazo.

In stock index futures, the June contract on the FT-SE openned at 2,706 but was quickly sold by independent traders sending it the 2,700 level, where it traded in a tight range of about 15 points

account. Volume at 4,021 was and the gilts markets added to the lack of interest in the

Turnover in traded options was also poor, with only 19,723 contracts dealt by the close. The FT-SE option traded a meagre 5,575 lots. Midland Bank, in which its bidder HSBC has increased its stake, was the most active stock option trading a total of 2,273 contracts. The June 420 calls were the busiest series. This was followed by Lasmo, in which 1,108 lots were traded.

April 29. Electronics specialists said a large stock overhang, of around 7.5m shares, had finally been cleared and the market was now concentrating on Racal's preliminary figures; scheduled for June 10, and details of the demerger of. Chubb, Racal's security locks and alarms business. It was said that after the

demerger both companies will emerge as bid targets. County NatWest and S.G. Warburg Securities have both been strong supporters of Racal. County put a demerged valuation of 75p a share on Racal.

#### Fisons advance

US rival Bristol Myers Squibb Speculation of a bidder for was seeking expanded use for part of Fisons plus talk that a lts anti-aids drugs Videx, a buying stock in the market helped shares in the pharmaceuticals group to rise sharply. Fisons was the higgest percentage gainer in the FT-SE 100 index with a jump of 13 to 363p on turnover of 13m shares.

The share responded to a Sunday newspaper report suggesting retail chemist Boots might bid for Fisons' consumer healthcare business. Boots, which is expected to announce annual profits of around \$365m on Thursday was weak earlier but closed 2 better at 484p. A number of analysts said they anticipated the sale of the consumer division some time this year. One said there were several possible buyers and Boots was one of them although it was "not renowned for paying

above the odds".
Firmness in the US and enthusiasm in the UK helped some pharmaceuticals stocks, particularly SmithKline Bee-
